**Inner Speech - L2** Maria C.M. de Guerrero, 2006-03-30 According to Vygotsky 1986 The decreasing vocalization of egocentric speech denotes a developing abstraction from sound the child's new faculty to think words instead of pronouncing them This is the positive meaning of the sinking coefficient of egocentric speech The downward curve indicates development toward inner speech p 230 The purpose of this volume is to explore the faculty to think words not as the ability to mentally evoke words in the native or first language LI but as the faculty 1 to conjure up in the mind words in a second language L2 To think words rather than to pronounce them is possible through inner speech a function that humans develop in the course of childhood as they internalize the speech of the social group among which they grow This means internalizing and being able to conduct inner speech in a particular linguistic code the LI But humans at a very early or more mature age may also come into contact and interact verbally with speakers of other languages in classrooms or natural settings The possibility thus emerges of internalizing an L2 in such a way that inner speech in the L2 might evolve In this book it is argued that given certain conditions of L2 learning it is possible for learners to attain inner speech in the L2 This book examines the distinctive nature of L2 inner speech and the processes that engender it and characterize its development

**Philosophy For, With, and Of Children** Monica B. Glina,2014-09-26 On one level Philosophy for Children P4C exists takes place and is understood as a set of relatively theory neutral practices we share a story or other kind of stimulus that is both meaningful and philosophically problematic we raise questions about it that will help us inquire into what is problematic we inquire together as a community of philosophical inquiry mostly through a process of dialogue we explore ways to experiment with these dialogical judgments in writing in works of art in action and in life and we self assess our own thinking and our work as a community of inquiry in order to collectively self correct On another level P4C exists takes place and is understood as a set of theory laden and agenda laden practices that are undertaken as means to certain kinds of desired outcomes These are the program s aims and objectives and they come from

three places the core practices inherent in P4C those that have become obvious to practitioners or have developed out of extensive practice and those that have developed out of philosophical and empirical research in philosophy and education including epistemology learning theory argumentation theory and the politics of discourse and political theory This last kind of work presents the challenge to P4C to find out if there is such a thing as a core theory that justifies the core practices and if so whether the integrity offered by such a theory is either shored up or compromised by being pulled in any of these other directions The diversity of curriculum materials pedagogical protocols and grounding theories P4C has spawned signifies not merely different approaches to but different conceptions of what it means to teach philosophy to children or to engage children in philosophical practices The chapters in *Philosophy For With and Of Children* present a broad range of directions for P4C and illustrate the considerable diversity of agendas that can be brought to it as well as the ways in which these agendas sometimes complement and sometimes undermine one another
