of research centres and labour service organizations teaching contents and exam questions the 1974 2003 volumes of the South African Labour Bulletin and newsletters of ISA Research Committee 44 on Labour Movements Qualitative analysis of four seminal books is used to assess their contribution to original general theory building In depth interviews with Labour Studies representatives complement the analysis of documents and literature by reconstructing the oral history of this scholarly community an indispensable source given that many debates could not appear in written form or had to be watered during the Apartheid years The study concludes that over time South African social scientists have generated knowledge on labour industry and trade unions that is universally comprehensible but arrogantly local

**Property Rights in Blood, Genes and Data** Jasper A. Bovenberg, 2005-12-01 Who owns our DNA The intuitive answer to this question is readily apparent you own your own DNA However since Watson and Crick discovered its molecular structure our DNA has gradually evolved from the Secret of Life to a potentially lucrative Commodity This development has triggered conflicting perspectives as to who holds legal title to our blood genes and related health data Rather than focusing on a specific property claim in isolation this book is the first to provide an integrated analysis of the merits of each of these perspectives While the United Nations have proclaimed human DNA as the Heritage of Humanity industry claims it to be patentable subject matter Whereas populations whose DNA is used in national biobanks claim their DNA as their National Property individual patients increasingly stand up for their Personal Property Rights in their samples Meanwhile academic researchers claim their collections of biological materials as their Academic Property Taking a case and context driven approach and backing up traditional legal analysis with historical analogies web surveys and practical experience Jasper Bovenberg provides counter intuitive provocative and practical answers and recommendations for such controversial issues as how to share the benefits of DNA research whether or not to recognize personal property rights in bodily material and access to biomedical datasets in academia This book will interest not only lawyers and researchers but also universities funding agencies industry and policymakers worldwide It is also written to inform patients their relatives doctors and anyone else with an interest in a dilemma that is as universal as our DNA

*A Century of Segregation* Leland Ware, 2018-10-18 This book explains how race and class intersect in ways that uniquely disadvantage racial minorities The narrative begins with the 1896 decision in Plessy v Ferguson The Supreme Court ruled that separate facilities for blacks were permissible under the

Fourteenth Amendment if they were equal to those reserved for whites One reaction was the establishment of the NAACP to lead the fight for Civil Rights After more than two decades of lobbying and public education a long range carefully orchestrated litigation campaign was launched Segregation would be challenged with lawsuits insisting that black schools be made physically and otherwise equal to white schools The lawyers calculated that the resulting burden and expense would ultimately cause segregation to collapse under its own weight A series of successful equalization suits spanning over two decades laid the foundation for the direct challenge in Brown v Board of Education That 1954 decision inspired a large scale grass roots Civil Rights Movement A decade of marches boycotts and mass protests persuaded Congress to enact the Civil Rights laws of the 1960s Today conditions for ethnic minorities are far better than they were a generation ago However the story of the nation s black and brown communities is a tale of two cities one prosperous educated and affluent adjacent to another suffering from grinding poverty and a lack of opportunities for advancement For those able to take advantage of the opportunities created by the Civil Rights revolution the gains have been dramatic For those left behind in impoverished communities the obstacles to advancement are more daunting today than they were a generation ago Law & Capitalism

Curtis J. Milhaupt, Katharina Pistor, 2008-09-15 Recent high profile corporate scandals such as those involving Enron in the United States Yukos in Russia and Livedoor in Japan demonstrate challenges to legal regulation of business practices in capitalist economies Setting forth a new analytic framework for understanding these problems Law and Capitalism examines such contemporary corporate governance crises in six countries to shed light on the interaction of legal systems and economic change This provocative book debunks the simplistic view of law s instrumental function for financial market development and economic growth Using comparative case studies that address the United States China Germany Japan Korea and Russia Curtis J Milhaupt and Katharina Pistor argue that a disparate blend of legal and nonlegal mechanisms have supported economic growth around the world Their groundbreaking findings show that law and markets evolve together in a rolling relationship and legal systems including those of the most successful economies therefore differ significantly in their organizational characteristics Innovative and insightful Law and Capitalism will change the way lawyers economists policy makers and business leaders think about legal regulation in an increasingly global market for capital and corporate governance
