Research Methods for the Social Sciences

Jerry Wellington, Marcin Szczerbinski, 2007-12-18 Part of the Guides for the Perplexed series this title serves as a guide to research in the social and behavioural sciences It discusses its value its limitations and its uses It tackles difficult issues and concepts providing guidance and signposts to further reading **Basic Concepts in the Methodology of the Social Sciences** Johann Mouton, H. C. Marais, 1988 This book consists of three major sections In the first which includes chapters 1 to 7 the basic concepts of the methodology of the social sciences are discussed In the second chapters 8 and 9 the most important concepts of part one are integrated in discussions on the writing of research proposals and research reports The third section appendices consists of three case studies in which the most important methodological principles which were discussed in the preceding sections are illustrated A Short Introduction to Social Research Matt Henn, Mark Weinstein, Nick Foard, 2005-12-15 This book introduces students and researchers to the key ideas and issues that inform research practice Authors Matt Henn Mark Weinstein and Nick Foard provide a clear and easy to understand roadmap to help the reader plan their research project from beginning to end This book is perfect for use on introductory methods courses and is also an invaluable guide for the first time researcher embarking on their own small scale research project It is the intention of this book to prepare students and new researchers for their research project Brilliantly written throughout this is your essential guide to the theory of research the practice of research and the best ways to plan and manage your research **Designing Social Research** Norman Blaikie, 2009-11-23 The basic requirements for research designs and research proposals are laid out at the beginning of the book followed by discussion of the major design elements and the choices that need to be made about them Four sample research designs at the end of the volume illustrate the application of the research strategies **Word Association Thematic Analysis** Michael Thelwall, 2022-05-31 Many research projects involve analyzing sets of texts from the social web or elsewhere to get insights into issues opinions interests news discussions or communication styles For example many studies have investigated reactions to Covid 19 social distancing restrictions conspiracy theories and anti vaccine sentiment on social media This book describes word association thematic analysis a mixed methods strategy to identify themes within a collection of social web or other texts It identifies these themes in the differences between subsets of the texts including female vs male vs nonbinary older vs newer country A vs country B positive vs negative sentiment high scoring vs low scoring or subtopic A vs subtopic B It can also be used to identify the differences between a topic focused collection of texts and a reference collection The method starts by automatically finding words that are statistically significantly more common in one subset than another then identifies the context of these words and groups them into themes It is supported by the free Windows based software Mozdeh for data collection or importing and for the quantitative analysis stages This book explains the word association thematic analysis method with examples and gives practical advice for using it It is primarily intended for social media researchers and students although the method is applicable to any collection of short texts **Approaches and Processes of Social Science Research** Tshabangu,

Icarbord,Ba', Stefano,Madondo, Silas Memory,2020-12-18 For the social sciences the approach and processes in research are quite different The type of evidence that social scientists can collect is often very dependent on the method that has been used to gather the data The type of findings that can be discussed are often not straightforward at all and no easy comparison can be made with the natural sciences although this is not impossible The methodology in the social sciences has the same role as technology and lab techniques in the natural sciences as these need to be developed rapidly to account for the increasing complexity of the natural objects to be studied The methodologies in the social sciences need to go through an intense period of critique reflection and reformulation to consider the complexity of social issues under investigation

Therefore the area of social sciences research and methodologies should continually be studied to advance the field Approaches and Processes of Social Science Research presents new research methodologies in the social science field and aims at providing a broad introduction to the methodology of social research in its main theoretical foundations as well as in its practical applications Readers will develop a critical thinking attitude about social problems which in turn will sharpen their analytic approach to research This book includes four main parts philosophical perspectives strategies for conducting research common approaches for handling and collecting data and critical aspects of research writing throughout the process While highlighting topics such as critical theory in research ethical issues research processes data analysis and more this book is ideal for researchers in the social sciences and practitioners stakeholders academicians and students interested in deepening their understanding of the ideas and the practices of social science research **Mixing Methods in**
