Farewell to Shulamit Carsten Wilke, 2017-04-10 The Song of Songs a lyric cycle of love scenes without a narrative plot has often been considered as the Bible's most beautiful and enigmatic book The present study questions the still dominant exegetical convention that merges all of the Song's voices into the dialogue of a single couple its composite heroine Shulamit being a projection screen for norms of womanhood An alternative socio spatial reading starting with the Hebrew text's strophic patterns and its references to historical realia explores the poem's artful alternation between courtly urban rural and pastoral scenes with their distinct characters The literary construction of social difference juxtaposes class specific patterns of consumption mobility emotion power structures and gender relations This new image of the cycle as a detailed poetic frieze of ancient society eventually leads to a precise hypothesis concerning its literary and religious context in the Hellenistic age as well as its geographical origins in the multiethnic borderland east of the Jordan In a Jewish echo of anthropological skepticism the poem emphasizes the plurality and relativity of the human condition while praising the communicative powers of pleasure fantasy and multifarious Eros
