Visions of the Sociological Tradition Donald N. Levine, 1995-09

This book is a masterful account of the social science enterprise by one of its most accomplished practitioners. Moving from the origins of systematic knowledge in ancient Greece to the present day, Donald Levine offers a richly detailed, ingeniously organized introduction to the cornerstone works of Western social thought.

The ISA Handbook of Diverse Sociological Traditions Sujata Patel, 2010

This latest edition to the ISA handbook series actively engages with the many traditions of sociology in the world. Twenty nine chapters from prominent international contributors discuss, challenge, and reconceptualize the global discipline of sociology, evaluating the diversities within and between sociological traditions of many regions and nation states. They assess all aspects of the discipline: ideas and theories, scholars and scholarship practices and traditions, ruptures and continuities through an international perspective. Its goal is to become a text for debating the contours of international sociology.

Visions of the Sociological Tradition Donald N. Levine, 1995-09-01

Don Levine moves from the origins of systematic knowledge in ancient Greece to the present day to present an account that is at once a history of the social science enterprise and an introduction to the cornerstone works of Western social thought. *Visions* has three meanings, each of which corresponds to a part of the book. In Part 1, Levine presents the ways previous sociologists have rendered accounts of their discipline as a series of narratives or life stories that build upon each other, generation to

generation a succession of efforts to envisage a coherent past for the sake of a purposive present In Part 2 the heart of the book Levine offers his own narrative reconnecting centuries of voices into a richly textured dialogue among the varied strands of the sociological tradition Hellenic British French German Marxian Italian and American Here in a tour de force of clarity and conciseness he tracks the formation of the sociological imagination through a series of conversations across generations From classic philosophy to pragmatism Aristotle to W I Thomas Levine maps the web of visionary statements confrontations and oppositions from which social science has grown At the same time this is much more than an expert synthesis of social theory Throughout each stage Levine demonstrates social knowledge has grown in response to three recurring questions How shall we live What makes humans moral creatures How do we understand the world He anchors the creation of social knowledge to ethical foundations and shows for the first time how differences in those foundations disposed the shapers of modern social science among them Marshall and Spencer Comte and Durkheim Simmel and Weber Marx and Mosca Dewey and Park to proceed in vastly different ways In Part 3 Levine offers a vision of the contemporary scene setting the crisis of fragmentation in social sciences against the fragmentation of experience and community By reconstructing the history of social thought as a series of fundamentally moral engagements with common themes he suggests new uses for sociology s intellectual resources not only as insight about the nature of modernity but also as a model of mutually respectful communication in an increasingly fractious world

Three Sociological Traditions Randall Collins, 1985 Examining the three strands of sociological thought Durkheim s ritual solidarity theory Marx and Weber s conflict theory and Colley Mead and Husserl s micro interactionist theory the author provides a unique overview of the field

Critics of Enlightenment Rationalism Revisited Gene Callahan, Kenneth B. McIntyre, 2022-09-10 This book provides an overview of some of the most important critics of Enlightenment rationalism The subjects of the volume including among others Pascal Vico Schmitt Weber Anscombe Scruton and Tolkien do not share a philosophical tradition as much as a skeptical disposition toward the notion common among modern thinkers that there is only one standard of rationality or reasonableness and that that one standard is or ought to be taken from the presuppositions methods and logic of the natural sciences The essays on each thinker are intended not merely to offer a commentary on that thinker but also to place the person in the context of this larger stream of anti rationalist thought *The Sociological Tradition* Robert A. The Social Thought of Talcott Parsons Uta Gerhardt, 2016-02-17 The Social Thought of Talcott Parsons offers an insightful new reading of the work of Talcott Parsons keeping in view at once the important influences of Max Weber on his sociology and the central place occupied by methodology which enables us to better understand the relationship between American and European social theory Revealing American democracy and its nemesis National Socialism in Germany as the basis of his theory of society this book explores the debates in which Parsons was engaged throughout his life with the Frankfurt School C Wright Mills and the young radicals among the disobedient student generation as well as economism and utilitarianism in social theory the opponents that Parsons confronted in the interests of humanism In addition to revisiting Parsons extensive oeuvre Uta Gerhardt takes up themes in current research and theory including social inequality civic culture and globalization offering a fascinating demonstration of what the conceptual approaches of Parsons can accomplish today Revealing methodology and the American ethos to be the cornerstones of Parsons social thought this book will appeal not only to those with interests in classical sociology and who wish to fully understand what this classic has to offer but also to those who wish to make sociology answer to the problems of the society of the present *Sociology for the Twenty-first Century* Janet L. Abu-Lughod, 1999 These original essays by eminent sociologists probe issues of central importance to North American societies in the twenty first century The chapters in part 1 revise theory and methods to comprehend the economic and political institutions that increasingly dominate the lives of individuals and groups arguing that these giants must be made more democratically accountable Part 2 explores the social effects that growing globalization transnationalization and information technologies are having on politics economics and the environment The final chapters compare how new immigrants from increasingly diversified backgrounds are being absorbed in Canada and the United States exploring the

impact that immigrants are having on preexisting ethnic minorities and on the dominant political culture While it is a major attempt to refocus the discipline of sociology the book s clear nontechnical style and its attention to issues of central concern to all citizens make it also highly accessible to nonspecialists Contributors are Janet L Abu Lughod Tomas Almaguer Giovanni Arrighi Gilles Bourque Randall Collins Jules Duchastel Joe Feagin Harriet Friedmann Pierre Hamel Moon Kie Jung Joel Levine Henri Lustiger Thaler Louis Maheu Joel Perlmann Saskia Sassen Gideon Sjoberg Dorothy Smith Roger Waldinger and Barry Wellman
