ORGANISATIONS PHILIPPE SCIEUR, 2012-03-10 This book in its second edition continues to present the main models of Sociology that have been conceptualised to apprehend the world of organisations From the theories of bureaucracy and human relations to contemporary approaches this book focuses on all the key aspects of Sociology of an organisation The concepts defined are marked by the consideration of modes of rationality types of cooperation of networks and power games of systems of decision making and logics of action The book cites the contributions made and the definitions given by the great Sociologists like Max Weber Talcott Parsons Michel Crozier Renaud Sainsanlieu to help the students understand the topics more clearly This second edition is enriched with studies of discussed cases charts and of extracts of texts pertinent to the productive system to the public sphere and the associative fact The book is intended for the undergraduate students of sociology It will also be of interest to those who on a personal or professional level wish to understand better how companies

administrations etc function **Moungbakou: Production des Connaissances en Scienc** ,2023-04-13 This book addresses the epistemological ethical and methodological challenges faced by African scholars in their research practices The epistemological domain addresses three interrelated topics how African university students ethnocentric choice of research topics hampers the production of knowledge researchers adaptation of their research methods to improve validity and the challenge of knowledge production on community museums plagued by gross inertia irregularities uncooperative gatekeepers and inadequate funding The methodological domain foregrounds issues around scientific rigour the criteria for what counts as quality research and reporting standards Contributors contend that the use of mixed methods provides the best scope for the effective study and evaluation of social issues They also detail how better funded projects tend to improve the respect of ethical standards especially as they pertain to the protection of subjects confidentiality Self financed researchers on the other hand tend to be less compliant a challenge that afflict especially younger and inexperienced researchers This volume thus contributes not only to a critical understanding of the challenges faced by social scientists in contemporary Africa but also the prospects and mechanisms on how to improve knowledge production processes
