Cord, 2019-01-18 The London School of Economics LSE has been and continues to be one of the most important global centres for economics With six chapters on themes in LSE economics and 29 chapters on the lives and work of LSE economists this volume shows how economics became established at the School how it produced some of the world s best known economists including Lionel Robbins and Bill Phillips plus Nobel Prize winners such as Friedrich Hayek John Hicks and Christopher Pissarides and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast this volume provides economists especially those interested in macroeconomics and the history of economic thought with the first in depth analysis of LSE economics Maurice Dobb T. associated with the Cambridge tradition at the very core of which those economists stand The first section opens with a chapter presenting the group within the physical and metaphorical place which was Cambridge and the remaining five chapters centre on the life and work of each economist The second section has papers looking at them in pairs as it were and revolves around the theme of their collaboration in various intellectual achievements In particular the opening piece makes the rather bold point that the road to the General Theory was not a solitary path In other two papers much is said of Sraffa's intellectual isolation in Cambridge and the difficulty of communication with Joan Robinson The chapters in the third section take up aspects of their theories and approaches which justify the importance and relevance of the Cambridge tradition in economics This book should be of interest to students and researchers within the history of economics and economic thought particularly those focussing on the Cambridge or Keynesian traditions Gender and the Dismal Science Ann Mari
