Symbolic Interactionism and Cultural Studies Norman K. Denzin, 2008-04-30 Symbolic interactionism is one of the most enduring and certainly the most sociological of all social psychologies In this landmark work Norman K Denzin traces its tortured history from its roots in American pragmatism to its present day encounter with poststructuralism and postmodernism Arguing that if interactionism is to continue to thrive and grow it must incorporate elements of post structural and post modern theory into its underlying views of history culture and politics the author develops a research agenda which merges the interactionist sociological imagination with the critical insights on contemporary feminism and cultural studies Norman Denzin s programmatic analysis of symbolic interactionism which develops a politics of interpretation merging theory and practice will be welcomed by students and scholars in a wide range of disciplines from sociology to cultural studies

Alternative Sociologies of Religion James V Spickard, 2018-03-06 Uncovers what the sociology of religion would look like had it emerged in a Confucian Muslim or Native American culture rather than in a Christian one Sociology has long used Western Christianity as a model for all religious life As a result the field has tended to highlight aspects of religion that Christians find important such as religious beliefs and formal organizations while paying less attention to other elements Rather than simply criticizing such limitations James V Spickard imagines what the sociology of religion would look like had it arisen in three non Western societies What aspects of religion would scholars see more clearly if they had been raised in Confucian China What could they learn about religion from Ibn Khaldun the famed 14th century Arab scholar What would they better understand had they been born Navajo whose traditional religion certainly does not revolve around beliefs and organizations Through these thought experiments Spickard shows how non Western ideas understand some aspects of religions even of Western religions better than does standard sociology The volume shows how non Western frameworks can shed new light on several different dimensions of religious life including the question of who maintains religious communities the relationships between religion and ethnicity as sources of social ties and the role of embodied experience in religious rituals These approaches reveal central aspects of contemporary religions that the dominant way of doing sociology fails to notice Each approach also provides investigators with new theoretical resources to guide them deeper into their subjects The volume makes a compelling case for adopting a global perspective in the social sciences

Beyond Sociology's Tower of Babel Bernard S. Phillips, 2001 To look outside the discipline of sociology is to find little credibility given to the field as science Bernard Phillips argues that we are learning to see ever more clearly the contradiction between scientific standards and what in fact has been achieved by sociology Instead of knowledge based on the full range of our findings we have separate pieces of knowledge located within the diverse areas of the discipline and fads and fashions in the ideas and terms we use with relatively little cumulative development This has led many to question whether any scientific method can be applied to human behavior If the arguments and alternative interpretations in this book

on the problematic nature of sociology's use of scientific method prove to be credible and fruitful then the implications are profound. For example, the conclusions drawn for every single social science study that has ever been conducted would be open to reinterpretation because they fail to take into account systematically the enormous complexity involved within any given instance of human behavior. Our present approach assumes implicitly that the pieces of the human jigsaw puzzle can at some point be put together so as to yield a coherent picture. Yet as Phillips shows, if each piece is itself deficient, then no coherent picture emerges when we attempt to put the pieces together. Refusing to take the current fragmentation of sociology as inevitable, Phillips offers a clear vision through a series of heuristic web images of how sociologists might achieve the cumulative development and credibility that are the hallmarks of any science. His research draws heavily on the works of classical and contemporary theorists, philosophers, and historians of science, as well as on postmodernist critiques and responses to postmodernism. This reconstruction will be useful for courses in method in the study of the classical tradition of sociology. Bernard Phillips was introduced to sociology at Columbia University by C. Wright Mills. A former professor of sociology at Boston University, cofounder of the ASA Section on Sociological Practice, and founder of the Sociological Imagination Group, his publications emphasize methodology and theory.

Social Welfare in Transitional China Keqing Han, 2019-10-08. At a time of significant transformations in Chinese society, this book addresses the key issue of social welfare and the reform of the welfare system in 21st century China. Considering both the theory and policy making across a variety of welfare issues which directly impact on the country's economic development, it examines the development of civil society, changes in social stratification, and in social class structure. It notably considers the key questions of welfare in both urban and rural settings for different population groups such as children, the elderly, and the disabled, addressing topical issues of housing, education, public health, poverty, and the restructuring of related welfare policy system to tackle China's key issues. It also considers the impact of migrant workers in China and their social integration, including within the welfare system. Providing a unique insight into how economic globalization and financial crisis affects Chinese social welfare policies, this book is a key read for scholars worldwide interested in social transformation in Chinese society at a time of significant social and economic transition.

Perceiving crime as alternative? Benjamin Van Damme, Lieven Pauwels, 2016-01-04. In the past 200 years, many explanations have been given for rule-breaking behavior. A classic idea that was developed during the Enlightenment was that crime should be understood as the outcome of a rational choice process. While much criticism exists with regard to rational choice theories, the fact remains that humans deliberate when committing acts. This process of deliberation deserves attention in etiological research despite the fact that some of the assumptions of rational choice theories do not hold. This is exactly what this book is all about. This book is the result of an innovative attempt to study criminal decision making using a less studied method in criminological inquiries, namely randomized scenario studies. A randomized scenario study combines the principles of survey research with ideas that are central in experimental design. This

book is an elaboration of a dissertation written by Benjamin Van Damme who personally developed an internet application for randomized scenario studies that can be used to test ideas developed in theories of crime causation This dissertation is part of a larger research initiative of Lieven Pauwels who supervised Benjamin Van Damme s master dissertation namely a study on the empirical status of situational action theory Benjamin Van Damme and Lieven Pauwels empirically demonstrate that criminal decisionmaking can be seen as a perception choice process i e the result of person environment interactions

Environmental characteristics trigger criminal decision making but only in individuals that see crime as an alternative The theoretical and methodological consequences for criminological inquiries are discussed Social Theory for Alternative Societies Matt Dawson,2017-09-16

This book traces a unique story of social theory one which focuses on its role in offering ideas for alternative societies In charting this story Matt Dawson argues that the differences in alternatives offered by social theorists not only demonstrate the diversity in and value of sociological perspectives but also emphasize competing ideas of the role of intellectuals in social change The text discusses a collection of social theorists from key figures such as Marx Durkheim and Du Bois to less well known or now commonly overlooked writers such as Levitas Lefebvre and Mannheim It explains their use of the tools of sociology to critique society and provide visions for alternatives highlighting elements of the intellectual backgrounds of movements such as socialism anti racism feminism and cosmopolitanism Social Theory for Alternative Societies not only explores in detail a variety of thinkers but also reflects on the relevance of sociology today and on the connection between social theory and the real world Thus it will be of interest to students of sociology and those interested in ideas for a better society **Basic concepts, theories and problems: alternative approaches** Joshua A.

Center Liah Greenfeld, Michel L. Martin, 1988-12-29 There are several concepts within the social sciences that refer to the fundamental realities on which the various disciplines focus their attention The concept of the center as defined by Edward Shils has such a status in sociology for it deals with and attempts to provide an answer to the central question of the discipline the question of the constitution of society Center is a commonly used term with a variety of meanings According to editors Liah Greenfeld and Michel Martin center carries a twofold meaning when used as a concept In its first sense it is a synonym for central value system referring to irreducible values and beliefs that establish the identity of individuals and bind them into a common universe In its second sense center refers to central institutional system the authoritative institutions and persons who often express or embody the central value system Both meanings imply a corresponding idea of periphery referring both to the elements of society that need to be integrated and to institutions and persons who lack authority The original essays compiled in this volume examine and apply the concept of the center in different contexts The contributors come from a broad range of disciplines classics religion philosophy history literary criticism anthropology political science and sociology which serves to underscore the far reaching significance of the Shilsian theory of society The interrelated subsets of the center periphery theme addressed here include symbolic systems intellectuals the expansion of the center into the periphery parallel concepts in the work of other scholars besides Shils and the paths of research inspired by these concepts The volume features an introspective essay by Shils himself in which he reexamines his central ideas in the light of new experiences and the ideas of others some of them contained in this volume By drawing together such diverse scholars around a unified idea this collection achieves a cohesion that makes it an exciting contribution to the comparative analysis of social and cultural systems A collective effort in social theory Center Ideas and Institutions is a testimony to the breadth and complexity of one of man's ideas

Alternative Discourses on Modernization and Development Kim Kyong-Dong, 2017-05-08 This cutting edge work offers an alternative perspective on existing paradigms of modernization and development that originated in the West from the vantage point of non western late modernizing societies It considers how East Asian philosophical ideas enrich the reformulation of the concept of development or societal development and how influential principles of traditional culture such as yin yang dialectic interact with modern ideas and technology It addresses the significance of alternative discourses as culturally independent scholarship and the problems of pervasive mechanisms of social political economic and cultural dependence in the global academic world
