Elliott, 2012-10-11 Throughout the entire Cold War era Vietnam served as a grim symbol of the ideological polarity that permeated international politics But when the Cold War ended in 1989 Vietnam faced the difficult task of adjusting to a new world without the benefactors it had come to rely on In *Changing Worlds* David W P Elliott who has spent the past half century studying modern Vietnam chronicles the evolution of the Vietnamese state from the end of the Cold War to the present When the communist regimes of Eastern Europe collapsed so did Vietnam's model for analyzing and engaging with the outside world Fearing that committing fully to globalization would lead to the collapse of its own system the Vietnamese political elite at first resisted extensive engagement with the larger international community Over the next decade though China's rapid economic growth and the success of the Asian tiger economies along with a complex realignment of regional and global international relations reshaped Vietnamese leaders' views In 1995 Vietnam joined the Association of Southeast Asian Nations ASEAN its former adversary and completed the normalization of relations with the United States By 2000 Vietnam had taken the plunge and opted for greater participation in the global economic system Vietnam finally joined the World Trade Organization in 2006 Elliott contends that Vietnam's political elite ultimately concluded that if the conservatives who opposed opening up to the outside world had triumphed Vietnam would have been condemned to a permanent state of underdevelopment Partial reform starting in the mid 1980s produced some success but eventually the reformers' argument that Vietnam's economic potential could not be fully exploited in a highly competitive world unless it opted for deep integration into the rapidly globalizing world economy prevailed Remarkably deep integration occurred without Vietnam losing its unique political identity It remains an authoritarian state but offers far more breathing space to its citizens than in the pre reform era Far from being absorbed into a Western inspired development model globalization has reinforced Vietnam's distinctive identity rather than eradicating it The market economy led to a revival of localism and familism which has challenged the capacity of the state to impose its preferences and maintain the wartime narrative of monolithic unity Although it would be premature to talk of a genuine civil society today's Vietnam is an increasingly pluralistic community Drawing from a vast body of Vietnamese language sources *Changing Worlds* is the definitive account of how this highly vulnerable Communist state remade itself amidst the challenges of the post Cold

War era *University Expansion in a Changing Global Economy* Martin Carnoy, Prashant Loyalka, Maria Dobryakova, Rafiq Dossani, Isak Froumin, Katherine Kuhns, Jandhyala Tilak, Rong Wang, 2013-07-17 This is a study of higher education in the world's four largest developing economies Brazil Russia India and China Already important players globally by mid century they are likely to be economic powerhouses But whether they reach that level of development will depend in part on how successfully they create quality higher education that puts their labor forces at the cutting edge of the information society Using an empirical comparative approach this book develops a broad picture of the higher education system in each country in the context of both global and local forces The authors offer insights into how differing socioeconomic and historic patterns of change and political contexts influence developments in higher education In asking why each state takes the approach that it does this work situates a discussion of university expansion and quality in the context of governments educational policies and reflects on the larger struggles over social goals and the distribution of national resources

Ethnicities and Values in a Changing World Gargi Bhattacharyya, 2016-05-23 Recent debates about national identity belonging and community cohesion can appear to suggest that ethnicity is a static entity and that ethnic difference is a source of conflict in itself *Ethnicities and Values in a Changing World* presents an alternative account of ethnicity This volume brings together an international team of leading scholars in the field of ethnic studies in order to examine innovative articulations of ethnicity and challenge the contention that ethnicity is static or that it necessarily represents traditional values and cultures It will appeal not only to sociologists but to anyone working in the fields of cultural studies race and ethnicity globalization migration and anthropology **World Social Science Report 2013 Changing Global**
