Owen Barfield

Speakers Meaning:

Speaker's Meaning Owen Barfield, 1871 *Logic, Language and Meaning* Maria Aloni, Harald Bastiaanse, Tikitú de Jager, Katrin Schulz, 2010-10-06 This book contains the revised papers presented at the Amsterdam Colloquium 2009 held in Amsterdam The Netherlands in December 2009 The 41 thoroughly refereed and revised contributions presented together with the revised abstracts of 5 invited talks are organized in five sections the first section contains extended abstracts of the talks given by the invited speakers the second third and fourth sections contain invited and submitted contributions to the three thematic workshops hosted by the colloquium the Workshop on Implicature and Grammar the Workshop on Natural Logic and the Workshop on Vagueness the final section consists of submissions to the general program The topics covered range from descriptive syntactic and semantic analyses of all kinds of expressions to theoretical logical and computational properties of semantic theories philosophical foundations evolution and learning of language Speakers, Listeners and Communication Gillian Brown, 1995 In this book Gillian Brown draws on a wide range of examples of discourse analysis to explore the ways in which speakers and listeners use language collaboratively to talk about what they can see in front of them and about a series of events She examines the conditions under which communication is successful and the conditions under which it sometimes fails The focus of her attention is upon the listener's role as the listener tries to make sense of what the speaker says in a highly constrained context her cognitive pragmatic approach to discourse analysis both complements and challenges the sociological anthropological perspectives on the subject which currently predominate Gillian Brown is co author of the well known textbook *Discourse Analysis* Cambridge University Press 1983 Meaning, Expression and Thought Wayne A. Davis, 2002-11-11 This philosophical treatise on the foundations of semantics is a systematic effort to clarify deepen and defend the classical doctrine that words are conventional signs of mental states principally thoughts and ideas and that meaning consists in their expression This expression theory of meaning is developed by carrying out the Gricean programme explaining what it is for words to have meaning in terms of speaker meaning and what it is for a speaker to mean something in terms of intention But Grice's own formulations are rejected and alternatives developed The foundations of the expression theory are explored at length and the author develops the theory of thought as a fundamental cognitive phenomenon distinct from belief and desire argues for the thesis that thoughts have parts and identifies ideas or concepts with parts of thoughts This book will appeal to students and professionals interested in the philosophy of language

Where Words Get their Meaning Marianna Bolognesi, 2020-11-15 Words are not just labels for conceptual categories Words construct conceptual categories frame situations and influence behavior Where do they get their meaning This book describes how words acquire their meaning The author argues that mechanisms based on associations pattern detection and feature matching processes explain how words acquire their meaning from experience and from language alike Such mechanisms are summarized by the distributional hypothesis a computational theory of meaning originally applied to word

occurrences only and hereby extended to extra linguistic contexts By arguing in favor of the cognitive foundations of the distributional hypothesis which suggests that words that appear in similar contexts have similar meaning this book offers a theoretical account for word meaning construction and extension in first and second language that bridges empirical findings from cognitive and computer sciences Plain language and illustrations accompany the text making this book accessible to a multidisciplinary academic audience Wittgenstein and Davidson on Language, Thought, and Action Claudine

Verheggen,2017-10-05 Wittgenstein and Davidson are two of the most influential and controversial figures of twentieth century philosophy However whereas Wittgenstein is often regarded as a deflationary philosopher Davidson is considered to be a theory builder and systematic philosopher par excellence Consequently little work has been devoted to comparing their philosophies with each other In this volume of new essays leading scholars show that in fact there is much that the two share By focusing on the similarities between Wittgenstein and Davidson the essays present compelling defences of their views and develop more coherent and convincing approaches than either philosopher was able to propose on his own They show how philosophically fruitful and constructive reflection on Wittgenstein and Davidson continues to be and how relevant the writings of both philosophers are to current debates in philosophy of mind language and action **Oxford Studies in**

Philosophy of Language Ernest Lepore,David Sosa,2022 Philosophy of language has been at the center of philosophical research at least since the start of the 20th century But till now there has been no regular forum for outstanding original work in this area That is what Oxford Studies in Philosophy of Language offers *Gödel, Putnam, and Functionalism* Jeff Buechner,2007-09-21 The first systematic examination of Hilary Putnam s arguments against computational functionalism challenges each of Putnam s main arguments With mind brain identity theories no longer dominant in philosophy of mind in the late 1950s scientific materialists turned to functionalism the view that the identity of any mental state depends on its function in the cognitive system of which it is a part The philosopher Hilary Putnam was one of the primary architects of functionalism and was the first to propose computational functionalism which views the human mind as a computer or an information processor But in the early 1970s Putnam began to have doubts about functionalism and in his masterwork Representation and Reality MIT Press 1988 he advanced four powerful arguments against his own doctrine of computational functionalism In G del Putnam and Functionalism Jeff Buechner systematically examines Putnam s arguments against functionalism and contends that they are unsuccessful Putnam s first argument uses G del s incompleteness theorem to refute the view that there is a computational description of human reasoning and rationality his second the triviality argument demonstrates that any computational description can be attributed to any physical system his third the multirealization argument shows that there are infinitely many computational realizations of an arbitrary intentional state his fourth argument buttresses this assertion by showing that there cannot be local computational reductions because there is no computable partitioning of the infinity of computational realizations of an arbitrary intentional state into a single package or

small set of packages equivalence classes Buechner analyzes these arguments and the important inferential connections among them for example the use of both the G del and triviality arguments in the argument against local computational reductions and argues that none of Putnam s four arguments succeeds in refuting functionalism G del Putnam and Functionalism will inspire renewed discussion of Putnam s influential book and will confirm Representation and Reality as a major work by a major philosopher

Vagueness and Law Geert Keil, Ralf Poscher, 2016-12-01 Vague expressions are omnipresent in natural language As such their use in legal texts is virtually inevitable If a law contains vague terms the question whether it applies to a particular case often lacks a clear answer One of the fundamental pillars of the rule of law is legal certainty The determinacy of the law enables people to use it as a guide and places judges in the position to decide impartially Vagueness poses a threat to these ideals In borderline cases the law seems to be indeterminate and thus incapable of serving its core rule of law value In the philosophy of language vagueness has become one of the hottest topics of the last two decades Linguists and philosophers have investigated what distinguishes soritical vagueness from other kinds of linguistic indeterminacy such as ambiguity generality open texture and family resemblance concepts There is a vast literature that discusses the logical semantic pragmatic and epistemic aspects of these phenomena Legal theory has hitherto paid little attention to the differences between the various kinds of linguistic indeterminacy that are grouped under the heading of vagueness let alone to the various theories that try to account for these phenomena Bringing together leading scholars working on the topic of vagueness in philosophy and in law this book fosters a dialogue between philosophers and legal scholars by examining how philosophers conceive vagueness in law from their theoretical perspective and how legal theorists make use of philosophical theories of vagueness The chapters of the book are organized into three parts The first part addresses the import of different theories of vagueness for the law referring to a wide range of theories from supervaluationist to contextualist and semantic realist accounts in order to address the question of whether the law can learn from engaging with philosophical discussions of vagueness The second part of the book examines different vagueness phenomena The contributions in part 2 suggest that the greater awareness to different vagueness phenomena can make lawyers aware of specific issues and solutions so far overlooked The third part deals with the pragmatic aspects of vagueness in law providing answers to the question of how to deal with vagueness in law and with the professional political moral and ethical issues such vagueness gives rise to

Models of Figurative Language Rachel Giora, 2001-09-01 First published in 2001 Volume 16 Numbers 3 4 This special issue is an attempt to record the state of the art of psycholinguistics research into figurative language There are quite a number of models addressing distinct issues and aiming to solve different problems the mark of a maturing field Indeed not one theory is tailored to solve all the problems Rather each model while aiming at generality also recognizes its limitation Despite specializing in different topics most of the theories presented here have some things in common For one most of them dispense with the literal nonliteral divide proposing instead models that are capable

of handling literal as well as figurative language Some models focus on the role primary meanings play in comprehension others shed light on context effects and some models seem to encompass both in terms of the accumulating effects of constraints whether linguistic or contextual
