Diet for a Hot Planet Anna Lappe, 2010-04-23 Forty years after her mother's work changed the way we eat Anna Lappe's *Diet for a Hot Planet* changed the way we think about food production and global warming Fifty years ago Frances Moore Lappe's *Diet for a Small Planet* sparked a revolution in thinking about the social and environmental impact of what we eat Ten years ago her daughter Anna Lappe controversially picked up the conversation with *Diet for a Hot Planet* examining another hidden cost of our food choices the climate crisis Lappe predicted that food system related greenhouse gas emissions would be catastrophic unless we radically shifted the trends of what we ate and how we produced it She exposed the political interests with a stake in our food system and foresaw the spin food companies would use to avoid system wide reform She visited the pioneering farmers of a future food system where good could outweigh harm demonstrating the potential of sustainable farming She also offered six eternal principles for a climate friendly diet This measured and intelligent call to action is the perfect companion to the fiftieth anniversary edition of *Diet for a Small Planet* like her mother before her Lappe reminds us that food and our perilously large food system is still a powerful access point for solutions to the climate crisis

otherworldly dreamers Danewid theorises these modes of refusal as a utopian worldmaking project which seeks not just better ways of being governed but an end to governance in its entirety In a time where the state remains hegemonic across the Left Right political spectrum Resisting Racial Capitalism calls on us to dream bolder and better in order to un build the world anew Walking the Land Shay Rabineau,2023-01-03 Israel has one of the most extensive and highly developed hiking trail systems of any country in the world Millions of hikers use the trails every year during holiday breaks on mandatory school trips and for recreational hikes Walking the Land offers the first scholarly exploration of this unique trail system Featuring more than ten thousand kilometers of trails marked with hundreds of thousands of colored blazes the trail system crisscrosses Israeli controlled territory from the country s farthest borders to its densest metropolitan areas The thousand kilometer Israel National Trail crosses the country from north to south Hiking trails and the ubiquitous three striped trail blazes appear everywhere in Israeli popular culture they are the subjects of news articles radio programs television shows best selling novels government debates and even national security speeches Yet the trail system is almost completely unknown to the millions of foreign tourists who visit every year and has been largely unstudied by scholars of Israel Walking the Land explores the many ways that Israel s hiking trails are significant to its history national identity and conservation efforts
