opportunities for future research and best managerial practices Regenerating Regional Culture Jane Frank, 2017-11-28
This book explores the significance of the international book town movement and its impact on contemporary society. It examines how book towns have emerged and how their culture and unique characteristics help to explain a steadily growing phenomenon that has enabled peripheral communities around the world to reclaim their economic futures and impact on the cultural sphere as increasingly powerful sites and sources of creativity. *Regenerating Regional Culture* assesses why at a time when the book industry is experiencing a profound transformation, book towns are proliferating in Europe and across the globe. It acknowledges the role of the book as a catalyst for this significant cultural activity and development. The book is shown to be a unique and pivotal item of cultural consumption, a remarkable artefact and more than ever before a springboard for contemporary cultural debate. This work investigates how the reanimation of these down on their luck towns is attracting through a combination of nostalgia, history and cultural heritage, a growing middle class cohort who seek both intellectual stimulation and opportunities for serious leisure and wellbeing. This book will prove to be a useful resource for understanding the impacts of book towns on art, culture and society, while also offering insightful research for those involved in existing or future development of book towns and other community cultural projects. **Pure Food** Paul Collinson, Helen Macbeth, 2023-07-14

The issues surrounding the provision, preparation and development of food products is fundamental to every human being on the planet. Given the scarcity of agricultural land, environmental pollution, climate change and the exponential growth of the world's population, where starvation and obesity are both widespread, it is little wonder that exploring the frontiers of food is now a major focus for researchers and practitioners. This timely Handbook provides a systematic guide to the current state of knowledge on sustainable food. It begins by analyzing the historical development surrounding food production and consumption, then moves on to discuss the current food crisis and challenges, as well as the impacts linked to modern agriculture and food security. Finally, it concludes with a section that examines emerging sustainable food trends and movements, in addition to an analysis of current food science innovations. Developed from specifically commissioned original contributions, the Handbook's inherent multidisciplinary approach paves the way for deeper understanding of all aspects linked to the evolution of food in society, including insights into local food, food and tourism, organic food, indigenous and traditional food, sustainable restaurant practices, consumption patterns and sourcing. This book is essential reading for

students researches and academics interested in the possibilities of sustainable forms of gastronomy and gastronomy's contribution to sustainable development. The title includes a foreword written by Roberto Flore Head Chef at the Nordic Food Lab Copenhagen Denmark.
