contribution to the literature on gendered policing which to date has concentrated almost exclusively on the US and British experience **Policing: Toward an Unknown Future** John Crank, Colleen Kadleck, 2013-12-16 The enclosed papers are the culmination of a project Dr John Crank and Dr Colleen Kadleck carried out assessing issues facing the police into the early 21st century The papers are future oriented in the sense that they anticipate trends visible today Everywhere the contributing scholars found that the organizational concept practice and function of the police were undergoing transition Yet the seeming state level hardening of the police function was ubiquitous Two themes were noteworthy On the one hand in developing or second world countries police face endemic problems of corruption organized crime and drugs Police in response are undergoing centralization and intensification of law enforcement activities In countries with first world economies Canada the United States and Australia contributors discovered trends toward expansion of the police function a trend described by Brodeur as toward high policing It reflects the growing reliance on surveillance for crime control and for the tracking of minority indigenous and immigrant populations in crime prevention efforts The results suggest that governments sometimes encouraged by their citizenry seem increasingly to rely on the police to deal with a broad array of social as well as criminal problems This book was originally published as a special issue of Police Practice and Research

International Perspectives on Police Education and Training Perry Stanislas, 2013-10-30 Training and education constitutes the backbone of a significant amount of police activity and expenditure in developing the most important resources involved in policing work It also involves an array of actors and agencies such as educational institutions which have a long and important relationship with police organizations This book examines the role of education and training in the development of police in the contemporary world Bringing together specialist scholars and practitioners from around the world the book examines training methods in the UK the USA Australia Canada China France Hungary India the Netherlands St Lucia and Sweden The book throws light on important aspects of public service policing and new areas of public and private provision through the lens of training and development It will be of interest to policing scholars and those involved in professional and organizational development worldwide **Police Responses to People with Mental Illnesses** Duncan Chappell, 2014-07-16 According to the World Health Organisation during their lifetime more than one quarter of all

individuals will develop one or more mental or behavioural disorders Given prevalence data like this it is not surprising that wherever they reside on the planet many persons suffering from a mental disorder or as is more commonly termed in popular parlance a mental illness are likely to come into contact with police at some stage in their lives Indeed research conducted in a number of countries suggests that about 10 per cent of all community police work involves some form of interaction with a person with a mental illness From a police perspective these encounters are not only frequent but also often sensitive and challenging Despite the difficulties associated with this important aspect of community policing surprisingly scant attention has been given to the development of empirically tested and established best practice approaches to managing police

interactions with persons with mental illnesses The literature that does exist is principally derived from North American sources although more recent and interesting developments have been reported in Australia and the United Kingdom The principal aim of *Police Responses to People with Mental Illnesses* is to seek to reduce this gap in the literature by providing an international overview of some of the latest research and policy developments in the field and the challenges still to be confronted in many places in overcoming cultural and associated barriers to protecting the rights of the mentally ill This book was originally published as a special issue of *Police Practice and Research An International Journal* **Police Reform from the Bottom Up** Monique Marks, David Sklansky, 2014-04-10 What role can and should police unions and rank and file officers play in driving and shaping police reform Police unions and their members are often viewed as obstructionist and conservative not as change agents But reform efforts are much more likely to succeed when they are supported by the rank and file and line officers have knowledge skills and insights that can be invaluable in promoting reform Efforts to involve police unions and rank and file officers in police reform are less common than they should be but they are increasing and there is a good deal to learn about policing police reform and participatory management from the efforts made to date In this pioneering volume an international cross disciplinary collection of scholars and police unionists address a range of neglected questions both empirical and theoretical about the place of police officers themselves in the process of reform what it has been and what it could be They provide a fresh view of police reform as occurring from the bottom up rather than the top down This book will be highly useful for practitioners and scholars who have a serious interest in the possibilities and limits of police organizational change This book is based on special issues of *Police Practice and Research* and *Policing and Society*
