Sinn Kriterien Die Logischen Grundlagen Kritischer Philosophie Von Platon Bis Wittgenstein Philosophie:

Wittgenstein's Lasting Significance Max Kölbel, Bernhard Weiss, 2004-08-02 Ludwig Wittgenstein 1889 1951 has exerted a more powerful influence on current philosophy than any other twentieth century thinker Twelve contemporary philosophers explore the nature of this influence and why it has proved so enduring Philosophy after Marx Christoph Henning, 2014-04-17 Christoph Henning writes a concise history of misreadings of Marx in the 20th century Focussing on German philosophy from Heidegger to Habermas he also addresses the influence of Rawls and Neopragmatism subsequently scrutinizing a previous history of Marx interpretations that had served as the premises upon which these later works were based Henning sketches a historical trajectory in which a theory of socialist politics enters the fields of economics sociology critical theory and theology before finally overloaded with intellectually dead freight entering into philosophy In so doing he takes a hermeneutic approach to how misreadings in a specific field proliferate into further misreadings across a variety of fields leading to an accumulation of questionable preconceptions With the recent resurgence of interest in Marx Henning's historical recursions make evident where and how academic Anti Marxism had previously got it wrong English translation of Philosophie nach Marx 100 Jahre Marxrezeption und die normative Sozialphilosophie der Gegenwart in der Kritik Transcript Verlag Bielefeld 2005 *Recognition - German Idealism as an Ongoing Challenge* Christian Krijnen, 2013-10-24 There has been an intensive debate in recent years particularly in political philosophy on how the concept of recognition Anerkennung can bring insight into understanding social and political relationships and answering ethical questions Proponents of this philosophy seek to apply German Idealism especially Hegel to the arguments of recognition in order to solve contemporary problems However does the present debate incorporate sufficiently the requirements of the idealist philosophy which it pretends to inherit and update As a new paradigm for philosophy claiming to actualize German idealist philosophy it provokes questions about the foundation of the principle of recognition itself as well as about which philosophical method provides the best means for addressing recognition In *Recognition German Idealism as an Ongoing Challenge* renowned authors address this fascinating and far reaching questions in discussion with Kant Fichte Schelling and Hegel Contributors include Robert Brandom Paul Cobben Simon Critchley Pirmin Stekeler Weithofer Kenneth Westphal Klaus Vieweg Erzs bet R sza Christian Krijnen Heikki Ik heimo Donald Loose Kurt Walter Zeidler Jean Christophe Merle Sasa Josifovic Arthur Kok Emiliano Acosta Limits of Intelligibility Jens Pier, 2022-11-01 The chapters in this volume investigate the question of where and in what sense the bounds of intelligible thought knowledge and speech are to be drawn Is there a way in which we are limited in what we think know and say And if so does this mean that we are constrained that there is something beyond the ken of human intelligibility of which we fall short Or is there another way to think about these limits of intelligibility namely as conditions of our meaning and knowing anything beyond which there is no specifiable thing we cannot do These issues feature prominently in the writings of Kant and Wittgenstein who each engaged with them in unique and striking ways

Their thoughts on the matter remain provocative and stimulating and accordingly the contributions to this volume address the issues surrounding the limits of intelligibility both exegetically and systematically they examine how they figure in Kant's and Wittgenstein's most significant works and put them in touch with contemporary debates that are shaped by their legacy These debates concern inter alia logically and morally alien thought the semantics and philosophy of negation disjunctivism in philosophy of perception and ethics paraconsistent approaches to contradiction and the relation between art literature and philosophy The book is divided into four parts Part I gives a first assessment of the issues Part II examines limits as they feature in Kant Part III as they feature in Wittgenstein and Part IV suggests some ways in which the questions might be reconsidered drawing upon ideas in phenomenology dialecticism metamathematics and the works of other influential authors Limits of Intelligibility provides insight into a theme that is central to the thought of two of the most important figures in modern philosophy as well as to recent metaphysics philosophy of language philosophy of logic epistemology and ethics

Constructive Semantics Christina Weiss, 2019-10-15 This edited book brings together research work in the field of constructive semantics with scholarship on the phenomenological foundations of logic and mathematics It addresses one of the central issues in the epistemology and philosophy of mathematics namely the relationship between phenomenological meaning constitution and constructive semantics Contributing authors explore deep structural connections and fundamental differences between phenomenology and constructivism Papers are drawn from contributions to a prestigious workshop held at the University of Friedrichshafen Readers will discover insight into structural connections between the phenomenological concept of meaning constitution and constructivist concepts of meaning Discussion ranges from more specific conceptualizations in the philosophy of logic and mathematics to more general considerations in epistemology inferential semantics and phenomenology Questions such as a possible phenomenological understanding of the relationship between structural rules and particle rules in dialogical logic are explored Significant aspects of both phenomenology and dialectics and dialectics and constructivism emerge Graduates and researchers of philosophy especially logic as well as scholars of mathematics will all find something of interest in the expert insights presented in this volume

Minimal Verificationism Gordian Haas, 2015-10-16 Verificationism has been a hallmark of logical empiricism According to this principle a sentence is insignificant in a certain sense if its truth value cannot be determined Although logical empiricists strove for decades to develop an adequate principle of verification they failed to resolve its problems This led to a general abandonment of the verificationist project in the early 1960s In the last 50 years this view has received tremendously bad press Today it is mostly regarded as an outdated historical concept Theories that have evolved since the abandonment of verificationism can however help overcome some of its key problems More specifically an adequate criterion of significance can be derived from a combination of modern theories of justification and belief revision along with a formal semantics for counterfactuals In view of these potential improvements the abandonment of verificationism appears premature Half a century following its decline it

might be about time to revisit this disreputable view The author argues in favor of a weak form of verificationism This approach could be referred to as minimal verificationism as it involves a weakening of traditional verificationist principles in various respects while maintaining their core idea

Culture and Dialogue Gerald Cipriani, 2013-07-16 Vol 3 No 1 of Culture and Dialogue is a Special Issue in many ways This issue marks the takeover by a new publisher Because of contractual constraints and practical reasons the decision was made to continue our journey with Cambridge Scholars Publishing whose great enthusiasm foreshadows a bright future for the journal Our words of thanks however must also go to Airiti Press without which the journal would not have seen the light of day We are indebted to Airiti Press for having invested into the launch of a new journal with all the risks entailed and for their dedicated hard work We are most grateful for this The Journal was officially launched in March 2011 and has since produced four issues all of which focusing on a particular facet of dialogical practice within the field of culture be it philosophy art or politics Forthcoming issues will offer platforms to explore how dialogue impacts on the shaping of identity aesthetic meaning and historical significance One issue will also be devoted to how dialogue manifests itself in language This brings us to autumn 2015 after which other pressing themes will no doubt be proposed and treated In whatever case the thread remains the cultural forms of dialogue many of us know how critical ignorance about the nature of the dialogue can be in all fields at all levels Argentinian poet Antonio Porchia once wrote that To be someone is solitude Any self felt genius or world leading mortal will identify with this The solitude at stake is that of the one who fails to link with others or an Other by denying the possibility to relinquish some of him or herself In fact the true someone is never alone the true someone never leads This is the message Culture and Dialogue is striving to convey express or analyse in its various forms across the humanities the arts and the social sciences Besides the Journal has always sought when possible to preserve a certain spirit of writing in addition to academic rigour and creativity a spirit that is undeniably fading in the midst of the publish or perish ethos adopted by advanced techno capitalist systems of education in some parts of the world Vol 3 No 1 is a Special Issue devoted to the theme of religion and dialogue Cosimo Zene of the School of Oriental and African Studies of the University of London kindly accepted our invitation to be the Guest Editor and our words of thanks must first go to him Cosimo has managed to bring together a range of outstanding essays of which the Journal can only be proud To various degrees and in different ways all essays discuss dialogue and religion or show dialogue at work in religious studies We are most grateful to all the authors who generously contributed to this Special Issue and therefore to the life of the Journal in alphabetical order T H Barrett Stephen Chan Jan Peter Hartung S an Hawthorne Catherine Heszer Tullio Lobetti Theodore Proferes and Cosimo Zene

Ideal and Culture of Knowledge in Plato Karl-und-Gertrud-Abel Stiftung. Tagung, 2003 The volume collects the contributions to an international conference held at the University of Frankfurt on the relationship between epistemic practices culture of knowledge and the concept of knowledge ideal of knowledge in Plato For Plato both aspects of knowledge were not only of equal importance he was also well aware of

their interdependence taking into account that no philosopher has yet reached the epistemic level of knowledge His acknowledgement of this interdependence is as the papers of this volume show further counter evidence against the traditional reading that attributes to Plato a two worlds view which tries to keep ordinary belief and philosophical knowledge ontologically distinct The contributions include essays from both ancient philosophers and ancient historians Topics of the essays are e g the conception of education in the Republic the epistemic ascent in the Symposium the knowledge of knowledge in the Charmides the role of perception in the Theaetetus and the sophistic environment of Plato

Dimensions of Personhood Heikki Ikäheimo, Arto Laitinen, 2007 This collection of original articles considers the question What are persons The book aims first of all to clarify the nature of the query and its relation to associated questions such as the nature of the human animal the persistence and unity of persons and other philosophical conditions

Philosophie und Wissenschaft / Philosophy and Science Jürgen Stolzenberg, Fred Rush, 2011-12-23 The prospect for a philosophy of nature is together with that of a new grounding for philosophy a topic of pointed discussion in philosophy after Kant The relation of freedom to nature is here one of the central themes Emerging research in biology chemistry and physics is also taken into account and integrated in a comprehensive theory of the relation of nature to Spirit Volume 8 of the Internationales Jahrbuch des Deutschen Idealismus International Yearbook of German Idealism pursues the multifarious responses of post Kantian philosophy to this problematic Contributors Gideon Freudenthal Michael Friedman Hans Peter Neumann Wolfgang Neuser Konstantin Pollok Sebastian Rand Pirmin Stekeler Weithofer Thomas Sturm Lars Thade Ulrichs Eric Watkins John Zammito Paul Ziche Rachel Zuckert
