

Наследственная изменчивость

Классификация мутаций

Существует несколько классификаций мутаций:

Мутации по месту их возникновения:

Генеративные — возникшие в половых клетках. Они не влияют на признаки данного организма, а проявляются только в следующем поколении.

Соматические — возникающие в соматических клетках. Эти мутации проявляются у данного организма и не передаются потомству при половом размножении (черное пятно на фоне коричневой окраски шерсти у каракулевых овец). Сохранить соматические мутации можно только путем бесполого размножения (прежде всего вегетативного).

Мутации по адаптивному значению:

Полезные — повышающие жизнеспособность особей.

Вредные (большинство возникающих мутаций вредны);

Нейтральные — не влияющие на жизнеспособность особей.
