Sir Arthur Newsholme And State Medicine 1885 1935:

Sir Arthur Newsholme and State Medicine, 1885-1935 John M. Eyler, 2002-08-15 The half century between 1885 and 1935 witnessed an unprecedented expansion of preventive and therapeutic services offered by the state through its local authorities Behind the expansion in public services were also profound changes in attitudes toward poverty and dependency and toward the political and cultural significance of health changes in social policy and administration and changes in the understanding of the causes of disease This book examines this time of change through the ideas and experiences of one prominent participant Sir Arthur Newsholme Professor Eyler draws particular attention to Newsholme's role in constructing a highly successful local health programme his tenure as the Medical Officer of the Local Government Board in Whitehall where he launched some of its boldest programmes including national health insurance his post retirement studies of international health systems and his statistical and epidemiological studies and their connection to his policy recommendations

The British Welfare Revolution, 1906-14 John Cooper, 2017-10-05 The Welfare Revolution of the early 20th century did not start with Clement Attlee's Labour governments of 1945 to 1951 but had its origins in the Liberal government of forty years earlier The British Welfare Revolution 1906-14 offers a fresh perspective on the social reforms introduced by these Liberal governments in the years 1906 to 1914 Reforms conceived during this time created the foundations of the Welfare State and transformed modern Britain they touched every major area of social policy from school meals to pensions the minimum wage to the health service Cooper uses an innovative approach the concept of the Counter Elite to explain the emergence of the New Liberalism and examines the research that was carried out to devise ways to meet each specific social problem facing Britain in the early 20th century For example a group of businessmen including Booth and Rowntree invented the poverty survey to pinpoint those living below the poverty line and encouraged a new generation of sociologists This comprehensive single volume survey presents a new critical angle on the origins of the British welfare state and is an original analysis of the reforms and the leading personalities of the Liberal governments from the late Edwardian period to the advent of the First World War

Modern Flu Michael Bresalier, 2023-09-09 Ninety years after the discovery of human influenza virus Modern Flu traces the history of this breakthrough and its implications for understanding and controlling influenza ever since Examining how influenza came to be defined as a viral disease in the first half of the twentieth century it argues that influenza's viral identity did not suddenly appear with the discovery of the first human

influenza virus in 1933 Instead it was rooted in the development of medical virus research and virological ways of knowing that grew out of a half century of changes and innovations in medical science that were shaped through two influenza pandemics two world wars and by state sponsored programs to scientifically modernise British medicine A series of transformations in which virological ideas and practices were aligned with and incorporated into medicine and public health underpinned the viralisation of influenza in the 1930s and 1940s Collaboration conflict and exchange between researchers medical professionals and governmental bodies lay at the heart of this process This book is a history of how virus researchers clinicians and epidemiologists medical scientific and public health bodies and institutions and philanthropies in Britain the USA and beyond forged a new medical consensus on the identity and nature of influenza Shedding new light on the modern history of influenza this book is a timely account of how ways of knowing and controlling this intractable epidemic disease became viral

Shifting Boundaries of Public Health Susan Gross Solomon, Lion Murard, Patrick Zylberman, 2008 European public health was a playing field for deeply contradictory impulses throughout the twentieth century In the 1920s international agencies were established with great fanfare and postwar optimism to serve as the watchtower of health the world over Within less than a decade local level institutions began to emerge as seats of innovation initiative and expertise But there was continual counterpressure from nation states that jealously guarded their policymaking prerogatives in the face of the push for cross national standardization and the emergence of original initiatives from below In contrast to histories of twentieth century public health that focus exclusively on the local national or international levels *Shifting Boundaries* explores the connections or zones of contact between the three levels The interpretive essays written by distinguished historians of public health and medicine focus on four topics the oscillation between governmental and nongovernmental agencies as sites of responsibility for addressing public health problems the harmonization of nation states agendas with those of international agencies the development by public health experts of knowledge that is both placeless and respectful of place and the transportability of model solutions across borders The volume breaks new ground in its treatment of public health as a political endeavor by highlighting strategies to prevent or alleviate disease as a matter not simply of medical techniques but political values and commitments Contributors Peter Baldwin Iris Borowy James A Gillespie Graham Mooney Lion Murard Dorothy Porter Sabine Schleiermacher Susan Gross Solomon Paul Weindling and Patrick Zylberman Susan Gross Solomon is professor of political science at the University of Toronto Lion Murard and Patrick Zylberman are both senior researchers at CERMES Centre de Recherche M decine Sciences Sant et Soci t CNRS EHESS INSERM Paris

When the Air Became Important Janet Greenlees, 2019-03-15 In *When the Air Became Important* medical historian Janet Greenlees examines the working environments of the heartlands of the British and American cotton textile industries from the nineteenth to the late twentieth centuries Greenlees contends that the air quality

within these pioneering workplaces was a key contributor to the health of the wider communities of which they were a part. Such enclosed environments where large numbers of people labored in close quarters were ideal settings for the rapid spread of diseases including tuberculosis, bronchitis, and pneumonia. When workers left the factories for home, these diseases were transmitted throughout the local population, yet operatives also brought diseases into the factory. Other aerial hazards common to both the community and workplace included poor ventilation and noise. Emphasizing the importance of the peculiarities of place as well as employers' balance of workers' health against manufacturing needs, Greenlee's pioneering book sheds light on the roots of contemporary environmentalism and occupational health reform. Her work highlights the complicated relationships among local business, local and national politics of health, and community priorities. *Governing Systems* Tom Crook, 2016-06-21

When and how did public health become modern? In *Governing Systems*, Tom Crook offers a fresh answer to this question through an examination of Victorian and Edwardian England, long considered one of the critical birthplaces of modern public health. This birth, Crook argues, should be located not in the rise of professional expertise or a centralized bureaucratic state but in the contested formation and functioning of multiple systems, both human and material, administrative and technological. Theoretically ambitious but empirically grounded, *Governing Systems* will be of interest to historians of modern public health and modern Britain as well as to anyone interested in the complex gestation of the governmental dimensions of modernity. *The working class in mid-twentieth-century England* Ben Jones, 2018-09-30

This book maps how working class life was transformed in England in the middle years of the twentieth century. National trends in employment, welfare, and living standards are illuminated via a focus on Brighton, providing valuable new perspectives of class and community formation. Based on fresh archival research, life histories, and contemporary social surveys, the book historicises important cultural and community studies which moulded popular perceptions of class and social change in the post-war period. It shows how council housing, slum clearance, and demographic trends impacted on working class families and communities. While suburbanisation transformed home life, leisure, and patterns of association, there were important continuities in terms of material poverty, social networks, and cultural practices. This book will be essential reading for academics and students researching modern and contemporary social and cultural history, sociology, cultural studies, and human geography.
