*Encyclopedia of Educational Reform and Dissent* Thomas C. Hunt, 2010-01-20 The history of American education is replete with educational reform and to a lesser extent educational dissent Consider the present you have various forms of privatization school choice the No Child Left Behind act home schooling value added accountability alternative teacher preparation programs on line instruction etc This range of activity is not exceptional For instance consider the past progressive education open education the junior high school the middle school Life Adjustment education career education vocational education the comprehensive high school school to work year round schooling behavioral objectives proficiency exams high stakes testing whole language learning packages and self paced instruction modular scheduling site based management all presented as the way to reform American schools at least in part Then you have the reformers themselves such as John Dewey George Counts Herbert Kohl John Holt Charles Silberman Admiral Hyman Rickover James Bryant Conant all the way back to Horace Mann himself Dissenters and dissenting movements while not as numerous and certainly not as well known in educational circles count the various faith based schools and individuals such as Archbishop Hughes of New York Clearly this is an area rich in ideas rife with controversy and vital in its outcome for individuals and the nation as a whole And yet strangely enough there exists no major encyclopedia bringing the varied strands together in one place as a ready reference for scholars teachers school administrators and students studying to enter the educational profession This two volume work is intended to be that authoritative resource Key themes and topics include biographies of reformers and dissenters theoretical and ideological

perspectives key programs and legislation judicial verdicts impacting educational change in America the politics and processes of educational reform and policy making dissent and resistance to reform technology s impact on educational reform A Reader s Guide in the front matter groups entries around such themes to help readers find related entries more easily **Data Book of Social Studies Materials and Resources** ,1989 **The Wrong Direction** Richard S.

Hancock,2005 Is our public education system headed in the wrong direction Richard Hancock asks us not only to scrutinize education but to consider crucial pragmatic revisions He looks hard at some of the negative trends which have become entrenched including grade inflation and social promotion and a variety of biases which undermine the integrity of the system He suggests workable solutions The book addresses a wide audience students parents educators and administrators in the public system and realms of higher learning government members professionals service and business people Hancock also refers to others who are striving to bring the plight of the system to the attention of the public and the educational policy makers We cannot continue to stifle the brilliant condescend to special interest groups and ignore the average students cheating them all of pride in honest achievement Perhaps it is time to encourage and honour excellence This is at once a warning and a voice encouraging us to act on behalf of our children and our nation *Handbook of Education Policy Research* Gary Sykes,Barbara Schneider,David N. Plank,2012-09-10 Co published by Routledge for the American Educational Research Association AERA Educational policy continues to be of major concern Policy debates about economic growth and national competitiveness for example commonly focus on the importance of human capital and a highly educated workforce Defining the theoretical boundaries and methodological approaches of education policy research are the two primary themes of this comprehensive AERA sponsored Handbook Organized into seven sections the Handbook focuses on 1 disciplinary foundations of educational policy 2 methodological perspectives 3 the policy process 4 resources management and organization 5 teaching and learning policy 6 actors and institutions and 7 education access and differentiation Drawing from multiple disciplines the Handbook s over one hundred authors address three central questions What policy issues and questions have oriented current policy research What research strategies and methods have proven most fruitful And what issues questions and methods will drive future policy research Topics such as early childhood education school choice access to higher education teacher accountability and testing and measurement cut across the 63 chapters in the volume The politics surrounding these and other issues are objectively analyzed by authors and commentators Each of the seven sections concludes with two commentaries by leading scholars in the field The first considers the current state of policy design and the second addresses the current state of policy research This book is appropriate for scholars and graduate students working in the field of education policy and for the growing number of academic government and think tank researchers engaged in policy research For more information on the American Educational Research Association please visit <http://www.aera.net> *Economics of Education* Dominic J. Brewer,Patrick J. McEwan,2010-01-26 A collection of short stand alone

chapters divided into five sections including overview of the field private and social returns to human capital investments production costs and financing of education teachers and teacher labor markets and education markets choice and incentives The collection provides international perspectives that describe the origins of these subjects their major issues and proponents their landmark studies and opportunities for future research The 70 contributors are each well regarded economists whose research has advanced the topic on which they write and this book fulfills an undersupplied niche for a text in the economics of education The chapters come from the acclaimed International Encyclopedia of Education 3e 2010 edited by Eva Baker Barry McGaw and Penelope Peterson The Encyclopedia contains over 1 350 articles in 24 sections that stretch from educational philosophies and technologies to measurement leadership and national systems of education This single volume textbook presents a cohesive view of this increasingly important area of economics Superb contributions from well regarded economists convey unique and useful perspectives Chapters contain an extensive bibliography and further readings to enable interested researchers to extend their knowledge into each specific topic

**Bridging the Achievement Gap** John E. Chubb, Tom

Loveless, 2004-05-13 The achievement gap between white students and African American and Hispanic students has been debated by scholars and lamented by policymakers since it was first documented in 1966 The average black or Hispanic secondary school student currently achieves at about the same level as the average white student in the lowest quartile of white achievement Black and Hispanic students are much less likely than white students to graduate from high school acquire a college or advanced degree or earn a middle class living They are also much more likely than whites to suffer social problems that often accompany low income While educators have gained an understanding of the causes and effects of the education achievement gap they have been less successful in finding ways to eliminate it until now This book provides for the first time in one place evidence that the achievement gap can be bridged A variety of schools and school reforms are boosting the achievement of black and Hispanic students to levels nearing those of whites Bridging the Achievement Gap brings together the findings of renowned education scholars who show how various states school districts and individual schools have lifted the achievement levels of poor and minority students The most promising strategies include focusing on core academic skills reducing class size enrolling students in more challenging courses administering annual achievement assessment tests creating schools with a culture of competition and success and offering vouchers in big city school districts While implementing new educational programs on a large scale is fraught with difficulties these successful reform efforts offer what could be the start of widespread effective solutions for bridging the achievement gap

**Fix Schools First** Jack

E. Bowsher, 2001 An educator working with big corporations Bowsher argues that schools damage children that poverty minorities and low parental involvement are the result rather than the cause of poor student learning that appropriate responsibilities need to be established for teachers and administrators and
