Smoking In Adolescence:

Smoking in Adolescence Barbara Lloyd, Kevin Lucas, 2014-01-14 What factors influence adolescents to take up smoking Why do more girls smoke than boys In contrast to medical orthodoxy Smoking in Adolescence looks at smoking from the adolescents own points of view What emerges is that regular smokers are seen as fun loving and nonconformist cigarettes are a passport to a fashionable popular and hard identity Young people create and are influenced by complex images of smokers and nonsmokers Barbara Lloyd and Kevin Lucas explore the psychological dimensions such as social environment family peers stress and coping body image mood and pleasure They suggest how anti smoking interventions should be re evaluated to take account of this new evidence throughout the school curriculum Smoking in Adolescence will be of practical interest to teachers youth workers health professionals and parents as well as students of psychology

Smoking and Adolescence Mazyanga Lucy Mazaba, 2016 Smoking cigarettes starts during adolescence Some adolescents may stop smoking cigarettes having taken it as an experiment during adolescence but others may continue smoking into adulthood Most adults who smoke started smoking during the adolescence stage and may have been already addicted to nicotine before the age of eighteen resulting in long term health consequences This book compiles and documents smoking epidemiology and correlates of smoking in adolescents in various regions of the world It aims to provide critical information that relates to the magnitude of the problem and who is affected in order for strategies to be identified and implemented The issue is a concern of public health since smoking affects people not only at the time the smoking habit begins but because it has an influence on them for the rest of an individual s life
