The Immunoglobulin A System

RD Boyd

The Immunoglobulin A System:

The Immunoglobulin a System Jiri Mestecky, 2013-11-11 The International Symposium on the Immunoglobulin A System was organized in observance of the twenty fifth anniversary of the School of Dentistry of the University of Alabama in Birmingham. Immunoglobulin A was chosen as the subject of the Symposium because of its broad scope in relation to all biologic sciences as well as for its particular relevance to prevention of the most common human disease dental caries. More than 500 scientists from 13 countries met in Birmingham, Alabama to review critically past and current research on IgA and to outline goals for integrating future investigations of the many facets of the IgA system. It is our pleasure to express sincere appreciation to the following whose efforts made the Symposium possible: Dr. Sidney B. Finn, Chairman and all members of the Twenty fifth Anniversary Planning Committee for their advice and assistance; Dr. Charles A. McCallum, Dean of the School of Dentistry for his enthusiastic approval and support; Dr. Frederick W. Kraus, Symposium Chairman for the countless hours of meticulous planning that ensured the smooth execution of the Symposium; Ms. Tonia C. Maddox whose unstinting dedication was indispensable to the organizational success of the meeting; to those who assisted with the transcription of manuscripts and discussions: Ms. Shirley Snow, Ms. Jan Allen, Ms. Janice Buchanan, Ms. Joy Fisher, Ms. Pam Honeycutt, Ms. Mary Huckabee, Ms. Charlotte Hughes, Mr. Stephen Miles, Ms. The Biological Role of the Immunoglobulin E System Kimishige Ishizaka, Delbert H. Dayton, 1974 *The Biological Role of the Immunoglobulin E System* National Institute of Child Health and Human Development (U.S.), 1974 *Dental Research in the United States and Other Countries*, 1975 A catalog of dental research projects sponsored by federal and non federal organizations Code of Federal Regulations, 1996 Schalm's Veterinary Hematology Douglas J. Weiss, K. Jane Wardrop, 2011-07-26 The long awaited Sixth Edition of Schalm's Veterinary Hematology has been revised and reorganized to increase accessibility and cohesiveness of the text. Topics are grouped within established disciplines in hematology and outlines are now included at the beginning of each chapter. The book features new sections on Hematotoxicity and Quality Control and Laboratory Techniques and includes expanded sections on Laboratory Animal Hematology, Species Specific Hematology and Hematologic Neoplasia. With in depth coverage on all aspects of the field, this comprehensive reference is an essential purchase for veterinary clinical hematologists, internists and students. **Mucosal Immune Defense: Immunoglobulin A** Charlotte S. Kaetzel, 2007-10-17 This key work in the field draws on a broad spectrum of molecular biologic, biochemical and immunogenetic approaches in combination with human and murine in vitro cell culture and in vivo model systems to address questions in mucosal immunity. Humans produce more immunoglobulin A (IgA) than all other antibody isotypes combined. This book is designed to serve as a concise reference of the present knowledge of the biology of IgA. **Suppressor Cells and Their Factors** Randall S. Krakauer, 2018-01-18 It has only been a short time since the existence of suppressor cells was demonstrated yet in this period of time a great deal of information has been compiled concerning their basic science and their functions or disordered functions in human disease.

This volume is an attempt to clarify the immune mechanisms through which these cells act their normal functions and how their functions are disordered in certain disease states In this volume some rational approaches are proposed to therapy of diseases perceived at least partially due to disordered immune regulation Particular focus is on the recently emerging field of soluble suppressor factors as a means of providing adoptive immunotherapy in certain situations I hope that future work in this field will justify the confidence in this approach *Immunochemistry* Vanoss,1994-08-24 This work offers comprehensive coverage of the chemical and physicochemical aspects of immunological interactions as well as the molecules and moieties involved in these interactions It covers in detail the Ag Ab interaction including attraction at a distance between epitope and paratope College or university bookstores may order five or more copies at a special student price available upon request *Dental Research in the United States, Canada and Great Britain: Fiscal Year 1973* ,1975
