The Incas And The Aztecs A Story Of Genocide:

Lemkin on Genocide Raphael Lemkin, 2012-01-01 Providing an annotated commentary on two unpublished manuscripts written by international law and genocide scholar Raphael Lemkin Steven L Jacobs offers a critical introduction to the father of genocide studies Lemkin coined the term genocide and was the motivating force behind the 1948 United Nations Convention on the Punishment and Prevention of the Crime of Genocide The materials collected here give readers further insight into this singularly courageous man and the issue which consumed him in the aftermath of the Second World War It is a welcome addition to the library of genocide and Holocaust Studies scholars and students alike **The Origins of**

Genocide Dominik J. Schaller, Jürgen Zimmerer, 2013-09-13 This year the United Nations celebrated the Convention on the Prevention and Punishment of the Crime of Genocide adopted in December 1948 It is time to recognize the man behind this landmark in international law At the beginning were a few words New conceptions require new terms By genocide we mean the destruction of a nation or of an ethnic group Rarely in history have paradigmatic changes in scholarship been brought about with such few words Putting the quintessential crime of modernity in only one sentence Raphael Lemkin 1900 1959 the Polish Jewish specialist in international law not only summarized the horrors of the National Socialist Crimes which were still underway when he coined the term genocide in 1944 but also influenced international law As the founding figure of the UN Genocide Convention Lemkin is finally getting the respect he deserves Less known is his contribution to historical scholarship on genocide Until his death Lemkin was working on a broad study on genocides in the history of humankind Unfortunately he did not manage to publish it The contributions in this book offer for the first time a critical assessment not only of his influence on international law but also on historical analysis of mass murders showing the close connection between both This book was published as a special issue of the Journal of Genocide Research Genocide by Any Other Name... Is Still Genocide N. Nkosi Mundari, 2012-10 **The Great Big Book of Horrible Things** Matthew

White, 2011-10-25 A compulsively readable and utterly original account of world history from an atrocitologist's point of view Evangelists of human progress meet their opposite in Matthew White's epic examination of history's one hundred most violent events or in White's piquant phrasing the numbers that people want to argue about Reaching back to 480 BCE's second Persian War White moves chronologically through history to this century's war in the Congo and devotes chapters to each event where he surrounds hard facts time and place and succinct takeaways who usually gets the blame with lively military social and political histories With the eye of a seasoned statistician White assigns each entry a ranking based on body count and in doing so he gives voice to the suffering of ordinary people that inexorably has defined every historical epoch By turns droll insightful matter of fact and ultimately sympathetic to those who died The Great Big Book of Horrible Things gives readers a chance to reach their own conclusions while offering a stark reminder of the darkness of the human heart **The Holocaust and Historical Methodology** Dan Stone, 2012 This book is timely and necessary and often

extremely challenging It brings together an impressive cast of scholars spanning several academic generations Anyone interested in writing about the Holocaust should read this book and consider the implications of what is written here for their own work There seems to me little doubt that Holocaust history writing stands at something of a cross roads and the ways forward that this volume points to are extremely thought provoking Tom Lawson University of Winchester **Critical**

Thinking Using Primary Sources in U.S. History Wendy S. Wilson, Gerald H. Herman, 2000-08 Labor's Story in the United States Philip Yale Nicholson, 2004 In this the first broad historical overview of labor in the United States in twenty years Philip Nicholson examines anew the questions the villains the heroes and the issues of work in America Unlike recent books that have covered labor in the twentieth century Labor's Story in the United States looks at the broad landscape of labor since before the Revolution In clear unpretentious language Philip Yale Nicholson considers American labor history from the perspective of institutions and people the rise of unions the struggles over slavery wages and child labor public and private responses to union organizing Throughout the book focuses on the integral relationship between the strength of labor and the growth of democracy painting a vivid picture of the strength of labor movements and how they helped make the United States what it is today Labor's Story in the United States will become an indispensable source for scholars and students Author note Philip Yale Nicholson is Professor of History at Nassau Community College and Adjunct Professor at the Cornell University School of Industrial and Labor Relations Long Island Extension He is the author of Who Do We Think We Are Race and Nation in the Modern World **The Avatar of 1786: Decolonizing the Penang Story** Ahmad Murad Merican, 2023-10-11 There must be a closure to the history of Pulau Pinang and Kedah There was no 1786 treaty no agreement no document no signatories The narrative continues independent of each other representing an uncomfortable conscience glancing at each as two separate polities of Penang and Kedah socially and intellectually structured by the year 1786 This book makes a strange revisit to pretension of a fact event And it counters the terra nullius doctrine It also establishes that the lex loci was the Adat Temenggong customary law modified by the Qanun laws of Kedah Malay collective memory maintains that Pulau Pinang is integral to the Kedah Sultanate The island has law order and society before the presence of the Europeans not a band of natives and fishermen as stereotyped by the colonial narrative even in the colonial courts The Malays in Pulau Pinang in recent decades have become beggars to their own history This book contests that history through moral and legal arguments as well as raising the themes and issues of representation and redemption

Why the West Can't Win Fadi Lama, 2023-05-01 Geopolitical upheaval has gripped the world since collapse of the Soviet Union During the 1990s the West focused on eliminating the resurgence of Russia as a great power This led to the assimilation of Warsaw Pact countries into NATO two Chechen wars and political systems in the Central Asian republics aligned with the West Russia's economic destruction was managed by the Harvard boys shock therapy which left Russian resources in the control of a few oligarchs aligned with the West By the end of the 1990s Russia was a weak bankrupt

country of marginalized influence in the world Then the West's focus turned to China as a potential challenger to western global hegemony It was thought to suffice to control global energy resources and sea lanes to China to prevent China from challenging western global hegemony Hence the first two decades of the millennium were focused on controlling West Asia and North Africa's energy resources For most the collapse of the Soviet Union in 1991 signaled the victory of the self-denominated Free World Why the West Can't Win however addresses how events in the three following decades signal the end of a millennium of West European expansionism a plundering and oppression initially labeled Crusades when the popes embodied political power morphing into colonialism then to the Free World when colonialism went out of fashion post World War II and at last to the International Community after the collapse of the Soviet Union This book's geopolitical analysis includes a historical overview an understanding of the financial systems established at the Bretton Woods conference that continue dominating the global economy how they are used as a powerful geopolitical instrument an economic analysis based on real goods production global energy dynamics alliances and strategies of key global players It addresses the emerging division of the world into two geopolitical groups Western Europe North America Australia New Zealand and Africa Asia and Latin America The current global geopolitical clash is in essence a struggle between the colonial powers wishing to preserve the Bretton Woods system that allows siphoning wealth of nations and sovereign nations striving for independence and an end to a millennium of oppression This work compares the geopolitical forces since the turn of the millennium with a view to providing insight into their relative strengths and the likely outcome of this struggle
