[The Eloquence of Effort](#) ,2017-11-28 The contents of *The Eloquence of Effort* Beware the Path of Least Resistance are deeply moored in the principles of Entropy to wit the tendency of all things events to spontaneously degenerate into chaos unless of course there is an infusion of human energy It is a universal law chaos is spontaneous solutions demand effort Have you ever wondered why things naturally break up breakdown degenerate depreciate or simply fall apart Why is Alzheimer's Disease more prevalent among the lesser educated Why is physical exercise a vital component to a healthier lifespan Consider two cars an old and a new abandoned under similar conditions Revisited a 100 years later the new would deteriorate while the old would disintegrate into untraceable dust But why not the reverse As the new car aged into a rusted rattle trap the old retrogressed into a spanking new car Just the way the universe operates you exclaim Answers to these questions reside in the forces governing Second Law of Thermodynamics sometimes referred to as the Law of Entropy To prevent being submerged under an Entropic tsunami of destruction one must apply personal effort Failure to do

so can only result in catastrophe Over 700 years ago the concept was succinctly captured by the polymath Leonardo da Vinci He wrote that God sells us all things at the price of labor Arguing that dreams are only achievable through sustained effort the book relies heavily on biographical philosophical economic religious historical and scientific data Accordingly work is the mission the multiple rewards are the byproducts More significantly the pleasure resides in the effort not the outcome Against the dark backdrop of malignancies inflicted on society by unrepentant leeches the benefits of unstinting diligence are sharply focused The reader is nudged into a higher plane of reality namely purposeful effort is rewarding Hence regardless of the end result effort is never wasted Conversely indolence is the bane of progress the root cause of socio economic crimes and social chaos Indeed corruption in all its diabolical forms is nothing but laziness masquerading as diligence Analysis of biographical data sustains the thesis that hard work extends life indolence shortens it Moreover indolence in all its fiendish forms is causally related to personal chaos The terminally lazy degenerate Pablo Escobar validates this principle when he prophetically asserted that no drug dealer ever died of old age He was right at age 44 he was slaughtered The persuasiveness of the arguments is supported by a wealth of references Together they form the final authority they lend credence to the arguments provided *Splendid Vision, Unswerving Purpose* Aeronautical Systems Center (U.S.). frequent encounters with an airplane the Douglas DC 3 aka the C 47 Skytrain or Dakota of World War II fame For a young boy living in a remote jungle community the aircraft reached the proportions of a romantic icon as the essential lifeline to a bigger world for him the beginning of a special bond In 1957 his family left the island and all its residual wreckage of World War II and he attended college in The Hague After graduation he started a career as a corporate executive and met the aircraft again during business trips to the Americas His childhood passion for the Dakota flared up anew and the fascination pulled like a magnet As if predestined or maybe just looking for an excuse to come closer he began a business to salvage and convert Dakota parts which meant first of all finding them As the demand for these war relic parts and cockpits soared he began to travel the world to track down surplus crashed or derelict Dakotas He ventured deeper and deeper into remote mountains jungles savannas and the seas where the planes are found usually as ghostly wrecks but sometimes still in full commercial operation In hunting the mythical Dakota he often encountered intimidating or dicey situations in countries plagued by wars or revolts others by arms and narcotics trafficking warlords and conmen The stories of these expeditions take the reader to some of the remotest spots in the world but once there one is often greeted by the comfort of what was once the West's apex in transportation however now haunted by the courageous airmen of the past
