The Marxian Revolutionary Idea:

The Marxian Revolutionary Idea Robert C. Tucker, 1970 **The Marxian Revolutionary Idea** Robert Charles Tucker, 1970 The Formation of the Marxian Revolutionary Idea Eric Voegelin, 1950 **The Revolutionary Ideas of Karl Marx** Alex Callinicos, 2012-01-31 An accessible introduction to the author of Capital and coauthor of The Communist Manifesto with a focus on his relevance in today's world Few thinkers have been declared irrelevant and out of date with such frequency as Karl Marx Hardly a decade has gone by since his death in which establishment critics have not announced the death of his theory And yet despite their best efforts to bury him Marx's specter continues to haunt his detractors more than a century after his passing As the boom and bust cycle of global capitalism continues to widen inequality around the world a new generation is discovering that the problems Marx addressed in his time are remarkably similar to those of our own In this engaging and accessible introduction Alex Callinicos demonstrates that Marx's ideas hold an enduring relevance for today's activists fighting against poverty oppression environmental destruction and the numerous other injustices of the capitalist system The Marxian revolutionary idea, 1969 **Revolution** Carl Joachim Friedrich, Professor C E Black of Princeton University called this a valuable contribution to our understanding of the revolutionary movements that are now a worldwide phenomenon It includes thoughtful essays on many varieties of revolution considered in the light both of past developments and future prospects The twentieth century was an age of revolution Over many areas of the world the two great ideologies of nationalism and communism spawned violent upheavals often differing in form but aiming at the transformation of the existing order by means of coups d'etat revolutions and wars of national liberation Eleven distinguished political scientists and policy theorists offer a penetrating analysis of the theoretical and substantive aspects of revolution Their scholarly lucid and well balanced essays explore the revolutionary theories and experience of several centuries and apply them to the most crucial problem of this century Carl J Friedrich argues that it is the failure of government which is at the core of the political revolution and shows that constitutional regimes that have allowed little revolutions promoting gradual political and social change have been singularly free of revolutionary upheaval Presenting the thinking of some of the best minds of the 20th century this volume offers important guideposts for the future study of the etiology of revolutions Here are not mere speculative and historical distillations but new insights and conclusions regarding the origin purpose and impact of revolution on the world of today and tomorrow An indispensable work for every student and scholar of comparative politics international relations and the history and theory of Communism it will also be welcomed by the statesman and the educated layman who want to probe the causes of the historical upheavals of our time Carl J Friedrich was Eaton Professor of the Science of Government Harvard University During World War II he helped to found the School of Overseas Administration at Harvard to train officers for work in military government abroad and he was its Director from 1943 1946 He was Professor of Political Science at the University of Heidelberg from 1956 to 1966 where he founded and helped to

develop the Institut für Politische Wissenschaft He served as President of the American Political Science Association in 1962 the International Political Science Association from 1967 1970 and the Institut international de philosophie politique in 1969

Philosophy and Myth in Karl Marx ,2001-01-01 In Karl Marx's early writing first made available many years after his death his economic interpretation of history and his concept of communism were set in a comprehensive philosophical framework Marx's main preoccupation at this time was with man estranged from himself in an alienated world a subjective almost religious theme Taking full account of these earlier writings Robert Tucker critiques and reinterprets Marx's thought He shows how its origins can be located in earlier German philosophers in particular Kant Hegel and Feuerbach Reconstructing the genesis of Marxism in its founder's own mind he clarifies Marx's mystifying contention that Marxism represented Hegelianism turned on its head He then presents a new interpretation based on close textual analysis of the relation between Marx's early philosophical system and the subsequent materialist conception of history as expounded in the later and best known writings of Marx and Engels Against this background Tucker presents *Das Kapital* as a work belonging to the post Hegelian mythical development of Germany philosophy Considering in turn the genesis of Marxism and the underlying continuity of his thought from the early writings to *Das Kapital* Tucker shows the theme of alienation is central throughout In the years since the book was first written comments and criticism have encouraged Tucker to change his position somewhat This is explained in a new introduction that goes beyond the interpretative enterprise of the rest of the book to assess Marx in relation to contemporary concerns first it presents a critique of Marx's treatment of alienation and then it comments on the moot problem of the continuing relevance of his social and economic thought On the latter point his views have matured and altered during the intervening years and he now finds the economic and social aspects of Marx's thought considerably more relevant than he did before

Revolution Carl Friedrich,2017-09-08 Professor C E Black of Princeton University called this a valuable contribution to our understanding of the revolutionary movements that are now a worldwide phenomenon It includes thoughtful essays on many varieties of revolution considered in the light both of past developments and future prospects The twentieth century was an age of revolution Over many areas of the world the two great ideologies of nationalism and communism spawned violent upheavals often differing in form but aiming at the transformation of the existing order by means of coups d'etat revolutions and wars of national liberation Eleven distinguished political scientists and policy theorists offer a penetrating analysis of the theoretical and substantive aspects of revolution Their scholarly lucid and well balanced essays explore the revolutionary theories and experience of several centuries and apply them to the most crucial problem of this century Carl J Friedrich argues that it is the failure of government which is at the core of the political revolution and shows that constitutional regimes that have allowed little revolutions promoting gradual political and social change have been singularly free of revolutionary upheaval Presenting the thinking of some of the best minds of the 20th century this volume offers important guideposts for the future study of the etiology of revolutions

Here are not mere speculative and historical distillations but new insights and conclusions regarding the origin purpose and impact of revolution on the world of today and tomorrow An indispensable work for every student and scholar of comparative politics international relations and the history and theory of Communism it will also be welcomed by the statesman and the educated layman who want to probe the causes of the historical upheavals of our time *Reinterrogating the Classical Marxist Discourses of Revolutionary Democracy* Soma Marik,2008 **The Revolutionary Idea in France, 1789-1871**
