direction of becoming a socially constructive organism But many are critical of this point of view Why should such a positive direction be observed only in humans Isn't this just pure optimism So quite hesitantly because I have to draw on the work and thinking of others rather than on my own experience I should like to try to set this directional tendency in a much broader context I shall draw on my general reading in the field of science but I should like to mention a special indebtedness to the work of Lancelot Whyte in *The Universe of Experience* Harper and Row 1974 the last book he wrote before his death Though the book has flaws in my judgment this historian has some thought provoking themes to advance I have learned from many others as well *The Divine Wisdom as Revealed by the Methods of Christ and of the Spirit, Manifesting the Harmony and Unity in Nature, Man & the Bible* John Coutts, 1907 **Mysticism in Judaism, Christianity, and Islam** Ori Z. Soltes, 2009 Throughout the ages and across religious traditions people have yearned to personally experience God and deeply connect with the Creator In *Mysticism in Judaism Christianity and Islam* Ori Z Soltes traces the sweep of mysticism this search for oneness with God throughout the three Abrahamic traditions This unique comparative overview begins with a definition of mysticism and a discussion of its place within religion as a whole Soltes then explores the history of mysticism from Biblical times through the present day highlighting the emergence of mysticism within the three traditions and how beliefs and practices converge and diverge over time The final chapters discuss the growing interest in mysticism today through practices such as Kabbalah and how people publicly express their private encounters with God through art literature and other modern media
