Audiobooks, Literature, and Sound Studies Matthew Rubery, 2011-05-09 This is the first scholarly
work to examine the cultural significance of the talking book since the invention of the phonograph in 1877 the earliest
machine to enable the reproduction of the human voice Recent advances in sound technology make this an opportune
moment to reflect on the evolution of our reading practices since this remarkable invention Some questions addressed by the
collection include How does auditory literature adapt printed texts What skills in close listening are necessary for its
reception What are the social consequences of new listening technologies In sum the essays gathered together by this
collection explore the extent to which the audiobook enables us not just to hear literature but to hear it in new ways Bringing
together a set of reflections on the enrichments and impoverishments of the reading experience brought about by
developments in sound technology this collection spans the earliest adaptations of printed texts into sound by Charles
Dickens Thomas Hardy and other novelists from the late nineteenth century to recordings by contemporary figures such as
Toni Morrison and Barack Obama at the turn of the twenty first century As the voices gathered here suggest it is time to give
a hearing to one of the most talked about new media of the past century
