dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism. These allow the reader to set the individual biographies in the context of the philosophical history of the period. With entries written by over 100 leading philosophy scholars, the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date. Structure: The book is structured alphabetically by philosopher. Each entry is identically structured for ease of access and covers nationality, dates and places of birth and death, philosophical style or school, areas of interest, higher education, significant influences, main appointments, main publications, secondary literature, account of intellectual development and main ideas, critical reception and impact. At the end of the book, a glossary gives accounts of the schools, movements and traditions to which these philosophers belonged, and thorough indexes enable the reader to access the information in several ways: by nationality, by major areas of contribution to philosophy (e.g. aesthetics), by major influences on the thinker concerned (e.g. Plato, Kant, Wittgenstein).

Becoming Bamboo Robert E. Carter, 1992-03-27. The many problems we face in today's world among them war, environmental destruction, religious and racial intolerance, and inappropriate technologies demand that we carefully re-evaluate such issues as our relation to the environment, the nature of progress, ultimate purposes, and human values. These are all issues Robert Carter explains that are intimately linked to our perception of life's meaning. While many books discuss life's meaning either analytically or prescriptively, Carter addresses values and ways of meaningful living from a broader perspective using Japanese philosophy to augment his investigation. He examines Martin Heidegger's distinction between dwelling and existing in the world, Lawrence Kohlberg's stage seven of human moral development, and the works of Viktor Frankl, Carol Gilligan, and Nel Noddings. He applies hermeneutic and deconstructionist theory to the question of meaning and explores the feminist contribution to ethics and its relation to the interconnectedness of things celebrated in Zen and Shinto thought. Bridging various dichotomies such as East-West, reason-emotion, male-female, and caring-justice, Carter shows that ethics, environmental concern, caring, and joy in living are dependent on the growth and transformation of the self. Only by becoming aware of the interrelatedness of things, Carter reveals, can we become as supple and as strong as the bamboo tree, long the symbol of longevity and constancy.

Dictionary of Modern American Philosophers John R. Shook, 2005-01-01. The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are represented, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and

work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought **A Comprehensive Bibliography of the Thanatology Literature** Martin L. Kutscher, 1975
