Seven Wonders of the Ancient Middle East Michael Woods, Mary B. Woods, 2009-04 **The Cambridge Ancient History: 3rd ed., pt. 1. The Middle East and the Aegean region c. 1800-1380 B.C., 1973. pt. 2. Civilizations and Historical Patterns. An Approach to the Comparative Study of History Neagu Djuvara, 2019-06-25 And in the shadow of the major civilization before it disappeared in its turn how many other cultures have perished without a trace This immense tragedy is being lived now by many cultures with great intensity One has to belong to such a culture in course of extinction or dying slowly even before its flourishing to understand the infinite distress of those who are helplessly watching the inexorable disappearance of their most precious values With each dying culture it is a unique flower that is withering never to bloom again an incomparable fragrance that fades away forever There is in the smallest idioms there is in the Weltanschauung of the smallest tribe doomed to extinction treasures of wisdom and poetry Lost lost for all eternity In the life of peoples as in the whole Creation the most striking thing that actually shocks the mind is the infinite waste of Nature Those who at present are fortunate enough to belong to the universal cultures may still live with the illusion of their perpetuity But for how long Indeed what is left of Ancient Egypt of Mesopotamia of Crete of Mexico and of Peru And how can we be sure that our conceited race that for centuries extends its domination over peoples and things will not also fall one day in torpor and become apathetic Neagu Djuvara **The Cambridge Ancient History: plates. The Middle East, the Greek world and the Balkans to the sixth century B.C., New ed., 1984** John Bagnell Bury, Stanley Arthur Cook, Frank Ezra Adcock, 1925

vegetation disappeared from the middle and high latitudes Without plants to eat many large animals became extinct North America lost three fourths of its large animals including the woolly mammoth mastodon and saber tooth cat Humans too had little to eat in these areas and their population declined dramatically The book then explains how and why atmospheric carbon dioxide increased by about 50% after the last ice age ended encouraging a population explosion among plants animals and humans all of which then migrated into many previously barren areas More recently the 28% increase in atmospheric carbon dioxide in the last 150 years has caused a six fold increase in the human population Changes in the next 300 years will reverse some of the current trends This book has value for anyone interested in the ice age extinction glaciers the glacial cycle the atmosphere and oceans and the past and future of plants animals and humans It provides long term information on atmospheric carbon dioxide global warming and cooling
