The Migration Of British Capital To 1875:

The Migration of British Capital to 1875 Leland Hamilton Jenks, 1927 **The Migration of British Capital to 1875** Leland Hamilton Jenks, 1927 *The Migration of British Capital to 1875* Leland Hamilton Jenks, 1967 *The Migration of British Capital to 1875*, 1900 **The Export of Capital from Britain, 1870-1914** A. R. Hall, 2012 During the years before 1914 the world's still largely unused resources were brought increasingly within the framework of a single world economy. This process owed much to Britain's ability to export capital on a scale which has never since been equalled. Yet periods of heavy investment overseas alternated with home investment booms that absorbed the greater part of Britain's savings. The reasons for this fluctuation and the mechanism which linked Britain's economic development with the rest of the world are still subject to debate. This volume illuminates the problems of the global economy today by examining different interpretations and research from history. *An Economic History of England 1870-1939* William Ashworth, 2013-11-05 This is a comprehensive account of a decisive epoch in England's economic development by a leading economic historian. Works of economic history often get bogged down in figures so many machines so much unemployment often too they are histories of technology not of economic organization. Professor Ashworth goes to the opposite extreme in a most praiseworthy way his book is actually good to read. Though there are tables of statistics eleven of them the book is an essay in interpretation not an encyclopedia it enriches our understanding rather than adding to our knowledge. A. J. P. Taylor. This classic book was first published in 1960. **The Migration of British Capital to 1875** Leland Hamilton Jenks, 1963 **The Global Export of British Capital** Irving Stone, 2016-01-20 Great Britain was the preeminent capital exporter between 1865 and 1914 not only in the volume of investment but also in the industrial and geographical diversity of its capital outflows. This study furnishes comprehensive annual data on the magnitude, destination and composition of British capital exports. Individual country data as well as global, regional and Empire aggregates are provided. Supplemental analyses examine the security composition of the capital exports, the changing ranking of recipients, the use of government interest guarantees on loans and the distribution of interest rates on debentures by industry. *The London and New York Stock Exchanges 1850-1914* (Routledge Revivals) Ranald Michie, 2012-08-06 First published in 1987 this is a reissue of the first book to offer a detailed comparison of two of the foremost stock exchanges in the world before 1914. It is not only an exercise in comparative economic history but it also relates these institutions to wider world markets thereby clarifying their functions and how they related to the general financial and economic framework. Students and researchers in economic and social history will welcome the reissue of this groundbreaking account of two historically important institutions in a crucial period of their development. Financial practitioners and others will also find much of interest here in terms of both fascinating history and of insights into an era when a global market was rapidly evolving largely free of the twentieth century distortions and hindrances introduced by wars, interventionist governments and exchange controls. *The Fall of the Planter Class in the British Caribbean,*
