The Outer Limits The Architects Of Fear:

The Outer Limits Joanne Morreale, 2022-04-05 Provides a history and criticism of an important disrupting force in early science fiction television programming In this TV Milestone author Joanne Morreale highlights the differences of *The Outer Limits* ABC 1963-65 from typical programs on the air in the 1960s Morreale argues that the show provides insight into changes in the television industry as writers turned to genre fiction in this case a hybrid of science fiction and horror to provide veiled social commentary The show illustrates the tension between networks who wanted mainstream entertainment and the independent writer producers Leslie Stevens and Joseph Stefano who wanted to use the medium to challenge viewers In five chapters *The Outer Limits* makes a case for the show's deployment of gothic melodrama and science fiction tropes unique televisual characteristics and creative adaptation of many cultural sources to interrogate the relationship between humans and technology in a way that continues to influence contemporary debate in such shows as *Star Trek*, *The X-Files* and *Black Mirror* Underlying the arguments is the eerie notion of *The Outer Limits* as a disruptive force on television at the time purposely making audiences uncomfortable For example in its iconic opening credit sequence a disembodied Control Voice claims to be taking over the television as images mimic signal interference Other themes convey Cold War paranoia ambivalence about the Kennedy era New Frontier and anxiety about the burgeoning military industrial governmental complex The book points out that *The Outer Limits* presaged what came to be known as quality television While most episodes followed the lowbrow tradition of televised science fiction by adapting previously published stories and films the series elevated the genre by rearticulating it through themes and images drawn from myth literature and the art film *The Outer Limits* is lucid yet accessible well researched and argued with enlightening discussions of specific episodes even as it gives attention to broader television history and theory It will be of special interest to scholars and students of television and media studies as well as fans of science fiction

The Ex-Human Michael Bérubé, 2024-05-28 Facing threats like climate change and nuclear warfare science fiction authors have conjured apocalyptic scenarios of human extinction Can such gloomy fates help us make sense of our contemporary crises How important is the survival of our species if we wind up battling for an Earth that has become an uninhabitable hellscape What other possible futures do narratives of the end of humanity allow us to imagine Michael Bérubé explores the surprising insights of classic and contemporary works of SF that depict civilizational collapse and contemplate the fate of *Homo sapiens* In a lively conversational style he considers novels by writers including Ursula K. Le Guin Margaret Atwood Liu Cixin Philip K. Dick and Octavia Butler as well as films that feature hostile artificial intelligence such as *2001: A Space Odyssey*, *Blade Runner* and the *Terminator* and *Matrix* franchises Bérubé argues that these works portray a future in which we have become able to see ourselves from the vantage point of something other than the human Though framed by the possibility of human extinction they are driven by a vision of the *ex-human* a desire to imagine that another species is possible For all science fiction readers worried about the fate of humanity *The Ex*

Monsters in the Machine Steffen Hantke, 2016-06-20 During the 1950s and early 1960s the American film industry produced a distinct cycle of films situated on the boundary between horror and science fiction Using the familiar imagery of science fiction from alien invasions to biological mutation and space travel the vast majority of these films subscribed to the effects and aesthetics of horror film anticipating the dystopian turn of many science fiction films to come Departing from projections of American technological awe and optimism these films often evinced paranoia unease fear shock and disgust Not only did these movies address technophobia and its psychological social and cultural corollaries they also returned persistently to the military as a source of character setting and conflict Commensurate with a state of perpetual mobilization the US military comes across as an inescapable presence in American life Regardless of their genre Steffen Hantke argues that these films have long been understood as allegories of the Cold War They register anxieties about two major issues of the time atomic technologies especially the testing and use of nuclear weapons as well as communist aggression and or subversion Setting out to question expand and correct this critical argument Hantke follows shifts and adjustments prompted by recent scholarly work into the technological political and social history of America in the 1950s Based on this revised historical understanding science fiction films appear in a new light as they reflect on the troubled memories of World War II the emergence of the military industrial complex the postwar rewriting of the American landscape and the relative insignificance of catastrophic nuclear war compared to America s involvement in postcolonial conflicts around the globe

1999: A Space Odyssey John K Balor, 2018-08-03 Part of the premise of the online discussion transcribed in this book is how Gerry Anderson s television series Space 1999 can be understood in relation to Stanley Kubrick s 2001 A Space Odyssey by looking at both narratives through the perspective of systems theory As a result of doing so an engaged debate concerned with the political and philosophical subtext of both stories developed This book gives a full account of the debate with summaries of ideas and insights The book has been developed on an idealistic basis It is sold at the lowest price the publisher was willing to accept A free e book version can be downloaded at www.lulu.com
