America and the Multinational Corporation provides the historical context for tracking the various presidential perspectives from Truman to Bush as well as the various congressional initiatives to redefine business government relations in terms of corporate America's most aggressive offspring the multinational. Professor Reardon moves beyond the initial assessments of the multinational corporation vis-à-vis the Federal government refusing to view it as a threat to the continued survival of the nation state or as a force that the Federal government must tame at all cost. Rather the partnership is a complex and continuously evolving relationship that may well be acquiring a new configuration as the world's economy becomes global rather than international. His study will be of interest to all students of contemporary American history as well as scholars in international political economy.
