Whatever Happened to the Leisure Society? A. J. Veal, 2018-10-10 The idea of a leisure society was in its heyday in the 1960s and 1970s when it was predicted that the pattern of falling working hours which had been experienced in Western societies in the first half of the twentieth century would continue indefinitely The leisure society has clearly not been realised On the contrary contemporary industrial societies seem to be characterised by a shortage of time experienced as time squeeze and stress The leisure society idea can be seen as the modern version of the age old dream of a life of ease and plenty This analytically and empirically rich book traces the idea in history through biblical classical Greek medieval and nineteenth century utopian writings and into twentieth century concerns with dystopia and the impact of rapid technological change The leisure society concept turns out to have been an elusive and short lived phenomenon For a variety of reasons the trend towards shorter working hours ran out of steam in the last quarter of the twentieth century However while leisure scholars have deserted the topic a diverse range of activists including environmentalists economists and feminists continue to make the case for reducing working hours Whatever Happened to the Leisure Society concludes that the on going struggle for time should be supported for the sake of human health and well being and for the sake of the planet This is a valuable resource for students and academics in the fields of leisure studies cultural studies history economics sociology and political science

Gender and the Politics of Time Valerie Bryson, 2007 Women's role in the labour market has combined with concerns about the damaging effects of long working hours to push time related issues up the policy agenda

This book assesses policy alternatives in the light of feminist theory and factual evidence. It introduces mainstream ideas on the nature and political significance of time. *Immigrant Women in Atlantic Canada* Evangelia Tastsoglou, Peruvemba S. Jaya, 2011. At last an in depth exploration of immigrant women's experiences in the labour force family and broader community in Atlantic Canada. Highlighting feminist research on women and gender based analyses the collection focuses on the intersections of gender with race ethnicity and class. *Communication and the Work-Life Balancing Act* Elizabeth Fish Hatfield, 2016-12-27. *Communication and the Work Life Balancing Act* Intersections across Identities Genders and Cultures offers scholarly research related to work life balance in today's environment with a particular focus on the fields of communication and gender studies. The chapters examine the choices challenges and gendered experiences that women and men face as they navigate structures of work domestic duties and childcare in search of balance. Underpinning this text is the notion that work life balance affects everyone but is experienced differently through the intersections of sex age gender socioeconomic status and race. Recommended for scholars of communication gender studies organizational communication sociology and family communication. *Hooked on Growth* Douglas E. Booth, 2004-05-03. Challenging conventional wisdom on the virtues of a consumer economy this provocative book explores the nexus between growth and environment sustainability. The miracle of the modern affluent economy is an ever swelling cornucopia of consumer goods leading to expanding consumption as the essential underpinning of economic growth in more and more parts of the globe. Douglas Booth contends that expansion in this form amounts to an addiction. Are we as a society hooked on economic growth of a kind that carries with it significant threats to the natural environment? A critical dilemma for the modern economy is that growth is required to prevent the pain of unemployment. As growth continues the environment declines but if growth slows unemployment rises. We seem trapped in a spiraling predicament like that of the addict. This accessible work explores whether getting unhooked from growth to meet the needs of the environment is possible. Giving the environment priority over growth may seem to some like a radical idea yet the author argues that it can be accomplished using marketable emissions allowances transferable development rights and other tools popular with conventional economists. It can also be achieved by creating more interesting and environmentally friendly urban landscapes less beholden to the automobile. The key problem a less growth oriented society will face is ensuring that everyone who wants employment can find it. This will require something that many people wish for anyway a shorter workweek. More leisure a higher quality environment and more attractive cities and towns are the potential rewards of a less consumption oriented society. Yet powerful economic interests that benefit from a high growth economy are arrayed against changes in the status quo. Under what circumstances can the power of special interests be overcome in the name of environmental conservation? This is the author's critical final question as he offers a clear path to a sustainable economic and environmental future. *Occupational Science* Gail E. Whiteford, Clare Hocking, 2012-02-13. *Occupational Science Society Inclusion Participation* is the must have resource for

occupational therapists occupational scientists students and researchers The book begins with a comprehensive review of the current literature and the knowledge generated to date Reasons for the field's limited impact are proposed including its focus on individuals rather than groups and communities its psychological view of occupation and its narrow focus on socially approved occupations Global realities such as poverty anti social behaviour and ageing populations are discussed and implications for action are considered The second section of the book's comprises a series of chapters that address the philosophical theoretical and scientific bases that underpin and inform everyday decision making in occupational therapy practice This is followed by a section on methodological and structural considerations The concluding chapter offers a critical reflection on methods strategies values and relationships for the future to achieve a relevant science that makes a difference to current occupational realities Written by an internationally renowned team of contributors this book offers a truly comprehensive critique of the field Features Internationally renowned Editors and contributors First comprehensive text on occupational science Fully up to date with the latest thinking and research Links theory to practice

Smith, Laura Maria Wallnöfer, 2025-09-29 Vocabulary for Sustainable Consumption and Lifestyles a Language for our Common Future curates a shared vocabulary of concepts that enables a society wide conversation about sustainable consumption and lifestyles the future of consumer society and ways to transcend it Since the United Nations UN Earth Summit in Rio de Janeiro in 1992 the global environmental and social consequences of mass consumption have been well documented yet progress is slow Overconsumption and extractive practices continue to drive ecological overshoot Set against this backdrop each of the 87 essays in this book imparts a meaning to a concept highlights its history and offers different perspectives interpretations and applications for social change The two premises of this book are that we need to transition to a society in which the well being and dignity of people are achieved with a much smaller footprint and that technological solutions are inadequate for the challenge Policies and actions are greatly lagging behind the growing understanding of the system of production consumption because social change is often slow and sustainable consumption does not have a clear political champion The book addresses tensions that also interfere with progress such as science versus politics economic winners versus losers traditions versus an uncertain future and present needs versus future costs This innovative volume is an important resource for students scholars policymakers grassroots activists and agents of change interested in sustainable consumption and sustainable living more broadly
