Projectile Technology Heidi Knecht,2013-06-29 Artifacts linked to projectile technologies traditionally have provided the foundations for time space systematics and cultural historic frameworks in archaeological research having to do with foragers With the shift in archaeological research objectives to processual interpretations projectile technologies continue to receive marked attention but with an emphasis on the implications of variability in such areas as design function and material as they relate to the broader questions of human adaptation The reason that this particular domain of foraging technology persists as an important focus of research I think comes in three parts A projectile technology was a crucial part of most foragers strategies for survival it was functionally specific and it generally was fabricated from durable materials likely to be detected archaeologically Being fundamental to meat acquisition and the principal source of calories projectile technologies were typically afforded greater time investment formal modification and elaboration of attributes than others Moreover such technologies tend to display greater standardization because of constraints on size morphology and weight that are inherent to the delivery system The elaboration of attributes and standardization of form gives projectile technologies time and space sensitivity that is greater than most other foraging technologies And such sensitivity is immensely valuable in archaeological research *Submarine Telegraphy and the Hunt for Gutta Percha* Helen Godfrey,2018-03-20 In *Submarine Telegraphy and the Hunt for Gutta Percha* Helen Godfrey traces the connections between

submarine telegraphy and the peoples of Singapore and Sarawak Borneo who supplied gutta percha the latex insulating the world network of undersea telegraph cables The book examines the complex inter relationships linking metropolitan and local environments in a trade once described as a matter of interest to the whole civilized world Using previously untapped corporate and official archives trade data and a rich documentary record the study explores the roles of cable producers scientists administrators and local Chinese and indigenous traders It reveals how a global trade may transcend technological geographic and cross cultural challenges even hostilities Motivations and outcomes are more complex than simple commercial gain **Traditions of the Tinguian** Fay-Cooper Cole, 1915
