Plants, Four Volume Set Anthony R. Torkelson, 1995-12-01 Researchers of medicinal plants often find unfamiliar references to herbs when reading through ethnobotanical literature. Very often they are familiar with the plant but not with the name used in a given context. This book eliminates the time-consuming task of further research by providing 28,000 common names of medicinal plants in a single source. International in scope, this unique reference allows matching of scientific and common names through a comprehensive cross index. The first volume is organized alphabetically by scientific name, while the other two volumes are a cross index by common name. Phylum, order, and family are also provided, as well as the language of the common name, which helps to identify its geographic location. *1,000 Spanish Recipes* Penelope Casas, 2014 An
