## **The Paradox Of Peace Leaders Decisions And Conflict Resolution:**

The Paradox of Peace John Orme, 2004-06-19 This wide ranging text examines the foundations of peace by using diverse case studies to look at the calculations of political leaders and their reliance on optimism Drawing on global examples from various historical periods John D Orme calls into question the longstanding assumption that optimism about the benefits of peace leads to conflict termination Instead he suggests that when leaders perceive little opportunity for gains through sustained conflict the likelihood of peace through compromise may be most likely Bringing together key issues of foreign policy statesmanship and diplomacy this book offers a provocative and straightforward case against the use of optimism in international relations

*Analyzing Strategic Rivalries in World Politics* William R. Thompson, Kentaro Sakuwa, Prashant Hosur Suhas, 2021-11-20 Strategic rivalries are contests between states that view one another as threatening competitors and treat each other as enemies A disproportionate amount of interstate conflict is generated by a relatively small number of these pairs of states engaged in rivalries that can persist for years Thus to understand interstate peace and conflict it is useful to know how rivalries work in general and more specifically In the past two decades a strenuous effort has been mounted to introduce the concept of rivalry and demonstrate its utility in unraveling conflict situations Yet all rivalries are not exactly alike We need to move to a more rewarding differentiation of how they differ in general Principal rivalries are those antagonisms that are most significant to the decision makers in a state The main distinction on issues about which rivals dispute are positional and spatial concerns Positional rivalries contend over regional and global influence Spatial rivals contend over which state deserves to control disputed territory Interventionary rivalries predominate in sub Saharan Africa Their primary focus involves neighboring states attempting to influence who rules and how co ethnics are treated This book updates the inventory of strategic rivalries from 1816 to 2020 Principal rivalries are identified for the first time and cover the same period A theory stressing the two main types of rivalry positional and spatial is elaborated and tested Regional variations on the origins and terminations of spatial rivalry are explored and interpreted In addition attention is paid to fluctuations in the intensity of positional rivalries by examining the working of the contemporary major power triangle United States Soviet Union Russia and China and more generally the dynamics of regional power that are rising in terms of their relative capability and status in the system Variations in cooperation and termination dynamics both in general and according to rivalry type are also examined Overall the emphases of the book are split between demonstrating the utility of distinguishing among rivalry types and examining selected rivalry dynamics

*Confrontation, Strategy and War Termination* Christopher Tuck, 2016-05-23 At the heart of this book is the problem of war termination Britain won an almost unbroken string of tactical military victories during an undeclared war against the Republic of Indonesia in the 1960s yet it proved difficult to translate this into strategic success Using conflict termination theories this book argues that British strategy during Confrontation was both exemplary and flawed both of which need not be mutually exclusive The British

experience in Indonesia represents an illuminating case study of the difficulties associated with strategy and the successful termination of conflicts The value of this book lies in two areas as a contribution to the literature on British counter insurgency operations and as a contribution to the debates on the problems of war termination in the context of strategic thought

Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton, 2014-06-30 The success or failure of foreign policy initiatives in Latin America is heavily influenced by bureaucratic and military background players Rivalry and Alliance Politics in Cold War Latin America Christopher Darnton's comparative study of the nature of conflict between Latin American states during the Cold War provides a counterintuitive and shrewd explanation of why diplomacy does or doesn't work Specifically he develops a theory that shows how the parochial interests of state bureaucracies can overwhelm national leaders foreign policy initiatives and complicate regional alliances His thorough evaluation of several twentieth century Latin American conflicts covers the gamut of diplomatic disputes from border clashes to economic provocations to regional power struggles Darnton examines the domestic political and economic conditions that contribute either to rivalry continued conflict or rapprochement diplomatic reconciliation while assessing the impact of U S foreign policy Detailed case studies provide not only a robust test of the theory but also a fascinating tour of Latin American history and Cold War politics including a multilayered examination of Argentine Brazilian strategic competition and presidential summits over four decades three rivalries in Central America following Cuba's 1959 revolution and how the 1980s debt crisis entangled the diplomatic affairs of several Andean countries These questions about international rivalry and rapprochement are of particular interest to security studies and international relations scholars as they seek to understand what defuses regional conflicts creates stronger incentives for improving diplomatic ties between states and builds effective alliances The analysis also bears fruit for contemporary studies of counterterrorism in its critique

of parallels between the Cold War and the Global War on Terror its examination of failed rapprochement efforts between Algeria and Morocco and its assessment of obstacles to U S coalition building efforts Judging Justice James David Meernik,Kimi Lynn King,2019-02-07 Some injustices are so massive so heinous and so extraordinary that ordinary courts are no longer adequate The creation of international courts and tribunals to confront major violations of human rights sought to bring justice to affected communities as well as to the entire world Yet if justice is a righting of the imbalance between what has happened and what is reflected in the law no amount of punishment and no judgment could compensate for that suffering and loss In order to understand the meaning of justice James David Meernik and Kimi Lynn King studied the perspective of witnesses who have testified before the International Criminal Tribunal for the Former Yugoslavia ICTY Using a unique survey Meernik and King look at the identity of the victims and their perception of the fairness of ICTY Because of the need to justify the practical and emotional difficulties involved in testifying before an international tribunal witnesses look not just to the institution to judge its effectiveness but also to their own contribution by testifying effectively The central elements of the theory Meernik and King develop identity fairness and experience transcend specific conflicts and specific countries and are of importance to people everywhere *Journal of Peace Research* ,2010-05 Netherlands Annual Review of Military Studies 2015 Jörg Noll,Daan van den Wollenberg,Frans Osinga,Georg Frerks,Irene van Kemenade,2015-07-27 This book seeks to bridge the gap between academic political and military thinking concerning the success and failure of peacekeeping operations and their termination Exit strategies have recently gained attention in political military academic and public debates due to the Western engagement in international and intrastate conflicts since the end of the Cold War Yet many of those debates took place separately This volume which is predominantly a joint product of academics and the military of the Faculty of Military Sciences of the Netherlands Defence Academy shows new venues by bridging the putative political military divide Drawing on theory empirics and personal experiences the authors address exits at political strategic operational and tactical levels of current and past military missions and interventions ranging from decolonisation wars to Afghanistan and Iraq Although some of those conflicts are still ongoing valid inferences can be drawn An important one is that exit forms a problem for those who leave and for those who stay While political and military objectives might not have been reached and many of those involved have the feeling that the job is still not yet done the termination of the entire mission or transitions at operational level necessitate both departures and handovers takeovers and are thereby characterised by discontinuities and continuities at the same time It is these dynamics between unfulfilled end states and end dates that in the end lead to the dilemma of leaving All the editors except van den Wollenberg are affiliated with the Faculty of Military Sciences of the Netherlands Defence Academy in Breda the Netherlands J rg Noll is Associate Professor of International Conflict Studies First Lieutenant Air Commodore Frans Osinga is Professor of Military Operational Art and Sciences Georg Frerks is Professor International Security Studies and Irene van Kemenade runs the Research Office of the

Military Threats Branislav L. Slantchev, 2011-02-03 Is military power central in determining which states get their voice heard Must states run a high risk of war to communicate credible intent In this book Slantchev shows that states can often obtain concessions without incurring higher risks when they use military threats Unlike diplomatic forms of communication physical military moves improve a state's expected performance in war If the opponent believes the threat it will be more likely to back down Military moves are also inherently costly so only resolved states are willing to pay these costs Slantchev argues that powerful states can secure better peaceful outcomes and lower the risk of war but the likelihood of war depends on the extent to which a state is prepared to use military threats to deter challenges to peace and compel concessions without fighting The price of peace may therefore be large states invest in military forces that are both costly and unused

country does initiate war the effects of aging will create major barriers to military success Hypothesis 3 Finally the effects of population aging will help prevent a power transition between the United States and China Hypothesis 4 Although the United States confronts major challenges created by its aging population it is significantly better shape in this area than is China Population aging as a result will be a potent force for the continuation of US relative power dominance The chapter concludes with analyses of the book s contributions to the literature counterarguments and their problems operationalization of variables and case selection criteria Provided by publisher
