The Past And Future People:

Genes And Future People Walter Glannon, 2018-03-05 Advances in genetic technology in general and medical genetics in particular will enable us to intervene in the process of human biological development which extends from zygotes and embryos to people This will allow us to control to a great extent the identities and the length and quality of the lives of people who already exist as well as those we bring into existence in the near and distant future Genes and Future People explores two general philosophical questions one metaphysical the other moral 1 How do genes and different forms of genetic intervention gene therapy genetic enhancement presymptomatic genetic testing of adults genetic testing of preimplantation embryos affect the identities of the people who already exist and those we bring into existence and 2 How do these interventions benefit or harm the people we cause to exist in the near future and those who will exist in the distant future by satisfying or defeating their interest in having reasonably long and disease free lives Genes and Future People begins by explaining the connection between genes and disease placing genetic within a framework of evolutionary biology It then discusses such topics as how genes and genetic intervention influence personal identity what genetic testing of individuals and the knowledge resulting from it entails about responsibility to others who may be at risk as well as how gene therapy and genetic enhancement can affect the identities of people and benefit or harm them Furthermore it discusses various moral aspects of cloning human beings and body parts Finally it explores the metaphysical and moral implications of genetic manipulation of the mechanisms of aging to extend the human life span The aim Genes and Future People is to move philosophers bioethicists and readers in general to reflect on the extent to which genes determine whether we are healthy or diseased our identities as persons the quality of our lives and our moral obligations to future generations of people

Empowering the Past, Confronting the Future: The Duna People of Papua New Guinea Andrew J.

Strathern, Pamela J. Stewart, 2004-06-11 How have the Aluni Valley Duna people of Papua New Guinea responded to the challenges of colonial and post colonial changes that have entered their lifeworld since the middle of the Twentieth Century Living in a corner of the world influenced by mining companies but relatively neglected in terms of government sponsored development these people have dealt creatively with forces of change by redeploying their own mythological themes about the cosmos in order to make claims on outside corporations and by subtly combining features of their customary practices with forms of Christianity attempting to empower their past as a means of confronting the future The Future and the Past Delmer Brown, Ichiro Ishida, 2023-04-28 The Future and the Past A Translation and Study of the Gukansh takes readers deep into the intellectual and cultural landscape of 13th century Japan offering a detailed translation and analysis of the Gukansh a pivotal historical work written by the Buddhist priest Jien in 1219 Amid social upheaval and the looming conflict between the Imperial Court and the military government Jien crafted a visionary interpretation of Japan's history blending Buddhist doctrines of kalpic decline and Shinto principles of divine intervention His work presents a unilinear course of historical

change shaped by unseen forces he called Principles which pull Japan's trajectory alternately toward deterioration and revival Rooted in belief in the sacredness of Japan's Imperial line and its divine origins the Gukanshi is as much a theological reflection as it is a political roadmap advocating for the cooperative governance of aristocratic and military leaders to secure a brighter future This edition combines decades of meticulous scholarship to illuminate Jien's complex worldview and its profound implications for Japanese history and thought Readers are invited to explore the interplay of religious belief political power and historical change as Jien sought to legitimize the Kujo house's role in leading Japan toward renewal By weaving genealogical analysis political advocacy and spiritual insight The Future and the Past offers a unique lens on how medieval Japanese society grappled with decline and envisioned pathways for recovery This translation not only preserves the nuances of Jien's narrative but also contextualizes his ideas for modern audiences shedding light on the enduring relevance of his vision of history This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979 What We Owe to Future People Elizabeth

Finneron-Burns, 2024 What do we owe future people Intergenerational ethics is of great philosophical and practical importance given human beings ability to affect not only the quality of life of future people but also how many of them there will be if any at all This book develops a distinctly contractualist answer to this question we need to justify our actions to them on grounds they could not reasonably reject The book explores what future people could or could not reasonably reject in terms of intergenerational resource distribution individual procreative decisions optimal population size and risk imposition The Past And Future Of Law E.O. Blunsom, 2013-04-10 We live in our nations but what other nations do may

affect us and sometimes immensely We are all members of the world community of people living in our dangerous world The purpose of the following book is to consider the laws and practices that govern our nations and through them our world It builds on the premise that unless we change and improve our laws the human race may not survive in the future It is not about any particular nation but about all nations Many citizens believe their nations are ideal providing freedom and justice and with governments representative of the people This may be true in their minds and according to their beliefs but the dangers and sufferings of the world continue They are the concern of us all because they affect all people The world has changed vastly from the past It is technically more advanced but also more dangerous because of nuclear and other deadly weapons and widespread poverty and diseases in overgrown populations The past in spite of its myriad wars and premature deaths has survived Can our present world using the same instruments power nations positive laws strictly enforced retaliations and harsh punishments also survive The answer may be an unequivocal no reverberating through future power wars We need a fresh outlook different laws and a new phase of global society to replace the past Legal philosophers have

proclaimed many varieties of laws including eternal laws provided by God and natural laws according to human nature Most are nonenforced laws that they say Ought to be Positive laws are those that exist made and enforced by nations *The Future of the Past* Tamara Bray,2012-10-12 To date the notion of repatriation has been formulated as a highly polarized debate with museums archaeologists and anthropologists on one side and Native Americans on the other This volume offers both a retrospective and a prospective look at the topic of repatriation By juxtaposing the divergent views of native peoples anthropologists museum professionals and members of the legal profession it illustrates the complexity of the repatriation issue **The Past, Present, and Future of Canadian Cities** Alexandra Flynn,Richard Albert,Nathalie Des

Rosiers,2024-10-15 In 1861 just a few years before Confederation 84 per cent of Canadians lived in rural areas today it s less than 20 per cent Our municipal governments are asked to do more for their citizens than ever before yet they must confront myriad challenges from the public health pandemic to the housing crisis without the tools they need They have no constitutional protection from jurisdictional overstepping by provincial governments and no assurance that they will be able to complete any effort they undertake *The Past Present and Future of Canadian Cities* explores the historical functions of municipalities their current ability to tackle major problems and what the future holds for shifting legal and political powers This volume examines how pre Confederation cities came to have their current constitutional and legislative forms how current local governments make decisions within existing legal parameters highlighting Indigenous municipal relationships and emergency management and finally looks to the world to investigate future innovation in municipal governance *The Past Present and Future of Canadian Cities* makes the case that constitutional concepts must be repurposed to support the transition from nation building to city building in a global context **Advances in Experimental Social Psychology**
