The Patient's Guide to Preventing Medical Errors Karin J. Berntsen, 2004-10-30 A nation watched in horror as 17 year old Jessica Santillian died needlessly after a heart lung transplant in 2003 She had been given organs with the wrong blood type That error killed her It is just one among tens of thousands of less publicized errors that occur in U S hospitals each year Author Karin Berntsen a veteran of the hospital and health care industry takes us through the headlines and the events never publicized into hospital wards and surgical rooms to see how errors are made causing disability or death She gives graphic examples of actual events that illustrate the problems cited in a federal Institute of Medicine report showing medical errors in the hospital cause 44 000 to 98 000 deaths each year Those errors include medication mistakes wrong site or side surgery and botched transfusions Berntsen explains why these are not just human errors with one or two people responsible they are systems failures that require a major culture change to remedy And that change she argues may not come without action by the very people the medical system is designed to help patients She offers clear actions consumers can take to assure they are not on the receiving end of a medical error The book details over 200 tips for improving patient safety U S hospitals have countless stories of miraculous healing and recovery the greatest technology most advanced medicines and best research in the world On the other hand we have a system where medical errors bring more than 120 fatalities each day across the country in hospitals An airline crash causing that many deaths daily would paralyze that industry But because the deaths and harm are diluted across and deep within the silence of hospitals it is easier to be complacent There is says Berntsen an urgent need to pause and take inventory a need for clinicians and consumers to come together as partners for change

Library Journal ,1997-10 **Philadelphia Magazines Guide to Healthcare in the Delaware Valley, 1994-1995** Carol Saline,1994-05 **Hippocrates' Shadow** David H. Newman,2009-09-15 A clear sighted heartfelt and humane story of the needless tests and treatments that cripple healthcare as a guide to good medicine it may help us get back to the essence of what good doctors do be with patients in healing Samuel Shem M D author of *The House of God* and *The Spirit of the Place* In *Hippocrates Shadow* Dr David H Newman upends our understanding of the doctor patient relationship and offers a new paradigm of honesty and communication He sees a disregard for the healing power of the bond that originated with Hippocrates and ultimately a disconnect between doctors and their oath to do no harm Exposing the patterns of secrecy and habit in modern medicine s carefully protected subculture Dr Newman argues that doctors and patients cling to tradition and yield to demands for pills or tests Citing fascinating studies that show why antibiotics for sore throats are almost always unnecessary how cough syrup is rarely more effective than a sugar pill and why CPR is violent invasive and almost always futile this thought provoking book cuts to the heart of what really works and what doesn t in medicine
