## **The Pennsylvania Old Assyrian Texts:**

**The Pennsylvania Old Assyrian Texts** W. C. Gwaltney, 1983 Nearly 20 000 clay tablets have been excavated from Kültepe in central Turkey site of the ancient trade city of Kanish but only about 4% of this corpus has been published in translation so that it is available to scholars outside of Assyriology W C Gwaltney Jr offers transliterations and translations of 82 tablets and fragments from the University of Pennsylvania together with notes and indices giving scholars from a wide variety of disciplines interested in ancient economies access to these valuable primary texts [A Grammar of Old Assyrian](#) N.J.C. Kouwenberg, 2022-05-09 A Grammar of Old Assyrian describes the language contained in a very large corpus of cuneiform tablets mainly found in Anatolia in the middle of Turkey and dating to ca 1900 1700 BC These tablets come from the archives of a community of Assyrian merchants who conducted a long distance trade between Assyria and Anatolia and eventually settled in Anatolia Alongside Babylonian Assyrian is one of the main branches of Akkadian the Semitic language spoken in Mesopotamia roughly present day Iraq in the third second and first millennium BC and Old Assyrian is its oldest attested stage Old Assyrian is also one of the oldest and largest corpora of texts in any Semitic language Kouwenberg has managed to describe and discuss the corpus in a structural and comprehensive manner His grammar will therefore prove to be a useful source of information for decades J J de Ridder in *Bibliotheca Orientalis* 76 1 2 2019 [A Historical Geography of Anatolia in the Old Assyrian Colony Period](#) Gojko Barjamovic, 2011 This study includes a revised model of the historical geography of Anatolia in the Old Assyrian Colony Period c 1969 1715 BC that is based on topographical archaeological and written records The book challenges traditional views of Anatolian geography by using arguments based on logistics infrastructure and the organization of trade to suggest a new interpretation focused on central markets fluctuating prices and interlocking regional systems of exchange The historical implications of this revised geography for Old Assyrian and early Hittite history and Bronze Age archaeology are extensively discussed The book contains translations and discussions of passages from hundreds of published and unpublished Old Assyrian texts and gives a comprehensive inventory of Anatolian toponyms accompanied by numerous photographs and maps **A History of Ancient Near Eastern Law (2 vols)** Raymond Westbrook, 2003-08-01 The first comprehensive survey of the world s oldest known legal systems this collaborative work of twenty two scholars covers over 3 000 years of legal history of the Ancient Near East Each of the book s chapters represents a review of the law of a particular period and region e g the Egyptian Old Kingdom by a specialist in that area Within each chapter the material is organized under standardized legal categories e g constitutional law family law that make for easy cross referencing The chapters are arranged chronologically by millennium and within each millennium by the three major politico cultural spheres of the region Egypt Mesopotamia and Anatolia and the Levant An introduction by the editor discusses the general character of Ancient Near Eastern Law *Diagnoses in Assyrian and Babylonian Medicine* Jo Ann Scurlock, Burton Andersen, 2010-10-01 To date the pathbreaking medical contributions of the early Mesopotamians have been

only vaguely understood Due to the combined problems of an extinct language gaps in the archeological record the complexities of pharmacy and medicine and the dispersion of ancient tablets throughout the museums of the world it has been nearly impossible to get a clear and comprehensive view of what medicine was really like in ancient Mesopotamia The collaboration of medical expert Burton R Andersen and cuneiformist JoAnn Scurlock makes it finally possible to survey this collected corpus and discern magic from experimental medicine in Ashur Babylon and Nineveh Diagnoses in Assyrian and Babylonian Medicine is the first systematic study of all the available texts which together reveal a level of medical knowledge not matched again until the nineteenth century A D Over the course of a millennium these nations were able to develop tests prepare drugs and encourage public sanitation Their careful observation and recording of data resulted in a description of symptoms so precise as to enable modern identification of numerous diseases and afflictions Old Assyrian Texts in the University Museum, Philadelphia, Pa Hildegard LEWY,1969 *Ancient Archives and Archival Traditions* Maria Brosius,2003 Our oldest archival records originate from the Near East Systems of archival record keeping developed over several millennia in Mesopotamia before spreading to Egypt the Mycenaean world and the Persian empire and continuing through the Hellenistic and Seleucid periods Yet we know little about the way archival practices were established transmitted modified and adapted by other civilizations This interdisciplinary volume offers a systematic approach to archival documents and to the societies which created them addressing questions of formal aspects of creating writing and storing ancient documents and showing how archival systems were copied and adapted across a wide geographical area and an extensive period of time The Akkadian Verb and Its Semitic Background N. J. C. Kouwenberg,2010-06-30 In this magnum opus N J C Kouwenberg presents a thoroughgoing modern analysis of the Akkadian verbal system taking into account all of the currently available evidence for the language during the course of the long period of its attestation The book achieves this goal through two strategies 1 to describe the Akkadian verbal system as comprehensively as the data permit and 2 to reconstruct its prehistory on the basis of internal evidence and reconstruction comparison with cognate languages and typological evidence Akkadian has one of the longest documented histories of any language data from nearly two and one half millennia are available even if the stream of data is sometimes interrupted and not always as copious as we would like During the course of this history numerous developments took place illustrating how languages change over time and offering parallels for reconstruction of changes that occurred in poorly documented periods As a result this book will be of great interest in the first place for all students of Akkadian both the language and the literature that is documented in that language and in the second place for all students of language and linguistics who are interested in the study of how languages are shaped develop and change during the course of a long history Peoples of the Old Testament World Alfred J. **A Year of Vengeance** Edward Stratford, 2017-09-25 Despite significant advances in annual chronology the Old Assyrian trade fundamentally lacked a regime of time at the level of the merchant s commercial and personal activities In this book Stratford sets out to recapture time through narrative drawing on the relationship between the two described by the philosopher Paul Ricoeur Investigating a possible case of revenge leads to weaving together more than a hundred mostly undated documents to form a narrative within the course of a single year of vengeance including trade disruptions illnesses and commerce This process demonstrates relationships between document and material context and time and narrative Along the way Old Assyrian commercial time and its tempos become more clear leading to descriptions of the scale of the trade and the nature of Old Assyrian archives as they have survived Ultimately the Assyrians involved appear as the earliest historical individuals in world history The treatment of alim a um s apparent revenge comprises a practicum in historical interpretation in the ancient world of interest to practitioners and theoreticians of both the ancient world and world history

**Tied and Bound: A Comparative View on Manuscript Binding** Alessandro Bausi, Michael Friedrich, 2023-08-07 The present volume contains twelve chapters authored by specialists of Asian African and European manuscript cultures reflecting on the cohesion of written artefacts particularly manuscripts Assuming that codicological units exist in every manuscript culture and that they are usually composed of discrete elements such as clay tablets papyrus sheets bamboo slips parchment bifolios palm leaves the issue of the cohesion of the constituents is a general one The volume presents a series of case studies on devices and strategies adopted to achieve this cohesion by manuscript cultures distant in space from China to West Africa and time from the third millennium bce to the present This comparative view provides the frame for the understanding of a phenomenon that appears to be of essential importance for the study of the structure of written artefacts

Regardless of the way in which cohesion is realised all strategies and devices that allow the constituents to be kept together are subsumed under the term binding. Thus it is possible to highlight similarities, convergences and unique physical and technical methods adopted by various manuscript cultures to face a common challenge. The Oxford History of the Ancient Near East Karen Radner, Nadine Moeller, Daniel T. Potts, 2023-04-14.
