B. Joseph White, 2014-08-18 This is a different kind of corporate governance book. With its vivid stories and conversational tone, *Boards That Excel* is like sitting down with an astute and experienced friend, one who's passionate about what corporate and nonprofit boards can contribute to their organizations' success when they set high aspirations, are clear on purpose, and do the right things in the right way. B. Joseph White, an experienced corporate and nonprofit director and a distinguished academic, argues that boards can enable organizations to do great things but only when directors go well beyond their duty to oversee and monitor management. White offers a road map for governance success based on his experience with two of America's most successful companies, one public and one private. He knows governance research and distills it to a handful of truly useful insights for boards and directors. He provides clear guidance on the essential work boards must do and, drawing on behavioral research, he describes how they can ensure the boardroom is a place of good information, thoughtful evaluation, and wise decision making. The book reports on interviews with more than a dozen high performance board chairs, CEOs, and directors, including Siebel Systems founder Tom Siebel, legendary real estate investor Sam Zell, former Harlem Globetrotters owner Mannie Jackson, GM board chairman and former Cummins chairman and CEO Tim Solso, and volunteer University of Illinois, University of Michigan, and corporate Hershey Bob Evans director Mary Kay Haben. All speak with unusual candor on what it takes for boards and directors to excel. Visual Search 2 A.G. Gale, K.

Carr, D. Brogan, 2003-09-02 The concept of visual search embraces a wide range of processing activities from human cognitive phenomena to applied problems for both human and machine vision in industrial, medical, and military environments. This book, the second to be derived from the series of international conferences on visual search organized under the auspices of the Applied Vision Association, brings together research from a variety of disciplines, enabling the reader to share experiences at the cutting edge, accessing knowledge which might otherwise be locked away in specialist journals or grey literature. **Deep Learning on Microcontrollers** Atul Krishna Gupta, Dr. Siva Prasad Nandyala, 2023-04-15 A step-by-step guide that will teach you how to deploy TinyML on microcontrollers.
