

WHAT IS PERIMETER?

Perimeter: $2+2+2+2 = 4 \text{ cm}$

The **perimeter** is the distance all the way around the outside of a 2D shape, space or area.

The **perimeter of a shape** is determined by adding the length of all its sides.

To **calculate the perimeter** of a regular shape it is easier to multiply the number of sides by the length of one side.

However, to **calculate the perimeter** of an irregular shape, we use the general formula (Perimeter = sum of all sides).
