The Permanent Representatives Committee Jaap Willem Zwaan, T.M.C. Asser Instituut, 1995 By describing and analysing the process which precedes decision making in the Council of Ministers an insider's view is presented in this book of the process of decision making in the European Union The main subject is the Permanent Representatives Committee comprising Ambassadors of the Member States to the European Union the Permanent Representatives Coreper has the general responsibility for preparing the work of the Council The book is based on a legal thesis which was published in Dutch at the end of 1993 For the English version the text has been revised and where necessary updated The content which is largely derived from practical experience should provide a clearer picture of the current state of affairs of European integration in general and the functioning of the European institutions in particular To this extent the book serves the political objective of creating transparency in the decision making of the European Union This book is aimed at all those working in the public services international organizations universities liberal professions and economic life whose everyday work brings them into contact with aspects of the European Union and its institutions *The New World Architecture* Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU's external relations department was high on the list *The New World Architecture* explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union *Constitutional Principles of EU External Relations* Geert De Baere, G. de Baere, 2008 This book explores how foreign policy fits within the complex constitutional structure of the EU providing both an analysis of the constitutional reality of EU foreign policy and a theoretical analysis suggesting possibilities for reform **The Institutions of the**

The United States, the European Union, and the Globalization of World Trade Thomas C. Fischer, 2000-04-30 Professor Fischer presents a comprehensive overview of global trade at the start of a new century from a national regional and international viewpoint He looks closely at the four dominant and competing economic systems the United States the European Union Japan and China and argues that the traditional we win you lose national trade paradigm has been replaced by one that is more collaborative one that is leaning toward de facto world governance He compares foreigners attitudes toward trade and markets with our own using four economic models that typify world trade today He examines the interface between national regional and international trading systems and between business and government then at the prospect of global trade management in different trade sectors under the GATT WTO and other organizations The result is a provocative discussion of global trade today Professor Fischer makes it clear that the United States needs allies Though its influence in the world trade arena will continue America's hegemony has ended The European Union is America's most obvious ally but it has many problems and ambitions of its own The North American Free Trade Agreement has solidified the North American market but it may isolate and lose South America while Japan China Russia and others are left to develop alliances of their own All these factors raise important global questions among them Can American capitalism prevail Should the United States proceed unilaterally as it has so often Or are regional and multinational arrangements preferable If there is further globalization as seems inevitable and if American influence is on the wane what group or organization will lead To explore these questions and provide the beginnings of answers Professor Fischer uses his four competing economic systems and handicaps the process country by country sector by sector with particular attention to transatlantic relations

The Role of Small States in the European Union Baldur Thorhallsson, 2017-03-02 A fully documented text which addresses a key issue of EU decision making which is surfacing again in proposed institutional reforms It looks at the role of smaller states deals with the important criteria of distribution and redistribution of EU budgetary expenditures in the key areas of agriculture and structural funds and explains how smaller states promote their interest more effectively than larger states It focuses on the administrations of small states their relations with the

Commission and their negotiation tactics in the Council This is the first attempt to empirically test Peter Katzenstein's thesis on the role of smaller states in international relations by making important recommendations on how the core assumptions of Katzenstein need to be modified especially when applied to the EU context This work is a good supplementary text book for courses on European studies comparative politics and international relations It is particularly suitable for advanced undergraduates and graduate students Negotiations in the EU Council of Ministers Sandrino Smeets, 2016-01-01 Insiders and outsiders agree there is something particular about negotiating in Brussels This book analyses ten years of continuous negotiations about EU enlargement to the Western Balkans answering questions such as When and how are decisions typically reached in the European Union What is this culture of consensus that pervades negotiations in the Council of Ministers And why are some member states more successful than others in making their voices heard Using the metaphor of the Caucus race from Alice in Wonderland Smeets book offers a fresh perspective on the decision making realities in Brussels European Quarter By providing unique empirical insight into behind closed doors debates it explains the faltering accession process of the countries of former Yugoslavia But most of all it reveals the mechanism by which national interests are accommodated so that deals can be reached between the member states **Globalization and Political Ethics** Richard B. Day, Joseph Masciulli, 2007 This book measures the current institutional and political realities surrounding globalization against philosophical ideals Though the contributors share no particular orthodoxy they do share the conviction that human responsibility is possible in circumstances that often appear to deny human agency The Evolution of EU Law Paul P. Craig, Gráinne De Búrca, 2011 The European Union has undergone major changes in the last decade including Treaty reform and a significant expansion of activity in foreign and security policy and justice and home affairs In the first edition of this influential textbook a team of leading lawyers and political scientists reflected upon the important developments in their chosen area over the time since the EC was formed This new edition continues this analysis ten years on Taking into account the social and political background and without losing sight of the changes that came before in each chapter the contributors analyze the principle themes and assess the legal and political forces that have shaped its development Each author addresses a specific topic event or theme from the European Court of Justice to Treaty reform the enlargement of the EU to administrative law the effect of EU law on culture to climate change Together the chapters tell the story of the rapid development of EU law its past present and future
