The Law School Global Issues Local Questions

William Felstiner

The Law School Global Issues Local Questions:

The Law School - Global Issues, Local Questions Fiona Cownie, 2019-01-04 First published in 1999 this international collection of essays on legal education addresses the following issues The Law School and the University Research into legal education has often been regarded as a marginal activity as compared with research into substantive areas of law However recent years have seen a growing interest in discussions about the purpose of the university law school and the ways in which law is taught within it Are we educating professional lawyers or legal scholars What do we really mean when we say we want to offer a liberal education in the law What effect are the current changes in higher education funding and policy having on law schools and what takes place within them The international group of scholars who have contributed to this collection come from very different jurisdictions but they have written about topics which while they have local resonances are of concern globally Global Issues Local Questions addresses matters which concern all law teachers whatever their field of substantive legal expertise The Law School Fiona Cownie, 2018

Privatising the Public University Margaret Thornton, 2011-09-12 Privatising the Public University The Case of Law is the first full length critical study examining the impact of the dramatic reforms that have swept through universities over the last two decades Men, Law and Gender Richard Collier, 2010-04-05 What does it mean to speak of men as a gender category in relation to law How does law relate to masculinities This book presents the first comprehensive overview and critical assessment of the relationship between men law and gender outlining the contours of the man of law across diverse areas of legal and social policy Written in a theoretically informed yet accessible style Men Law and Gender provides an introduction to the study of law and masculinities whilst calling for a richer more nuanced conceptual framework in which men's legal practices and subjectivities might be approached Building on recent sociological work concerned with the relational nature of gender and personal life Richard Collier argues that social cultural and economic changes have reshaped ideas about men and masculinities in ways that have significant implications for law Bringing together voices and disciplines that are rarely considered together he explores the way ideas about men have been contested and politicised in the legal arena Including original empirical studies of male lawyers the legal profession and fathers rights and law reform alongside discussions of university law schools and legal academics and family policy and parenting cultures this innovative timely and important text provides a unique and important insight into the relationship between law men and masculinities It will be required reading for academics and students in law and legal theory socio legal studies gender studies sociology and social policy as well as policy makers and others concerned with the changing nature of gender relations

The Calling of Law Fiona Westwood, Karen Barton, 2016-04-01 As one of the learned professions requiring advanced learning and high principles law enjoys a special standing in society In return for its status and rank the legal profession is expected to exhibit the highest levels of honesty trust and morality the very values which underpin the legal system itself This in turn entrusts to legal education a particular

problem of addressing not only the substantive elements of the body of law but a means through which the characteristics of the calling of law are imparted and instilled At a time when the very essence of the legal profession is under threat this book calls for a realignment of the legal curriculum and pedagogies so as to emphasise the development of culture over industry character over eloquence and calling over skill Chapters are grouped around the core content and key themes of Curiosity Calling Character and Conscientiousness Contract and Culture The volume includes contributions from leading experts drawn internationally and from other professional disciplines in order to present alternative approaches aimed at tackling common issues providing insight and provoking debate *China's Legal Reform* Keyuan Zou,2006 China's entry into the World Trade Organization WTO has had a tremendous impact on the development and reform of China's legal system This book focuses on the developments of China's legal system as well as its reform in the context of globalization It covers various topics including constitutional changes law based administration and more **Globalisation and the Western**

Legal Tradition David B. Goldman,2008-02-07 What can globalisation teach us about law in the Western tradition This important new work seeks to explore that question by analysing key ideas and events in the Western legal tradition including the Papal Revolution the Protestant Reformations and the Enlightenment Addressing the role of law morality and politics it looks at the creation of orders which offer the possibility for global harmony in particular the United Nations and the European Union It also considers the unification of international commercial laws in the attempt to understand Western law in a time of accelerating cultural interconnections The title will appeal to scholars of legal history and globalisation as well as students of jurisprudence and all those trying to understand globalisation and the Western dynamic of law and authority

The Public Understanding of Law Peter Smith,2025-05-14 This insightful book discusses how law schools engage with the public to develop their understanding of the law It shows that effective engagement necessitates recognising the people involved as a shared community working towards both individual and collective goals *At the Edge of Law* Andrew Francis,2011 *At the Edge of Law* presents an analysis of the changing nature of contemporary legal professionalism It employs a methodological approach and presents a series of case studies built on original empirical research It focuses on those operating at the margins of legal professionalism in England and Wales and also includes comparative material on the US and Canada *Women, Their Lives, and the Law* Victoria Barnes,Nora Honkala,Sally Wheeler,2023-12-14 This collection of essays honours Rosemary Auchmuty Professor of Law at the University of Reading UK She has fostered the study of women's academic careers and more politically advanced progress on gender and equality issues including same sex marriage and property law Her research promotes the case of feminist legal history as a way of revealing the place of women and challenging dominant historical narratives that cast them aside Just as Rosemary's work does the book seeks to end the marginalisation and exclusion of women in the legal world by including them The book begins fittingly with a discussion of Miss Bebb the woman whose biography Auchmuty deployed to push feminist legal history into the mainstream It turns then

to a discussion of women known and unknown and their struggles within the legal profession offering within those chapters a critical appraisal of the role of history and biography as a methodology From there it moves to consider feminist perspectives and critiques of the dominant structures of private law This is followed by chapters that explore those who educate the legal profession within the academy The chapters and the collection as a whole examine areas of law that have a deep significance for women s lives

The Global Evolution of Clinical Legal Education Richard J. Wilson,2018 Clinical legal education has revolutionized legal education from its deepest origins in the nineteenth century to its now global reach Readings in Law and Popular Culture Steven Greenfield,Guy Osborn,2007-05-07 Fascinating and varied this is the first book to bring together high quality research with an emphasis on context from key researchers working at the cutting edge of both law and cultural disciplines

Legal Academics Fiona Cownie,2004-01-23 This detailed study of the lived experience of legal academics explores not only the culture of legal academia and the professional identities of law teachers but also addresses some of the most pressing issues currently facing the discipline of law Given the diverse nature of contemporary legal scholarship where does the future lie With traditional doctrinalism socio legal studies or critical scholarship What does academic law have to offer its students the legal profession and the wider society How do legal academics embody themselves as law teachers and how does this affect the nature of the law they teach and study In the context of the RAE the QAA and all the other pressures facing universities legal academics discuss the realities of contemporary legal academia in the UK

Conversations, Choices and Chances Anthony Bradney,2003-04-07 Most academics in university law schools would claim to offer a liberal education Few have thought very much about what a liberal education in law means Basing itself on a detailed examination of the theory of liberal education this book looks at what the liberal university law school should be doing in terms of its teaching research and administration

Transforming Legal Education Paul Maharg,2016-12-05 Paul Maharg presents a critical inquiry into the identity and possibilities of legal education and an exploration of transformational alternatives to our current theories and practices of teaching and learning the law His work takes the view that bodies of interdisciplinary theory and knowledge of the history of legal education are important to all stages of legal education He also argues that new learning designs such as transactional learning need to be developed to help students educators and lawyers deal with the transitions and challenges facing them now and in the foreseeable future Throughout discussions of theory are spliced with case studies of academic and professional legal learning particularly in the field of technology enhanced learning The content of the book will be updated in a community of practice wiki at <http://www.transforming.org.uk> which will also allow readers to comment and expand on the book s final chapter

Rules and Networks Richard Appelbaum,William Felstiner,Volkmar Gessner,2001-12-21 International business transactions are heavily influenced by culture practice and rule The pursuit of business relationships within nation states can be subject to differences in the generation of norms and the processing of disputes but these conflicts are magnified many times over in

cross border transactions where nation state control and support is weak or absent This book seeks different explanations of the ways in which business people and their legal advisers try to minimise the effect of these magnified difficulties At the outset the editors suggest four sources through which the international business community might be considered to have supplemented nation state conflict prevention and dispute resolution institutions an international legal order the development of a private normative order based on common business practices denominated the *lex mercatoria* through the efforts and work product of internationalised law firms and by means of extensive thick personal relationships often referred to by their Chinese term *guanxi* Since most explanations are dominated by North American and European legal scholarship and practice a second concern of this book is to open up the discussion to competing explanatory frameworks Specifically it develops the notion that global legal convergence may not be the immediate inevitable result of increased global economic interaction Rather less formal mechanisms for achieving normative understanding and predictability in business dealings may also flourish

Elgar Concise Encyclopedia of Legal Education Fiona Cownie, Anthony Bradney, Emma Jones, 2025-01-09 This Concise Encyclopedia provides a thorough overview of legal education and explores diverse topics including the use of digital skills in law schools and the intersection between law and economics and law and humanities Carefully curated it presents an invaluable survey of legal pedagogy

The Globalization of Legal Education Bryant G. Garth, Gregory C. Shaffer, 2022 Legal academics and practitioners in recent decades increasingly emphasize the so called globalization of legal education The diffusion of the Juris Doctor JD degree to Australia Hong Kong Japan and South Korea as well as the advent of a very similar Juris Master JM degree in China and a shift in the late 1980s and beyond to a new US influenced format in India exemplify shifts toward US legal education practices Flood 2014 The global and Americanizing trend is evident on the web sites of law schools around the globe with many law schools competing to be the most global in terms of their faculty curricula teaching methods and students Less pronounced but related to the literature on legal globalization is that on transnationalization and transnational processes which is a strong component of the move toward globalization in legal education As this book shows if we look to see what is celebrated as part of globalized law schools and faculties we see increased cross border flows of professors and students teaching of transnational legal subjects development of particular forms of teaching practice such as legal clinics explicit focus on transnational rankings and transnationalized scholarly communities sharing teaching and research methods and approaches across domains of law

The Teaching of Criminal Law Kris Gledhill, Ben Livings, 2016-08-19 The Teaching of Criminal Law provides the first considered discussion of the pedagogy that should inform the teaching of criminal law It originates from a survey of criminal law courses in different parts of the English speaking world which showed significant similarity across countries and over time It also showed that many aspects of substantive law are neglected This prompted the question of whether any real consideration had been given to criminal law course design This book seeks to provide a critical mass of thought on how to secure an understanding of

substantive criminal law by examining the course content that best illustrates the thought process of a criminal lawyer by presenting innovative approaches for securing active learning by students and by demonstrating how criminal law can secure other worthwhile graduate attributes by introducing wider contexts This edited collection brings together contributions from academic teachers of criminal law from Australia New Zealand the United Kingdom and Ireland who have considered issues of course design and often implemented them Together they examine several innovative approaches to the teaching of criminal law that have been adopted in a number of law schools around the world both in teaching methodology and substantive content The authors offer numerous suggestions for the design of a criminal law course that will ensure students gain useful insights into criminal law and its role in society This book helps fill the gap in research into criminal law pedagogy and demonstrates that there are alternative ways of delivering this core part of the law degree As such this book will be of key interest to researchers academics and lecturers in the fields of criminal law pedagogy and teaching methods

Reorganization and Resistance William Felstiner, 2005-12-19 Reorganization and Resistance analyses the ways in which the legal professions of nine countries England France the Netherlands Germany Canada the US Mexico Australia and Korea and one continent South America have confronted the internal and external political economic and social upheavals of the past twenty years It documents how change and resistance are inextricably tied together in an oppositional tension where the greater weight shifts gradually from one to the other even shifts backwards at times but in the long view runs in the direction of change The most obvious instance almost everywhere is the struggle of women in legal professions where improvement is undeniable even as resistance is varied and stiff The book charts the way demographic shifts have changed the work of lawyers the way that the revenue from law practice has been re distributed and the extent to which barriers based on race class religion and gender have shrunk or shifted It describes how some professions have been forced by government or co regulation with government to reorganize It also documents how others have not kept pace with transformations in the economy and changes and challenges to legal education take center stage while demographic shifts and institutional reorganization are of much less importance

Delve into the emotional tapestry woven by Emotional Journey with in Dive into the Emotion of **The Law School Global Ibues Local Questions** . This ebook, available for download in a PDF format (PDF Size: *), is more than just words on a page; itis a journey of connection and profound emotion.
