The Meaning Of The City:

The Meaning of the City Jacques Ellul, 2011-06-17 Jacques Ellul a former member of a Law Faculty at the University of Bordeaux was recognized as a brilliant and penetrating commentator on the relationship between theology and sociology In the Meaning of the City he presents what he finds in the Bible a sophisticated coherent theology of the city fully applicable to today's urbanized society Ellul believes that the city symbolizes the supreme work of man and as such represents man's ultimate rejection of God Therefore it is the city where lies man's rebellious heart that must be reformed The author stresses the fact that the Bible does not find man's fulfillment in a return to an idyllic Eden but points rather to a life of communion with the Savior in the city transfigured The Meaning of the City says John Wilkinson in his introductory essay to the book is the theological counterpoint to Ellul's Technological Society a work that analyzed the phenomenon of the autonomous and totally manipulative post industrial world Ellul takes issue with those who idealistically plan new urban environments for man as though man alone can negate the inherent diabolism of the city For Ellul the history of the city from the times of Cain and Nimrod through to Babylon and Jerusalem reveals a tendency to destroy the human being for the sake of human works Nevertheless continuing the theme of the tension between two realities that characterizes all his works Ellul sees God as electing the city as itself an instrument of grace for the believer William Stringfellow describes The Meaning of the City as a book of startling significance which should rank beside Reinhold Niebuhr's Moral Man and Immoral Society as a work of truly momentous potential Douglass D McFerran adds that it is a book worth serious consideration by anyone interested in the relationship between religious commitment and secular involvement And John Wilkinson sums it up There are very few convincingly religious analyses of the sociological phenomena of the present day Ellul's biblically based sociology is today furnishing the matter for a large and growing group of social protestants particularly in the United States

The Meaning of the City Jacques Ellul, 1973 *The City in Literature* Richard Lehan, 2023-09-01 This sweeping literary encounter with the Western idea of the city moves from the early novel in England to the apocalyptic cityscapes of Thomas Pynchon Along the way Richard Lehan gathers a rich entourage that includes Daniel Defoe Charles Dickens Emile Zola Bram Stoker Rider Haggard Joseph Conrad James Joyce Theodore Dreiser F Scott Fitzgerald and Raymond Chandler The European city is read against the decline of feudalism and the rise of empire and totalitarianism the American city against the phenomenon of the wilderness the frontier and the rise of the megalopolis and the decentered discontinuous city that followed Throughout this book Lehan pursues a dialectic of order and disorder of cities seeking to impose their presence on the surrounding chaos Rooted in Enlightenment yearnings for reason his journey goes from east to west from Europe to America In the United States the movement is also westward and terminates in Los Angeles a kind of land's end of the imagination in Lehan's words He charts a narrative continuum full of constructs that represent a cycle of hope and despair of historical optimism and pessimism Lehan presents sharply etched portrayals of the correlation between rationalism and capitalism of the rise of the

city the decline of the landed estate and the formation of the gothic and of the emergence of the city and the appearance of other genres such as detective narrative and fantasy literature He also mines disciplines such as urban studies architecture economics and philosophy uncovering material that makes his study a lively read not only for those interested in literature but for anyone intrigued by the meanings and mysteries of urban life This sweeping literary encounter with the Western idea of the city moves from the early novel in England to the apocalyptic cityscapes of Thomas Pynchon Along the way Richard Lehan gathers a rich entourage that includes Daniel Defoe Charles Dickens Em The Meaning of the City ,1970

Imaging the City Lawrence J. Vale, Sam Bass Warner Jr., 2021-12-16 Planners face a controversial task because their professional role requires them to be spokespersons for the public interest In a welter of conflicting pictures and voices how might the public interest be discovered Once identified how might it be expressed so that competing publics attend to it There are no easy answers but the experience of planners today suggests ways of working and innovations of promise The focus on planning practice prompted the editors to analyze images that are now at work in our cities For Vale and Warner all city design and constructions offer material that people should include in images of their environment The built and building city are part of the experience of all city dwellers it is theirs to incorporate interpret or ignore Essays included in this text trace the interplay between physical objects of planners and architects and the social experience and outlooks of image makers and their audiences Imaging the City explores urban image making from civic boosterism of medieval cities to iconic imagery of Times Square Vale and Warner bring together urban historians geographers city planners architects and cultural commentators to analyze the creation of urban imagery from the signature skyscrapers of Kuala Lumpur to the re creation of the South Bronx and the use of city images in film literature television and on the Internet Urban dwellers urban planners architects municipal officials sociologists urban historians all will perceive their worlds with a heightened sense of awareness after reading this book *Imaginative Structure of the City* Alan Blum, 2003-05-07 Blum s distinctive form of theoretical inquiry pushes the reader to move beyond conventional ways of thinking about familiar urban issues in answering such fundamental questions as How does a city exist How do its inhabitants define their relationship to it Who is entitled to speak for it What is its symbolic nature In what way does the city function as a focus of attempts to resolve social problems such as alienation participation and community In what ways do night and nighttime affect our relationship to it How is it possible to speak of a city as both exciting and alienating **Code of Ordinances of the City of New York** New York (N.Y.), 1908

The Power of Culture in City Planning Tom

Borrup, 2020-11-29 The Power of Culture in City Planning focuses on human diversity strengths needs and ways of living together in geographic communities The book turns attention to the anthropological definition of culture encouraging planners in both urban and cultural planning to focus on characteristics of humanity in all their variety It calls for a paradigm shift re positioning city planners base maps to start with a richer understanding of human cultures Borrup argues for cultural master plans in parallel to transportation housing parks and other specialized plans while also changing the approach of city comprehensive planning to put people or users first rather than land uses as does the dominant practice Cultural plans as currently conceived are not sufficient to help cities keep pace with dizzying impacts of globalization immigration and rapidly changing cultural interests Cultural planners need to up their game and enriching their own and city planners cultural competencies is only one step Both planning practices have much to learn from one another and already overlap in more ways than most recognize This book highlights some of the strengths of the lesser known practice of cultural planning to help forge greater understanding and collaboration between the two practices empowering city planners with new tools to bring about more equitable communities This will be an important resource for students teachers and practitioners of city and cultural planning as well as municipal policymakers of all stripes
