Men, Machines, and Modern Times, 50th Anniversary Edition Elting E. Morison, 2016-08-26 An engaging look at how we have learned to live with innovation and new technologies through history People have had trouble adapting to new technology ever since perhaps the inventor of the wheel had to explain that a wheelbarrow could carry more than a person This little book by a celebrated MIT professor the fiftieth anniversary edition of a classic describes how we learn to live and work with innovation Elting Morison considers among other things the three stages of users resistance to change ignoring it rational rebuttal and name calling He recounts the illustrative anecdote of the World War II artillerymen who stood still to hold the horses despite the fact that the guns were now hitched to trucks reassuring those of us who have trouble with a new interface or a software upgrade that we are not the first to encounter such problems Morison offers an entertaining series of historical accounts to highlight his major theme the nature of technological change and society s reaction to that change He begins with resistance to innovation in the U S Navy following an officer s discovery of a more accurate way to fire a gun at sea continues with thoughts about bureaucracy paperwork and card files touches on rumble seats the ghost in Hamlet and computers tells the strange history of a new model steamship in the 1860s and describes the development of the Bessemer steel process Each instance teaches a lesson about the more profound and current problem of how to organize and manage systems of ideas energies and machinery so that it will conform to the human dimension **Catalog of Copyright Entries.**

Clocks Steel rails Copper communication cables Photographic film Light bulbs Hard disks Scientific labware Silicon chips Ramirez tells the stories of the woman who sold time the inventor who inspired Edison and the hotheaded undertaker whose invention pointed the way to the computer She describes how our pursuit of precision in timepieces changed how we sleep how the railroad helped commercialize Christmas how the necessary brevity of the telegram influenced Hemingway's writing style and how a young chemist exposed the use of Polaroid's cameras to create passbooks to track black citizens in apartheid South Africa These fascinating and inspiring stories offer new perspectives on our relationships with technologies Ramirez shows not only how materials were shaped by inventors but also how those materials shaped culture chronicling each invention and its consequences intended and unintended Filling in the gaps left by other books about technology Ramirez showcases little known inventors particularly people of color and women who had a significant impact but whose accomplishments have been hidden by mythmaking bias and convention Doing so she shows us the power of telling inclusive stories about technology She also shows that innovation is universal whether it's splicing beats with two turntables and a microphone or splicing genes with two test tubes and CRISPR
