provide an adequate flight envelope Nevertheless Manchesters entered service without adequate type testing leading to four groundings in the first ten months of use Aircrews were faced with airframe and engine challenges and the Manchester continued to evolve as the war was being fought Despite this seven RAF squadrons would eventually use 202 Manchesters with 538 Vultures on 1 260 sorties Manchesters may have contributed to Bomber Command failures as set out in the Butt Report of August 1941 but they also contributed to its success in denying German capital ships the naval base at Brest Bomber Command's persistence with the type was soon shown to be wise as the Manchester was developed into the famous and war winning Avro Lancaster This second edition of *The Avro Manchester The Legend Behind the Lancaster* retains the keen analysis and gripping narrative of the first but it also fills many gaps revises key passages and provides six appendices for references It is richly illustrated with 200 images many of which are previously unpublished Illustrations 190 black and white photographs
