

The Mightiest Of Them All Grand Coulee Dam

Donald E. Wolf

The Mightiest Of Them All Grand Coulee Dam:

The Mightiest of Them All L. Vaughn Downs, 1993-01-01 The Mightiest of Them All Memories of Grand Coulee Dam presents the experiences of L Vaughn Downs from the time he started working on the dam when it was in the design stage through the construction period and into many years of actual dam operation and maintenance He provides glimpses into the personalities connected with the project and explains the many techniques and pieces of equipment that were developed or improved as the dam was built Downs also devotes considerable attention to problems they encountered and the solutions developed in the hope that others will learn from these situations This revised edition brings the story up to the current period with an examination of the upkeep and condition of the dam after 50 years and its prospects for the future Engineers architects and interested general readers will feel the thrill of this extraordinary dam as the informative text and bounty of photographs illustrate various stages of construction and the dramatic rates of progress attained **Grand Coulee** Paul C. Pitzer, 2021-09-24 Accolades freely and frequently lavished on Grand Coulee Dam and the Columbia Basin Irrigation Project included The Biggest Thing on Earth The Eighth Wonder of the World and The Largest Reclamation Project Ever Undertaken They highlight a monumental construction effort that spanned the 1930s through the 1980s Now for the first time the story of this gigantic undertaking is told in this definitive history When completed the eleven million cubic yard monolith at Grand Coulee on the Columbia River in north central Washington became the largest single block of concrete ever laid and provided an abundance of electricity that helped win World War II Still one of the world s largest energy producing stations it is at the heart of a dynamic power grid that supplies all of the western United States with energy The product of a long struggle over how to irrigate the Columbia Basin Grand Coulee Dam resulted from the visions of eastern Washington residents people like Wenatchee editor Rufus Woods and members of the Spokane Chamber of Commerce who saw the undertaking as a dynamic plan to bring prosperity to their region Yet today the reclamation enterprise more than half a century after construction began stands only half finished Its future depends on the nation s need for food and the willingness of the public to pay the rapidly spiraling economic and environmental costs associated with such large scale irrigation plans The fight for Grand Coulee Dam and the story of its construction is a vital and animated saga of people striving for dazzling goals and then working often against both each other and nature to build something spectacular They accomplished their goal against the backdrop of the worst economic depression in the nation s history The dam and the extensive irrigation network it supports stands today as a monument to their dreams and their labors *Big Dams of the New Deal Era* David P. Billington, Donald C. Jackson, 2017-04-20 The massive dams of the American West were designed to serve multiple purposes improving navigation irrigating crops storing water controlling floods and generating hydroelectricity Their construction also put thousands of people to work during the Great Depression Only later did the dams baneful effects on river ecologies spark public debate *Big Dams of the New Deal Era* tells how major water storage structures were erected in four western river basins David P

Billington and Donald C Jackson reveal how engineering science regional and national politics perceived public needs and a river's natural features intertwined to create distinctive dams within each region. In particular, the authors describe how two federal agencies, the Army Corps of Engineers and the Bureau of Reclamation, became key players in the creation of these important public works. By illuminating the mathematical analysis that supported large-scale dam construction, the authors also describe how and why engineers in the 1930s most often opted for massive gravity dams whose design required enormous quantities of concrete or earth-rock fill for stability. Richly illustrated, *Big Dams of the New Deal Era* offers a compelling account of how major dams in the New Deal era restructured the landscape both politically and physically and why American society in the 1930s embraced them wholeheartedly. **Currents and Undercurrents** Kathryn L. McKay, Nancy F. Renk, 2002 *Dam Nation* Stephen Grace, 2013-05-07 In the scramble to claim water rights in the West during the fevered days of early emigration and expansion, running out of water was rarely a concern, and the dam-building fever that transformed the West in the 19th and 20th centuries created a map of the region that may be unsustainable. Throughout the arid American West, metropolitan areas such as Los Angeles, Phoenix, Las Vegas, and Denver need water. These cities are growing, but water supplies are dwindling. Scientists agree that the West is heating up and drying out, leading to future water shortages that will pose a challenge to existing laws. *Dam Nation* looks first to the past, to the stories of the California gold rush and the earliest attempts by men to shape the landscape and tame it. It takes us to the Great American Desert and the settlement of the West under the theory that rain follows the plow, and then takes on the ongoing legal and moral battles in the West. Author Stephen Grace is a novelist, a storyteller, and the author of several non-fiction books on Colorado. He weaves the facts into a compelling narrative that informs, entertains, and tells an important story. [The History of Large Federal Dams](#) David P. Billington, Donald C. Jackson, Martin V. Melosi, 2005 Explores the story of Federal contributions to dam planning, design, and construction. [The Atomic West](#) Bruce W. Hevly, John M. Findlay, 2011-12-01 The Manhattan Project, the World War II race to produce an atomic bomb, transformed the entire country in myriad ways, but it did not affect each region equally. Acting on an enduring perception of the American West as an empty place, the U.S. government located a disproportionate number of nuclear facilities, particularly the ones most likely to spread pollution in western states. The Manhattan Project manufactured plutonium at Hanford, Washington; designed and assembled bombs at Los Alamos, New Mexico; and detonated the world's first atomic bomb at Alamogordo, New Mexico, on June 16, 1945. In the years that followed the war, the U.S. Atomic Energy Commission selected additional western sites for its work. Many westerners initially welcomed the atom. Like federal officials, they too regarded their region as empty or underdeveloped. Facilities to make test and base atomic weapons, sites to store nuclear waste, and even nuclear power plants were regarded as assets. By the 1960s and 1970s, however, regional attitudes began to change. At a variety of locales, ranging from Eskimo, Alaska, to Mormon, Utah, westerners devoted themselves to resisting the atom and its effects on their environments and

communities Just as the atomic age had dawned in the American West so its artificial sun began to set there The Atomic West brings together contributions from several disciplines to explore the impact on the West of the development of atomic power from wartime secrecy and initial postwar enthusiasm to public doubts and protest in the 1970s and 1980s An impressive example of the benefits of interdisciplinary studies on complex topics The Atomic West advances our understanding of both regional history and the history of science and does so with human communities as a significant focal point The book will be of special interest to students and experts on the American West environmental history and the history of science and technology

Big Dams and Other Dreams Donald E. Wolf, 1996 Explores the businesses and personalities responsible for the construction of the Hoover Bonneville and Grand Coulee dams

Global Energy Justice Benjamin K. Sovacool, Michael H. Dworkin, 2014-10-02 This book explores how the idea of justice can give us a way to better assess and resolve energy challenges and problems

River Lost Blaine Harden, 1997-11-04 Details the destruction of the Columbia River in the Pacific Northwest by well intentioned Americans who saw only the benefits of the dam building power plant and irrigation projects not realizing the longterm effects of killing the river
