Dietmar Froehlich,2018-04-09 Architecture and film have many things in common Film narratives are embedded in scenes that visually support the story Sometimes architecture even performs the role of an actor Conversely film with its multifaceted changing atmospheres reveals new layers of architecture which outside the cinema would remain concealed In conclusion film as a mass medium influences the way architecture is perceived and its image in society Since the beginning of cinema architecture has formed a symbiosis with film With its systematic analysis this book offers a scientifically researched history of mutual influence starting with filmography as a typology of well known film sets through to the description of the chameleon effect between film and architecture Gender in Science Fiction Films, 1964-1979 Bonnie Noonan,2015-06-08 The 1950s era of science fiction film effectively ended when space flight became a reality with the first manned orbit of Earth in 1962 As the genre s wildly speculative depictions of science and technology gave way to more reality based representations relations between male and female characters reflected the changing political and social climates of the era Drawing on critical analyses film reviews and cultural commentaries this book examines the development of science fiction film and its representations of gender from the groundbreaking films of 1968 including 2001 A Space Odyssey Barbarella and Planet of the Apes through its often overlooked Middle Period which includes such films as Colossus The Forbin Project 1970 The Stepford Wives 1975 and A Boy and His Dog 1975 The author examines intersections of gender and race in The Omega Man 1971 and Frogs 1972 gender and dystopia in Soylent Green 1973 and Logan s Run 1976 and gender and computers in Demon Seed 1977 The big budget films of the late 1970s Close Encounters of the Third Kind Alien and Star Wars are also discussed **Irwin Allen Television Productions, 1964-1970** Jon Abbott,2015-06-14 Before establishing himself as the master of disaster with the 1970s films The Poseidon Adventure and The Towering Inferno Irwin

Allen created four of television's most exciting and enduring science fiction series: *Voyage to the Bottom of the Sea*, *Lost in Space*, *The Time Tunnel*, and *Land of the Giants*. These 1960s series were full of Allen's favorite tricks, techniques, and characteristic touches and influenced other productions from the original *Star Trek* forward. Every science fiction show owes something to Allen; yet none has equaled his series' pace, excitement, or originality. This detailed examination and documentation of the premise and origin of the four shows offers an objective evaluation of every episode and demonstrates that when Irwin Allen's television episodes were good, they were great, and when they were bad, they were still terrific fun.

Damn You, Entropy! Guy P. Harrison, 2024-06-04 Science fiction has hosted some of the greatest minds and most innovative thinkers in human history. From H. G. Wells to Octavia Butler, *Star Trek* to *Star Wars*, in books, on television, and at the movies, science fiction has shaped our future, pushed the limits of human imagination, and guided us within ourselves to examine universal truths of life. In this smartly curated book, author Guy P. Harrison collects 1,001 of the most influential and transformative quotations spanning four centuries of sci-fi, such as "Better to make a good future than predict a bad one" (Isaac Asimov, *Prelude to Foundation*, 1988), "clouds observation" (Frank Herbert, *Dune*, 1965), "No amount of money ever bought a second of time" (Avengers, *Endgame*, 2019 film, written by Christopher Markus and Stephen McFeely). Whether you are a Dr. Who superfan, a diehard sci-fi reader, or an outer space film buff, or are simply curious about the cosmos, *Damn You, Entropy!* is an essential addition to every science fiction fan's library.

Science Fiction Literature through History Gary Westfahl, 2021-07-19 This book provides students and other interested readers with a comprehensive survey of science fiction history and numerous essays addressing major science fiction topics, authors, works, and subgenres, written by a distinguished scholar. This encyclopedia deals with written science fiction in all of its forms, not only novels and short stories but also mediums often ignored in other reference books, such as plays, poems, comic books, and graphic novels. Some science fiction films, television programs, and video games are also mentioned, particularly when they are relevant to written texts. Its focus is on science fiction in the English language, though due attention is given to international authors whose works have been frequently translated into English. Since science fiction became a recognized genre and greatly expanded in the 20th century, works published in the 20th and 21st centuries are most frequently discussed, though important earlier works are not neglected. The texts are designed to be helpful to numerous readers, ranging from students first encountering science fiction to experienced scholars in the field.

Star Trek: The Original Topps Trading Card Series Terry J. Erdmann, Paula M. Block, 2013-09-24 A visual compilation of all 88 trading cards for *Star Trek* fans and collectors of TV memorabilia. Since *Star Trek* first aired on television in 1966, the series has had an incredible influence on pop culture. In 1976, with the show's rising popularity in syndication, the Topps Company released a series of collectible trading cards featuring full-color images from the classic television series created by Gene Roddenberry, as well as synopses and stats on the cast and crew of the *Starship Enterprise*.
