Multidisciplinary Teaching Atlas of the Pancreas Javier Casillas, Joe U. Levi, Alexander O. Quiroz, Roberto Ruiz-Cordero, Monica T. Garcia-Buitrago, Danny Sleeman, 2015-10-28

This innovative teaching atlas provides the reader with a practical approach to the diagnosis and management of the common and uncommon diseases that may involve the pancreatic gland. Its perspective is multidisciplinary, the authors being radiologists, surgeons, pathologists and gastroenterologists who have worked together for the past 25 years. Very concise descriptions of clinical presentation, pathology, imaging and management are provided for a great variety of pathologic conditions and a wealth of illustrative material displays intraoperative appearances, gross specimens, histology and radiological findings. Pancreatic surgery, including transplantation, is also discussed and the final chapter presents a gallery of challenging and diverse cases. Specialists and residents in a range of specialties will find this atlas to be an invaluable aid and it will also serve as an excellent reference for medical students. *The Anatomy of the Human Body* Jean Cruveilhier, 1844

Transplantation of the Pancreas Rainer W. G. Gruessner, Angelika C. Gruessner, 2023-09-21. Now in its fully revised and expanded second edition, this textbook remains the definitive resource on pancreas transplantation. Enlarged, updated and improved, it consists of 93 chapters over 11 sections with chapter authors who are recognized international leaders in their fields and represent institutions from five continents. Since the publication of the original edition in 2004, substantial progress has been made in the field of pancreas transplantation, specifically in regard to standardization of operative techniques and immunosuppression, significant improvements in patient and graft survival rates and improved diagnosis and therapy of graft rejection and recurrence of disease. Pancreas transplants are no longer primarily performed in the USA and Europe for Type 1 diabetes mellitus; over the past 15 years, they have been performed with increasing frequency worldwide and also for Type 2 diabetes mellitus. The new edition of this textbook covers all aspects of pancreas transplantation: indications, recipient categories, surgical donor and recipient techniques, living donor transplantation, postoperative management and follow up, post transplant complications and malignancies, immunosuppression treatment and diagnosis of rejection, impact on endocrine function and secondary complications of diabetes, recurrence of disease, quality of life, economic issues and overall outcome results. In addition, state-of-the-art chapters focus on the classification, epidemiology and pathogenesis of Type 1 and 2 diabetes mellitus as well as on other beta cell replacement therapies including islet auto and allo transplantation. This textbook is the primary reference on pancreas transplantation for transplant surgeons, established and in training pancreas and HPB surgeons, diabetologists, endocrinologists, gastroenterologists, pancreatologists and other health professionals with a focus on transplantation and diabetes, cardiologists, neurologists, urologists, ophthalmologists. **Radiology of the Pancreas** Albert L. Baert, Guy Delorme, L. van Hoe, 1999. *Radiology of the Pancreas* discusses the diagnostic role of the various imaging modalities currently available for the assessment of pancreatic anatomy and disease. In comparison with the first edition, new technical developments, helical CT, ultrafast magnetic resonance imaging, color Doppler ultrasound, laparoscopic ultrasound, have been included and several chapters have been significantly expanded. With the aid of numerous illustrations, the normal radiological anatomy, anatomical variants, the typical and atypical radiological features of both common and uncommon

diseases and potential pitfalls are considered in depth All of the chapters have been written by recognized experts in the field and the book should be of value to all radiologists and other specialists who treat patients with pancreatic disease or who have an interest in the subject Diabetes-Related Literature Index by Authors and by Key Words In the Title ,1960 A
