Brunson, 2016-09-10 One fall evening in 1880 Russian painter Ilya Repin welcomed an unexpected visitor to his home Lev Tolstoy The renowned realists talked for hours and Tolstoy turned his critical eye to the sketches in Repin's studio Tolstoy's criticisms would later prompt Repin to reflect on the question of creative expression and conclude that the path to artistic truth is relative dependent on the mode and medium of representation In this original study Molly Brunson traces many such paths that converged to form the tradition of nineteenth century Russian realism a tradition that spanned almost half a century from the youthful projects of the Natural School and the critical realism of the age of reform to the mature masterpieces of Tolstoy Fyodor Dostoevsky and the paintings of the Wanderers Repin chief among them By examining the classics of the tradition Brunson explores the emergence of multiple realisms from the gaps disruptions and doubts that accompany the self-conscious project of representing reality These manifestations of realism are united not by how they look or what they describe but by their shared awareness of the fraught yet critical task of representation By tracing the engagement of literature and painting with aesthetic debates on the sister arts Brunson argues for a conceptualization of realism that transcends artistic media *Russian Realisms* integrates the lesser known tradition of Russian painting with the familiar masterpieces of Russia's great novelists highlighting both the common ground in their struggles for artistic realism and their cultural autonomy and legitimacy This erudite study will appeal to scholars interested in Russian literature and art comparative literature art history and nineteenth century realist movements **Managing Diversity in the Military** James

**How to Treat Persons** Samuel J. Kerstein, 2013-02-21 Samuel J Kerstein develops a new broadly Kantian account of the ethical issues that arise when a person treats another merely as a means that is just uses the other and thereby acts wrongly He takes his inspiration from Immanuel Kant's Formula of Humanity which commands that we treat persons never merely as means but always as ends in themselves and then develops the ideas suggested by the Formula into clear moral principles Kerstein questions the plausibility of an orthodox Kantian account of the dignity of persons before going on to develop a new detailed account of his own Kerstein's second main goal is to show how the Kantian principles he develops shed light on pressing issues in bioethics He investigates how morally speaking scarce resources such as flu vaccine ought to be distributed and he argues that allocating such resources in order to maximize benefits can be inconsistent with respecting persons dignity The book explores the morality of regulated markets in organs and contends that in many contexts buying organs from live donors fails to honour their dignity Finally it probes the ethics of conducting research on anonymized biological samples and of conducting placebo controlled pharmaceutical trials in developing countries How to Treat Persons champions the view that even if an agent gets another's voluntary informed consent to use parts of his body for transplantation or medical research she might nevertheless be treating him merely as a means or failing to respect his dignity

Murray offers a trenchant examination of what moral constraints we can claim concerning death abortion euthanasia and capital punishment sex pornography prostitution and sexual assault beneficence toward present and future people animals and the environment and liberty genetic enhancement organ sales and torture By focusing on evolutionary contractarianism and the epistemic justification of our moral claims or lack thereof Malcolm Murray's *Morals and Consent* is a serious advance in the field of applied ethics and fills an important void *Spectrum* Julie E. *Explanatory Solutions to Skeptical Problems* Kevin McCain, 2025-01-12 Phenomenal Explanationism is a powerful new theory of epistemic justification that combines an explanationist conception of evidential support with an appearance based or phenomenal conception of evidence According to PE epistemic justification is a matter of what best explains our evidence which ultimately consists of appearances It is a complete internalist theory of epistemic justification that delivers on the promises of other appearance based theories while avoiding their pitfalls In *Explanatory Solutions to Skeptical Problems* Kevin McCain expands his previous work on the internalist dimension of the theory to cover external world skepticism He also demonstrates how PE offers solutions to a host of other perennial skeptical problems

including the problem of the criterion the regress of justification memory skepticism and inductive skepticism The promise that PE displays in responding to these problems makes it plain that it is a viable conception of epistemic justification worthy of careful consideration and also that accepting internalism more generally doesn't leave one without reasonable responses to skeptical problems
