The Past Realities Of The Precision Of Reality

Fritz Dufour, MBA, DÉSS

The Past Realities Of The Precision Of Reality:

The Past Realities of the Precision of Reality Rivollo L' Relic Notable, 2005-04-29 This book seeks the reader's willingness and courage to journey into an unknown past which introduces him or her to a memorable yet simple man who encountered many unexpected tragedies in his life which he had no control over. He repeatedly prayed to God in the hope that God would break the silence and provide him with answers to the intriguing question of why death eventually visits everyone. Eventually a charming and unforgettable little girl enters his life and brings him a gift which helps him remove his frustration towards God. This gift teaches him to let go of his anger of the past and replace it with a clear understanding of an amazingly simple purpose of life and straightforward purpose of existence.

The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS, 2020-04-05 This book is organized in seven chapters. Chapter one looks at the origins and the causes of war. The chapter argues that war is a consequence of how we as a species have evolved. War has both endogenous and exogenous causes. While the former depends on our biology and psychology, the latter has to do primarily with international relations. Chapter two makes the case for the paradoxical nature of war. While war takes lives, it is legitimate under certain circumstances. For example, armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means, ethical or not. Chapter three asks if peace among nations is achievable, which is the main theme of this book. However, it does not elaborate on the question entirely. Instead, it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony, arms race and peacebuilding. Chapter four builds on three by looking at realism, idealism and pacifism in international relations. As to pacifism, the chapter attempts to answer the question: what was the most peaceful time in history? Chapter five presents the elements of hope for world peace by considering the role played by the following: 1 the United Nations, 2 the North Atlantic Treaty Organization (NATO), 3 the Organization for Security and Cooperation in Europe (OSCE), 4 the non-governmental organizations (NGOs), 5 the role of nuclear deterrence, 6 globalization, 7 transnationalism, 8 diplomacy, 9 sports, 10 international cooperation in space exploration, 11 the Nobel Prize and 12 the declining of war and violence in modern times. On the other hand, chapter six presents the opposite argument or the barriers to world peace using the following points: 1 the proliferation of nuclear weapons, 2 geoeconomics, 3 terrorism, 4 the global refugee crisis, 5 the profitability of arms sales and 6 the profitability of wars. It makes an interesting argument, especially as to the profitability of wars, by showing how the United States first emerged as an imperial and a world power in the 1890s, then as the only world's superpower after World War II. Finally, chapter seven takes a proactive approach by peering into the future of armed conflict, which is likely to take place in new environments: Cyberspace, the littoral choke points near space and increasingly in expanding cities or slums. War. The chapter concludes with a discussion on the Doomsday Clock, a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents

the likelihood of a man made global catastrophe **The Human Civilization** Valentin Matcas,2016-04-20 Were there advanced civilizations on Earth older than what it is currently believed and accepted Because we keep noticing their traces everywhere while authorities deny their presence Are there other civilizations out there among planets and stars Because we keep seeing their people around here pursuing their obscure interests with authorities ignoring everything Are there nonhuman civilizations on Earth in parallel with the human civilization Because they interact from the shadow of the underground with the human civilization while again authorities deny systematically their presence And when authorities are constrained in any way to give an answer they state vaguely that it is a matter of human survival And how can humans defend themselves of anyone and anything as they are held in ignorance and denial Is there life after death Because countless of people had died and came back to tell their story and it is always consistent This implies the existence of higher extraordinary civilizations in parallel with the human civilization from above These higher civilizations could be possible since their niches of life and existence are accurate and already present within other realities Science and academia ignore this topic entirely ridiculing all seekers of higher truth and forcing them in this manner to stop their research What can there be more important to know in this world than the meaning of life itself the meaning of this entire human civilization along with the meaning of the lives and existence of all humans here in this world and in all higher worlds Why postponing disclosure if it is imperative for people s wider existence Who profits and who loses through this entire coverup Who exactly controls the current human authority Why is humanity kept ignorant in what it concerns the most important subject of all life everywhere and life eternally intelligent and civilized life Because if there are other civilizations on Earth and elsewhere human or not if there are other realities up there besides this one populated and civilized then people s ignorance renders them vulnerable when they die and have to go elsewhere In this manner once you ignore the kind of realities that may be out there you might be tricked to go and live in treacherous dubious unholy worlds claiming that they are in fact the holly lands promised to you by your own religion And so you disappear Because it is stated in religious records to be careful not to follow false deities Yet how can you know anything in this domain if you are kept ignorant the entire time and probably lied to misled and many times tempted with irrelevant material compensations throughout life This book helps you understand civilizations from a rigorous comprehensive perspective including the meaning interests agreements and intentions that civilizations have in the wider world why individuals form civilizations as an end product of their cumulative lifetime efforts and furthermore what meanings these civilizations have in the wider world **The Realm of Facts** Nicholas

Rescher,2020-01-20 Knowledge of facts is essential for the management of life Most studies of the subject examine how we go about trying to obtain it they describe the processes and proceedings of rational inquiry The present work steps back from this to inquire into the limits and limitations of such processes and to identify the assets and the limitabilities of what they are able to supply for us It examines how knowledge of facts is secured and consolidated as such and what the resulting

information can and cannot provide It argues that the unavoidable incompleteness of our factual information also endows it with an element of incorrectness By looking also at the negative side of human inquiry the book s perspective clarifies the nature of our grip on the facts that constitute our view of the reality of things **The Human Origins** Valentin Matcas,2016-04-20 There is more to the human origins development intelligence and civilization than the epic debate Creationism versus Evolution simply because there is more to the human condition than what authorities and ideologies want you to believe Therefore when you study the human origins you have to search beyond the moment when the first humans had detached from the firmament or previous species since there are other significant events in humanity s lifespan and achievement defining its specific timeline While you have to study everything otherwise you risk understanding these significant events only from simplistic empirical or ideological perspectives ending up learning what you already know while following the crowd throughout unending debates Since you want the accurate truth because you already know all theories beliefs speculations and debates regarding the human origins And this is why when you study the human origins you expect to understand everything about the origins of life the nature and origins of this world the nature of the human higher self and intelligence the origins and debut of the human consciousness and human intelligent reasoning along with all details related to the Creator of this entire world of Life and of humanity Additionally it is relevant to know how all these affect you personally and how they affect your family your genetic line and your nation how your family and genetic line originate where and how it happened under what circumstances and with what status and privileges for you for your family for your nation and for the humankind And this is exactly what we cover throughout this book in all details and from all perspectives This book studies the human origins along with the origins of life human intelligence human species human development human society human current civilization along with various past civilizations of Earth integrating humans their origins and their original and current conditions in an elaborate comprehensive model *PEAK EVOLUTION: Beyond Peak Performance and Peak Experience* Lauren Holmes,2010-05-31 This is the second edition of the powerful peak evolution paradigm shift It is the means to leave a lifetime legacy more profound more meaningful more impactful and more valuable to world progress than you thought yourself capable of contributing Peak Evolution offers a breakthrough new approach to achieving the most evolved states known to mankind It is a means to have right now the advanced functionality of the future human which will not be prevalent for generations Peak Evolution serves as an explanation and beacon for people who have spontaneously begun to evolve ahead of the general population and a road map for those who wish to proactively speed evolution Peak Evolution is a how to book for achieving beyond your innate potential by harnessing natural evolutionary forces attempting to ensure the survival and peak performance of all living systems The multitude of systems inside of our bodies or outside of us in a biological ecosystem for example are both kept in balance by these natural evolutionary forces It is therefore only logical to deduce that those same evolutionary forces are also acting upon us directly Our cultures have simply interfered with our

ability to comply with and capitalize on these forces Peak Evolution identifies ten signals of those powerful evolutionary forces operating in your life so you can harness that flow to function and achieve goals beyond your potential Your capabilities are extended by the knowledge intelligence mechanisms processes and creativity of nature When you align your internal drives with nature s drives you cannot help but shift into overdrive You are perpetually pulled beyond your previous potential into a state of accelerating evolution or peak evolution This is how ordinary people have been capable of extraordinary achievements

Fuzzy Sets in the Management of Uncertainty Jaime Gil-Aluja, 2013-06-29 Fuzzy Sets in the Management of Uncertainty presents an overview of current problems in business management primarily for those situations involving decision making of an economic financial nature The monograph therefore discusses problems of planning programming control and brings light to the entire financial network in its three phases raising funds analysis and investment Special attention is paid to production processes and marketing of products and services This monograph is a highly readable overview and introduction for scientists professionals graduate students managers and consultants in the growing field of applications and fuzzy logic in the field of management

Reality And/or Realities Mauricio Abadi, Susan Rogers, 1995-09 We all take reality for granted as a measuring stick for subjective experience Philosophers have swung between realism and idealism for many centuries Psychoanalysis denies such an opposition and supports the idea that external and internal reality are different ways of describing the same thing It is a tentative and precarious bridge to close the gap between these multiple experiences This book explores the radical idea that reality is deconstructed codified and reconstructed in an absolutely singular fashion by each of us at all times

The Realities of Reality - Part I: It All Starts from Within Fritz Dufour, MBA, DESS, 2018-03-16 This book is the first of a series that considers the many aspects of reality I call it It all starts from within because reality starts with each of us individually and independently It starts from our inner self before evolving into what I would call the collective reality meaning a generally agreed upon state in which groups of people entire nations or the whole world believe That reality includes beliefs cultures ideologies etc As we change and adapt to our environment our reality changes as well New realities emerge Chapter one is about perception and our senses It demonstrates how perception is impossible without our senses Whatever angle of reality that s being analyzed one or more of our senses plays a momentous role in its understanding Chapter two considers the role of the brain in the making of reality It delves into how the brain can make the mind behave a certain way under certain circumstances Chapter three looks at the mind which I call the ultimate maker of reality This chapter describes the mind as that intangible component of the brain and where reality or all realities stem from after of course being picked up by the senses and the brain Chapter four attempts to define reality itself after it s perceived by our senses analyzed by our brain and processed by our mind I consider five questions in my attempt to answer the question what is reality They are what are things and why do they look different from one another What is life and its origins What is death What is superstition What is space and are we alone in the universe

Supernatural Religion: an Inquiry Into the Reality of Divine Revelation. [By Walter Richard Cassels Walter Richard Cassels,1874 **The Public School Journal** ,1904 School and Home Education ,1904 **What is Reality?** Francis Howe Johnson,1891 **The Production of Reality** Jodi O'Brien,2021-12-05 This popular text reader for the social psychology courses in sociology departments is distinguished by the author's engaging framing essays that open each part and an eclectic set of edited readings that introduce students to major thinkers and perspectives in this field Through the combination of essays and original works the book demonstrates how we make and remake our social worlds through our everyday interactions with one another The Seventh Edition features 10 new readings from the contemporary social psychology literature a streamlined organization and the option of either e book or print versions Language, Thought, and Reality, second edition Benjamin Lee Whorf,2012-07-13 Writings by a pioneering linguist including his famous work on the Hopi language general reflections on language and meaning and the Yale Report The pioneering linguist Benjamin Whorf 1897 1941 grasped the relationship between human language and human thinking how language can shape our innermost thoughts His basic thesis is that our perception of the world and our ways of thinking about it are deeply influenced by the structure of the languages we speak The writings collected in this volume include important papers on the Maya Hopi and Shawnee languages as well as more general reflections on language and meaning Whorf's ideas about the relation of language and thought have always appealed to a wide audience but their reception in expert circles has alternated between dismissal and applause Recently the language sciences have headed in directions that give Whorf's thinking a renewed relevance Hence this new edition of Whorf's classic work is especially timely The second edition includes all the writings from the first edition as well as John Carroll's original introduction a new foreword by Stephen Levinson of the Max Planck Institute for Psycholinguistics that puts Whorf's work in historical and contemporary context and new indexes In addition this edition offers Whorf's Yale Report an important work from Whorf's mature oeuvre **The Reality of Infinity and the Existence** Yilmaz Gökdeniz,2008-08-12 This book consists of theoretical articles in cosmology and theology The main focus of these articles is the reality of infinity Infinity whose cognizable definition based on scientific facts has not been made so far has been regarded as a virtual numeric concept and as the last stage of greatness and diminutiveness used as a scale by scientists and men of religion This book asserts that neither numbers nor numerical entities will ever be infinite Numbers are not natural they are not real and they are virtual concepts they stem from the way of thought and willpower of human being The reality of infinity is a concept of cosmology Due to the endlessness of infinity it is possible to define and to understand it with the reality of infinity considering the principles of infinity The book explains that the beliefs and notions of scientists and men of religion are outcome of their own comprehension of the nature of the universe and of religion and focuses on how their theories depending generally on metaphysics or meta science are far from reflecting the realities In the book The Nature of the Universe The Natural Basic Forces and the Universal Balances Blackholes Gamma Ray Bursts Cosmic
