Murray,2023-10-30 This two volume set LNCS 14383 and LNCS 14384 constitutes the refereed proceedings of the 16th International Conference on Interactive Digital Storytelling ICIDS 2023 held in Kobe Japan during November 11 15 2023 The 30 full papers presented in this book together with 11 short papers were carefully reviewed and selected from 101 submissions Additionally the proceedings includes 22 Late Breaking Works The papers focus on topics such as theory history and foundations social and cultural contexts tools and systems interactive narrative design virtual worlds performance games and play applications and case studies and late breaking works *The Idea of the Labyrinth from Classical Antiquity through the Middle Ages* Penelope Reed Doob,2019-03-15 Ancient and medieval labyrinths embody paradox according to Penelope Reed Doob Their structure allows a double perspective the baffling fragmented prospect confronting the maze treader within and the comprehensive vision available to those without Mazes simultaneously assert order and chaos artistry and confusion articulated clarity and bewildering complexity perfected pattern and hesitant process In this handsomely illustrated book Doob reconstructs from a variety of literary and visual sources the idea of the labyrinth

from the classical period through the Middle Ages Doob first examines several complementary traditions of the maze topos showing how ancient historical and geographical writings generate metaphors in which the labyrinth signifies admirable complexity while poetic texts tend to suggest that the labyrinth is a sign of moral duplicity She then describes two common models of the labyrinth and explores their formal implications the unicursal model with no false turnings found almost universally in the visual arts and the multicursal model with blind alleys and dead ends characteristic of literary texts This paradigmatic clash between the labyrinths of art and of literature becomes a key to the metaphorical potential of the maze as Doob's examination of a vast array of materials from the classical period through the Middle Ages suggests She concludes with linked readings of four labyrinths of words Virgil's Aeneid Boethius Consolation of Philosophy Dante's Divine Comedy and Chaucer's House of Fame each of which plays with and transforms received ideas of the labyrinth as well as reflecting and responding to aspects of the texts that influenced it Doob not only provides fresh theoretical and historical perspectives on the labyrinth tradition but also portrays a complex medieval aesthetic that helps us to approach structurally elaborate early works Readers in such fields as Classical literature Medieval Studies Renaissance Studies comparative literature literary theory art history and intellectual history will welcome this wide ranging and illuminating book

Mazes in Videogames Alison Gazzard, 2013-04-17 From the text adventures of Zork to the arcade game of Pac Man to the corridors of Doom and on to the city streets of Grand Theft Auto IV the maze has often been used as a space to trap and confuse players in their navigation of gameworlds However the maze as a construction on the landscape has a

long history before the invention of the videogame By examining the change in the maze from the landscapes of open spaces and closed gardens through to the screen of the videogame both mazes and labyrinths are discussed in terms of historical reference alongside the author's personal experiences of walking and playing these structures This book shows how our cultural experiences of real world maze landscapes may have changed and how we negotiate videogame worlds along the various paths and meanings they so often create for us

Barcelona Colleen P. Culleton,2016-07-22 Bringing together works by Salvador Espriu Juan Goytisolo Merc Rodoreda Esther Tusquets and Juan Marsa that portray memory as a disorienting narrative enterprise Colleen Culleton argues that the source of this disorientation is the material reality of life in Barcelona in the immediate post Civil War years Barcelona was the object of harsh persecution in the first years of the Franco regime that included the erasure of marks of Catalan identity and cultural history from the urban landscape and made Barcelona a moving target for memory The literature and film she examines show characters struggling to produce narratives of the remembered past that immediately conflict with the dominant version of Spain s historical narrative formulated to legitimize the Civil War Culleton suggests the trope of the laberinto used as an image or device in all five of the works she considers and translated into English as both maze and labyrinth opens up a space that enables readers to take vulnerability to outside interference into account as an inseparable part of remembrance While the narratives all have maze like qualities involving a high level of reader participation and choice the exigencies of the labyrinth with its unicursal demands for patience perseverance and faith always prevail Thus do the Francoist narrative and social structure in the end resurface and reassert themselves over the narrating character s perspective **Expanding the Boundaries of Transformative Learning** E. O'Sullivan,A. Morrell,M. O'Connor,2016-04-30

Transformative learning involves experiencing a deep structural shift in the basic premises of thought feelings and actions It is a shift of consciousness that dramatically and permanently alters our way of being in the world Such a shift involves our understanding of ourselves and our self locations our relationships with other humans and with the natural world our understanding of relations of power in interlocking structures of class race and gender our body awarenesses our visions of alternative approaches to living and our sense of possibilities for social justice and peace and personal joy The editors of this collection make several challenges to the existing field of transformative learning the first is to theoreticians who have attempted to describe the nature of transformative learning without regard to the content of transformative learning The editors argue that transformative learning theory cannot be constructed in a content neutral or context free way Their

second challenge which assumes the importance content for transformative learning is to educators as practitioners The editors argue that transformative learning requires new educational practices consistent with the content Arts based research and arts based teaching learning practices are one example of such new educational practices Education for the soul or spiritual practices such as meditation or modified martial arts or indigenous peoples forms of teaching learning is another example Each article in the collection presents a possible model of these new practices *Heart Power* Ed Conrad, 2014-10-15 Rather than attempting to engage the reader in more mental exercises the wisdom and inspiration in this daily companion book is designed to uncover something far more powerful Through personal stories infused with honest bold and sometimes humorous reflections the author invites us to awaken and energize our greatest inner resource the power of the inner heart Not only does he draw upon his personal experience practice research and vulnerabilities in crafting these daily pieces of wisdom he also draws from the well of renowned spiritual teachers and ageless wisdom traditions Day by day each writing stands on its own as a love offering created to inspire as well as support the dismantling of our personal fears When included as part of daily spiritual practice *Heart Power* is likely to awaken the sleeping giants of tangible courage spiritual healing creative energy and ongoing loving compassionate connection with ourselves and our companions Simple but potent heart centered daily practices are provided to help with this personal and spiritual restoration In this one of a kind daybook the power and wisdom of the inner heart comes of age **Labyrinth Walking** Patricia Telesco, 2001 Discover the use of the labyrinth as a spiritual tool used throughout the centuries in many different cultures to find meditation focus peace and wholeness Includes a complete guide to crafting personal labyrinths for spiritual growth as well as a dictionary of essential symbols and patterns *Labyrinths, Intellectuals and the Revolution* Ian Campbell, 2013-03-27 *Labyrinths Intellectuals and the Revolution* traces the development of the postcolonial Arabic language Moroccan novel from its roots in travel narratives and autobiography into its more mature period of stylistic and thematic diversity in the early 1970s This study first undertakes an exploration of the political social and artistic conditions under which the genre developed then moves to close readings of each of the formative texts grouped by theme The analysis of these texts centers around their spatial practices there is a tension between the labyrinthine space of the street which deflects legibility and the sacred interior within the blank walls wherein a certain equality of gaze and power can be perceived *Theoretical and Technological Advancements in Nanotechnology and Molecular Computation: Interdisciplinary Gains* MacLennan, Bruce, 2010-11-30 *Theoretical and Technological Advancements in Nanotechnology and Molecular Computation Interdisciplinary Gains* compiles research in areas where nanoscience and computer science meet This book explores current and future trends that discuss areas such as cellular nanocomputers DNA self assembly and the architectural design of a nano brain The authors of each chapter have provided in depth insight into the current state of research in nanotechnology and molecular computation as well as identified successful approaches tools and methodologies in their research *Shortest*

Path Solvers. From Software to Wetware Andrew Adamatzky, 2018-04-26 This book offers advanced parallel and distributed algorithms and experimental laboratory prototypes of unconventional shortest path solvers In addition it presents novel and unique algorithms of solving shortest problems in massively parallel cellular automaton machines The shortest path problem is a fundamental and classical problem in graph theory and computer science and is frequently applied in the contexts of transport and logistics telecommunication networks virtual reality and gaming geometry and social networks analysis Software implementations include distance vector algorithms for distributed path computation in dynamics networks parallel solutions of the constrained shortest path problem and application of the shortest path solutions in gathering robotic swarms Massively parallel algorithms utilise cellular automata where a shortest path is computed either via matrix multiplication in automaton arrays or via the representation of data graphs in automaton lattices and using the propagation of wave like patterns Unconventional shortest path solvers are presented in computer models of foraging behaviour and protoplasmic network optimisation by the slime mould *Physarum polycephalum* and fluidic devices while experimental laboratory prototypes of path solvers using chemical media flows and droplets and electrical current are also highlighted The book will be a pleasure to explore for readers from all walks of life from undergraduate students to university professors from mathematicians computers scientists and engineers to chemists and biologists
