professionals working with patients suffering from this debilitating disorder *Ethics Primer of the American Psychiatric Association* American Psychiatric Association, 2008-08-13 In questions of psychiatric ethics simple yes or no answers are rare yet questions arise frequently in the clinical setting Should I accept a patient's invitation to a party Is it OK to tell a patient that I too have had a depression Can I release sensitive information about my patient without the patient's consent Can I give a psychiatric opinion about someone I've never examined A shortage of ethics instruction from medical school through residency has left many psychiatrists facing the increasingly complex field of ethics without a clear guide to ethical decision making and conduct until now Informed by some of the formal proceedings of the APA Ethics Committee *Ethics Primer of the American Psychiatric Association* presents today's ethical dilemmas in eleven informative chapters brought to life by the clinical vignettes based on actual cases seen by this primer's distinguished contributors Boundary violations between the doctor patient relationship and any other relationship e.g. social sexual romantic business Issues such as informed consent psychopharmacology hospitalization and psychotherapy with children adolescents and families Issues such as confidentiality competence and consent quality of life abuse and neglect and use of restraints with geriatric populations Involuntary hospitalization rife with conflict and controversy where many ethical principles clash e.g. beneficence autonomy informed consent Reconciling ethical conduct as delineated in guidelines of the AMA APA and Sabin with managed care's cost containment and rationing of medical services Confidentiality how this fundamental ethics principle can clash with the business ethics of managed care and insurance companies Gifts from patients and industry when and why they are or are not acceptable The often uncomfortable duty to report colleagues who engage in fraud or deception from speaking privately with a colleague to referring a concern to a departmental committee supervisor or local APA ethics committee and applicable legal mandates Emergency care ethics how to ensure proper treatment for psychiatric patients who come to the emergency room with physical illnesses forensic psychiatry including codes of ethics boundary issues and management of allegations of ethical misconduct When consultations and second opinions are needed Including an appendix with selected material from *The Principles of Medical Ethics With Annotations Especially Applicable to Psychiatry* this clinical guide and reference is sure to stimulate the discussion so integral to maintaining the dynamic tradition of ethics As such it is essential reading for every psychiatrist whether in training or in established clinical practice who aspires to a richer appreciation for the wisdom and subtleties of the guidelines and principles of medical ethics *The Massachusetts General Hospital Textbook on Diversity and Cultural Sensitivity in Mental Health* Ranna Parekh, Nhi-Ha T. Gifts Richard Hyland, 2009-06-05 Gifts A Study in Comparative Law is the first broad based study of the law governing the giving and revocation of gifts ever attempted Gift giving is everywhere governed by social and customary norms before it encounters the law and the giving of gifts takes place largely outside of the marketplace As a result of these two characteristics the law of gifts provides an optimal lens through which to examine how different legal systems engage with social practice The law of gifts is well developed both in the civil and the common laws Richard Hyland's study provides an excellent view of the ways in which different civil and common law jurisdictions confront common issues The legal systems discussed include principally in the common law those of Great Britain the United States and India and in the civil law the private law systems of Belgium and France Germany Italy and Spain Professor Hyland also serves a critique of the dominant method in the field which is a form of functionalism based on what is called the *praesumptio similitudinis* namely the axiom that once legal doctrine is stripped away developed legal systems tend to reach similar practical results His study demonstrates to the contrary that legal systems actually differ not only in their approach and conceptual structure but just as much in the results

Medicine, Money, and Morals Marc A. Rodwin, 1995 Physicians conflicts of interest are rampant in the American medical community Today it is not uncommon for doctors to refer patients to clinics or labs in which they have a financial interest for hospitals to offer incentives to physicians who refer patients to them or for drug companies to provide lucrative give aways to entice doctors to use their brand name drugs

Psychotherapy Tradecraft: The Technique And Style Of Doing Theodore H. Blau, 2014-01-09 First published in 1988 The literature of psychotherapy is heavily weighted on the side of theory There is an almost complete absence of tradecraft what to do when to do it and how to do it Tradecraft refers to the specific techniques used by experienced and skillful psychotherapists to create the therapeutic setting to invite and maintain

a therapeutic alliance to enhance the patient's progress and finally to allow the patient to integrate and complete the process of psychotherapy. A search of psychoanalytic literature reveals an enormous amount of theory and speculation, countertheory and counter speculation but little tradecraft. This book aims to fulfil that gap.
